

Welcome to Swagelok Allentown

Improve Fluid System Performance.

About Swagelok Allentown

For over 75 years, Swagelok has been a leading developer and provider of fluid system components and assemblies. With millions of products in use around the world, and a growing list of services, the Swagelok name is synonymous with exceptional quality and reliability.

As the local Swagelok Sales & Service Center for northeastern and central PA, Swagelok Allentown prioritizes customers' project needs and helps them reach their goals. The Swagelok Allentown team of roughly 50 employees consists of engineers, technical specialists, project managers, and supply chain specialists. They are all dedicated to making sure you have the products and services you need at the time you need them. Swagelok Allentown offers:

- Onsite Evaluation and Engineering Services
- CAD Drawing and Design
- Steam Sampling, Freeze Protection, and Instrumentation
- CEMS Systems
- Oxygen Injection Systems
- Cleanroom Subassembly Fabrication
- Hose Fabrication
- Orbital Welder and Equipment Rentals
- Training and Education

Swagelok Allentown goes the extra mile to provide top notch project support.

Fluid System Onsite Evaluation and Engineering Services

Our technical advisors will bring their expertise, application experience, and industry knowledge to conduct an in-depth evaluation of:

- System components to assess proper installation and current condition
- Compressed gas systems for opportunities to reduce leaks
- Evaluate overall fluid system health to identify additional opportunities to maximize uptime
- Assess for flow accelerated corrosion and identify ways to mitigate

Steam Sampling, Freeze Protection, and Instrumentation

Swagelok products ensure accurate monitoring and control of steam quality, temperature, and pressure, which are vital for turbine efficiency and safety under high-temperature and thermocycling conditions. The team at Swagelok Allentown can help with:

- Instrument enclosures and heat-trace tubing for freeze protection
- Standard configurations that are easily customizable to eliminate errors and ensure consistency
- Total project solutions including testing and access to our global knowledge network

Operational Efficiency.

CEMS Systems

Have an application that needs accurate emissions data? Swagelok total solutions and products support CEMS by providing reliable tubing, fittings, and valves to sample and analyze exhaust gases. This ensures accurate emissions data, helping power plants meet stringent environmental regulations and reduce greenhouse gas emissions.

- Swagelok components and assemblies support gas systems for pressure, temperature, and flow measurement. Their precision and durability ensure accurate data collection, which is critical for process control and safety.

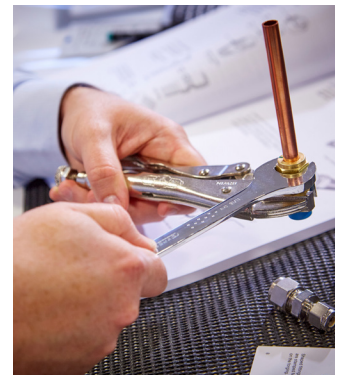

Swagelok Training

Swagelok certified training programs provide a range of valuable and practical tools for meeting day-to-day challenges related to fluid system and sampling system design, operation, and maintenance. In-depth, hands-on courses taught by experienced instructors help both new team members and industry veterans.

- Swagelok Essentials
- Tubing System Training Program
- Orbital Welding
- Advanced Tube Bending
- Process Analytical Sampling System (PASS)

Classes are conveniently offered at Swagelok Allentown for small groups. Onsite classes can be arranged for larger groups, such as part of a new employee onboarding program or in advance of planned shutdowns.
