

Swagelok® Custom Solutions

Swagelok® Central Canada

Reduce your costs by taking advantage of our
Custom Solutions Services.

Swagelok®

Value beyond the expectedSM

Custom Solutions

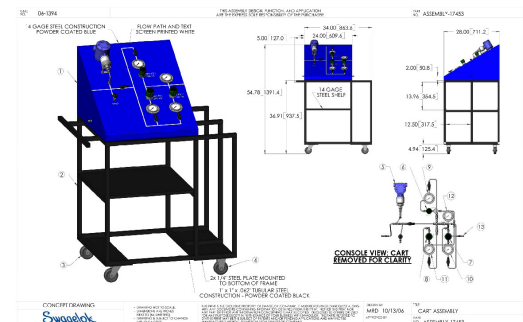

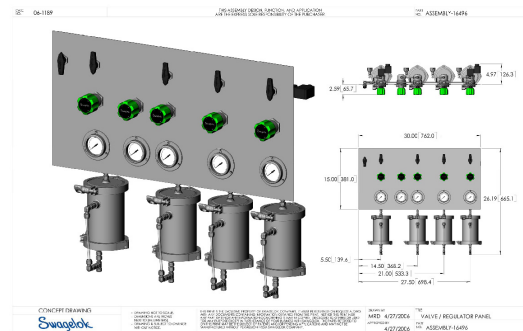

Our company offers highly flexible design, assembly and fabrication services to meet your needs. Our certified personnel can assemble a range of fluid system components to reduce your installation time and cost.

SERVICES OFFERED

SUB-ASSEMBLIES

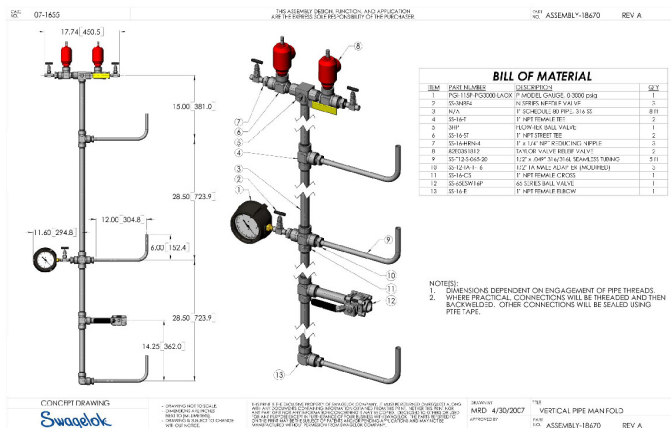

CUSTOM FABRICATIONS

Our fabrication team is committed to finding ways to meet your needs for specialty items. Whether your fluid system design requires standard or custom components, we will review your specialized needs and work with you to fulfill them.

CAD CAPABILITIES

Using our 3D modeling software we can create or edit CAD drawings to assist you in the design of your fluid systems.

CUSTOM TUBE BENDING

We provide consistent high quality bends in tubing made of stainless steel, copper, steel, aluminum and a variety of other materials.

ORBITAL WELDING

Our orbital welding specialists create consistently reliable welds using the Swagelok Orbital Welding System.

All of our welding operators are certified to ASME Section IX, for tubing sizes ranging from 1/4" OD to 4" OD.

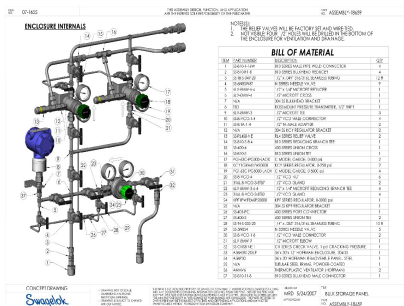

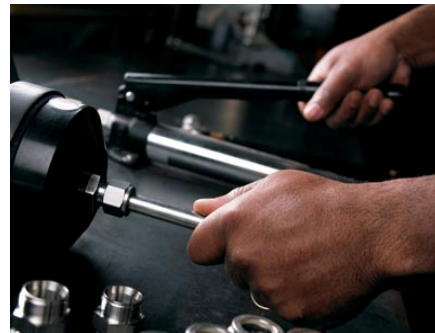

BENEFITS

- **Reduce Cost** - choosing to outsource your fabrication needs minimizes your planning, assembly and purchasing costs
- **Save Time** - providing a single source solution
- **Quality** - offering the highest quality product and installed with detail oriented installers
- **Certification** - using Swagelok certified installers, we are able to properly assemble your system
- **Warranty** - All Swagelok components shall be free from defect and workmanship for the life of the products.
