

Skid-Mounted Systems for the Sanitary Industry

Applications

- Food and beverage
- Dairy
- Pharmaceutical
- Biotechnology

Capabilities

- Full skid packages
- Portable and stationary systems
- Custom manufacturing

Swagelok now offers skid-mounted systems for liquid flow applications in the sanitary industry.

From mounting positive and centrifugal pumps on bases to manufacturing complete skid-mounted systems to your detailed design, Swagelok and its independent sales and service representatives are ready to assist you. We can use your equipment such as heat exchangers, tanks, valves, and pumps, or we can provide the equipment for a total solution.

Clean-In-Place (CIP) System

Portable Colloid Mill System

Skid-Mounted Systems

Let Swagelok produce your next complete skid package to help you reduce your overall project cost and field installation time.

- Custom manufactured to your detailed design
- Drawings and documentation provided according to your requirements
- High-quality fabrication, welding, and assembly
- Rapid response to meet required schedules
- Optional services:
 - Controls and testing
 - Operations and service manuals

Blending/Mixing System

Portable CIP System

Swagelok®

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.
