

Swagelok® Steam Lance

Safely heat and clean process equipment.

Don't Let Cold Weather Conditions Freeze Operations in Your Facility.

The steam lance will help keep your process media moving and prevent work stoppages by quickly de-icing mission critical equipment, process or instrument lines.

When you place a single-part number order, you get a fully-tested, ready-to-use solution. Have peace of mind knowing there is no need for field assembly or improvised solutions that might not meet your required safety standards.

Benefits:

- 1-part number for easy ordering
- Quick delivery and ready for use
- Insulated components keeps operators safe
- Easy-to-use and reliable on/off 60 Series ball valve for simple operation

Swagelok® Components:

- 60 Series ball valve
- Heat shrink entry seal boot
- Insulated tubing

Applications:

- Clean containment vessels
- Instant heating and cleaning of process lines and equipment

Safe Product Selection:

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system.
