

Biography

Wayne Ostrosky

Vice President, Operations

Named vice president of operations in 2022, Wayne Ostrosky is responsible for the organization's domestic and internal operations service groups.

He joined the organization as an assembly engineer in 1995, just after graduating with a Bachelor of Science degree in industrial engineering technology from Kent State University. He progressed into leadership positions as a manufacturing engineering supervisor, product engineering manager, and then plant manager.

In 2015, Wayne was promoted to director of manufacturing strategies and systems. He later served as director of operations for the fitting services group, followed by the valve services group—gaining experience in nearly every Swagelok facility, including on projects in Changshu, China and on the Isle of Man.

Outside of work, Wayne serves on the board of The Cornerstone of Hope. He and his wife Nicole are raising two daughters and enjoy spending time with family and friends.
