

Swagelok Company is a leading developer and provider of fluid system products, assemblies, services, and training for the oil and gas, chemical and petrochemical, semiconductor, transportation, and power industries. Millions of our products are in use around the world.

The Swagelok brand and name have long been synonymous with exceptional quality and reliability. Our expertise in materials science, product design and fluid system performance—combined with an extensive global sales and service network—enables us to be a resource that our customers rely on for experience, insight, and support.

We are committed to fostering a corporate culture that promotes our core values of innovation, continuous improvement, respect, quality, customer focus, and integrity.
