

Swagelok® Hose Advisory Services

Helping you get more from your hoses.

Failed hose assemblies require time and resources you just don't have. It's better to be prepared by taking a preventative approach. Swagelok Hose Advisory Services help address concerns related to:

- Unplanned downtime
- Frequent hose replacement
- Expense
- Safety incidents

From reduced maintenance costs and extended hose life to increased safety, we're here to take the pressure off of you.

The Swagelok Hose Advisory Services program can help you:

Drive Facility Efficiencies

Save time and resources while being able to focus on more pressing priorities.

Reduce Plant Maintenance Cost

Prevent costs associated with continuously replacing the same problem hoses, unplanned downtime and wasted product.

Extend Hose Life

Save money by extended the life of your hoses through properly routed hose installation and optimal hose and end connection combinations.

Master Hose Maintenance

Better predict when systems will need attention and understand what steps are necessary to keep everything running smoothly with a customized preventative maintenance schedule.

Increase Safety

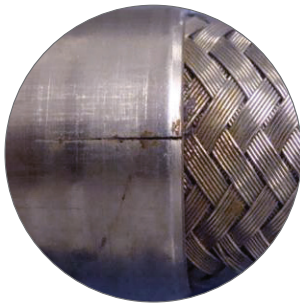

Keep your plant and processes safe, predictable and dependable with leak-tight products and best practices to reduce the risk of injuries and environmental damage.

What to Expect:

- A thorough discussion of your facility's goals
- A visual analysis of all hose systems
- Detailed, expert-reviewed findings, such as:
 - » Prioritized improvement recommendations and suggestions with replacement options
 - » Preventative maintenance schedules and hose inspection recommendations for your specific facility

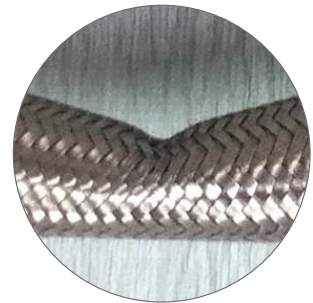

Examples of Common Hose Damage:

End Connection Damage

Excessive Cover Damage

Kinking Damage
