

Biography

Joel Feldman

Vice President, Corporate Engineering

As vice president, corporate engineering, Joel Feldman and his team are responsible for creating new products and systems, as well as for maintaining the strength of Swagelok's product and application portfolio. Joel is committed to continued diligence in the quality and design of Swagelok products, as well as to working closely with sales and service centers, the operations team, and suppliers to innovate and develop new solutions to customers.

Joel began his career with Swagelok as an engineering co-op student. Upon graduation in 1999, he joined the company full-time as an engineer. He gained leadership experience as new product development engineering supervisor before advancing to management positions in new product development and customer service. Joel was promoted to director in 2012 and served in various areas of the organization, including outbound supply chain, engineering innovations, product and market development, and operations, before being named vice president in 2018.

Outside of work, he enjoys hiking and playing tennis with his wife and two children. Joel serves on the board of a non-profit organization called Progress with Chess and is a board member of Komen Northeast Ohio.

He earned his Bachelor of Science degree in mechanical engineering and an M.B.A. in business administration, both from Case Western Reserve University.
