# Supply Chain Management

---

We offer supply chain optimization services that can help you reduce inventory carry costs, increase working capital, and reduce the costs associated with storage, movement, and replenishment of your fluid system components.

## Auto-replenishment

Swagelok Allentown can help reduce your transaction costs.

For example, we can contract with you to enter orders for replenishment products into your purchasing systems.

We can visit your facility at regular and predetermined intervals to replenish your inventory. During these visits, product applications can be discussed and technical questions can be answered.

## Vendor-managed inventory (VMI)

One of the most important value-added services available from Swagelok Allentown is inventory management. Our associates have years of experience in helping to manage a customer's inventory.

We have saved our customers thousands of dollars in inventory carrying costs, by reducing their overall stocking levels.

We can prepare part usage reports, which will help analyze your inventory requirements.

We work with you to establish minimum, maximum levels for your inventory, and help to replenish inventory so the components are there when you need them.

We will provide you with the performance reports that detail the timeliness of our shipments.

## Collaborative forecasting

Swagelok Allentown can help assure an uninterrupted supply of Swagelok components, received when you need them, by working with you to unite your product forecasts with our product fulfillment strategies.

We can analyze your historical and forecasted product usage to ensure high fill rates while reducing the costs of carrying needless inventory.

## Custom kitting

We help customers reduce the cost of doing business by offering an array of customized component packaging options.

We can eliminate additional handling at your site by pre-packaging components to your specifications.

This service can help reduce packaging waste and your manpower requirement, reduce warehousing costs, and increase the efficiency of your assembly process.
