

Swagelok Nuclear Capabilities

Our Quality and Reliability = Your Safety

Swagelok understands the pressures you face. We can help you meet the immediate and long-term demands of the nuclear industry. Safely. Reliably. Responsively. And with the knowledge that the products you choose are especially suited for your applications.

Minimize Risk by Choosing Swagelok

Our dedication to quality and reliability leads to longer product life and reducing expensive operational downtime. Swagelok products' ease of installation means you're up and running quicker without rework required. When you specify Swagelok products, you know that you're getting quality, reliability, and safety, backed by our limited lifetime warranty.

Swagelok standard one-inch and under stainless steel tube fittings meet many global nuclear codes and standards - off the shelf.

Committed to the Nuclear Industry

Our products have been continuously certified since 1981, so you can be confident that Swagelok remains committed to the Nuclear industry. To help ease the burden on your staff, we can perform specification reviews and offer solutions to existing or obsolete products from other suppliers.

IN A NUCLEAR PLANT THERE CAN BE AS MANY AS

250,000
FEET OF TUBING

22,000
SWAGELOK FITTINGS
