

QC Series Quick-Connect Design Change Identification

Double-End Shutoff (DESO) Stem

The new-design stems are marked “Swagelok” in one of the two locations shown. Old-design stems are not marked.

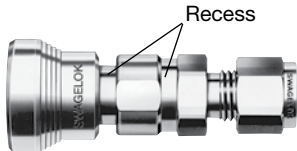

⚠️ Rebuild kits for the two designs have different dimensions and cannot be used interchangeably. Either leakage or blockage may occur.

Rebuild kit part numbers with the new-design stem contain the letter “A” after the series size designator. Example: SS-QC6**A**-D-KITVT

Body

New-design QC series bodies only have one recess.

Old Design

New Design

⚠️ Rebuild kits for the two designs have different dimensions and cannot be used interchangeably. Either leakage or blockage may occur.

Rebuild kit part numbers with the new body contain the letter “A” after the series size designator. Example: SS-QC4**A**-B-KITVT
