

Tank Blanketing Pressure Regulators RHPS Series

- Types: pressure reducing and vapor recovery
- 316L stainless steel construction
- 1/2, 1, and 2 in. end connections
- Working pressures up to 232 psig (16.0 bar)
- Temperatures from -4 to 212°F (-20 to 100°C)

Features

Tank Blanketing

What is Tank Blanketing

Tank blanketing, also known as padding, is the introduction of an inert gas into the vapor space of a storage tank. The pressure of the blanketing gas, usually nitrogen, is slightly higher than atmospheric pressure. The pressure requirement is low because higher pressures do not significantly improve results and waste expensive blanketing gas. Also storage tanks have thin walls which are not designed for high-pressure-containment applications. Tank blanketing is required in many industries where pressure-tight tanks are used for storage including the pharmaceutical, biochemical, electronics, sanitary, and waste water treatment industries.

Purpose of Tank Blanketing

Tank blanketing is used for several reasons depending on the application:

- **Increase product shelf life and prevent tank corrosion.** Tank blanketing can prevent air from entering the storage tank. Air contains oxygen, moisture, and other contaminants which can degrade or contaminate the stored product or could lead to internal tank corrosion.
- **Improve safety.** Tank blanketing can reduce the oxygen content in the vapor space. The reduced oxygen content lowers the risk of combustion.
- **Ensure compliance with environmental standards.** Tank blanketing can dilute toxic vapors with inert gas to keep volatile and hazardous vapors from escaping to the atmosphere, thus ensuring compliance with emission requirements.
- **Maintain structural integrity of tank.** Tank blanketing can prevent tank collapse when the internal pressure drops, or prevent tank rupture when the internal pressure increases. The Internal pressure can drop with a decrease in temperature or when liquid is removed from the tank. The internal pressure can rise with an increase in temperature or when liquid is added to the tank.

Types of Tank Blanketing Pressure Regulators

There are two types of RHPS series tank blanketing pressure regulators:

- pressure-reducing regulators
- vapor recovery regulators (back-pressure controllers)

Tank Blanketing with Positive Pressure

Gas blanketing and vapor recovery are two techniques that can safely and effectively contain volatile vapors in tanks and other process vessels, preventing them from escaping into the atmosphere. The combination of gas blanketing and vapor recovery devices maintains a constant pressure in the tank's vapor space above the stored fluid. As a result, there will always be a constant pressure in the tank during pumping operations or when the temperature changes.

Positive Pressure Tank Blanketing with TBRS Series Pressure-Reducing Regulators

When the tank suddenly cools, the vapors inside the tank condense causing the tank pressure to decrease. The regulator opens which allows blanketing gas into the tank. Blanketing regulators also maintain a constant pressure in the tank during pump out to prevent the tank from collapsing.

Tank Blanketing

Vapor Recovery with TBVS Series Back-Pressure Regulators

When pressure inside the tank rises due to pump-in or thermal heating, the back-pressure regulator vents the excess pressure to an appropriate vapor recovery system. This prevents vapors from escaping into the atmosphere. Emergency vents or safety relief valves must be installed in the event of back-pressure regulator failure.

Testing

Every RHPS series tank blanketing regulator is factory tested for shell and seat leakage with nitrogen or air at 232 psig (16.0 bar), or its maximum rated pressure if less than 232 psig (16.0 bar). Shell testing is performed to a requirement of no detectable leakage with a liquid leak detector.

Cleaning and Packaging

Every RHPS series tank blanketing regulator is cleaned and packaged in accordance with Swagelok *Standard Cleaning and Packaging (SC-10)*, MS-06-62.

Cleaning and packaging to ensure compliance with product cleanliness requirements stated in ASTM G93 Level C, is available as an option.

Oxygen Service Hazards

For more information about hazards and risks of oxygen-enriched systems, see the Swagelok *Oxygen System Safety* technical report, MS-06-13.

⚠ RHPS series tank blanketing regulators are not "Safety Accessories" as defined in the Pressure Equipment Directive 2014/68/EU.

⚠ Do not use the regulator as a shutoff device.

Low-Pressure, Spring-Loaded, Pressure-Reducing Regulators—
 TBRs4 Series

Features

- Spring-loaded pressure control
- Diaphragm sensing mechanism
- 316L stainless steel materials of construction
- Large diaphragm to seat ratio

Options

- Special cleaning to ASTM G93 Level C
- Diaphragm material compliance to FDA and Seal compliance to FDA/USP class VI

G93 = ASTM G93 Level C-cleaned

Spring-Loaded, Pressure-Reducing Regulators— TBR8(H)8 Series

Features

- Spring-loaded pressure control
- Diaphragm sensing mechanism
- Ultrasensitive with millibar control
- Balanced poppet
- Diaphragm support plates allow for use in vacuum
- 316L stainless steel materials of construction

- Adjustable from 0.07 psig (2.0 in. H₂O, 5 mbar) pressure
- Supply pressure effect ratio: 1:3000

Options

- Factory set and locked
- Special cleaning to ASTM G93 Level C
- Diaphragm material compliance to FDA and Seal compliance to FDA/ USP class VI

Flow Tables

TBRS8 Series Regulators with 0.31 in. (8.0 mm) Seat

Outlet Pressure Range psig (in. H ₂ O, mbar)	Inlet Pressure, psig (bar)										
	1.4 (0.10)	2.9 (0.20)	5.8 (0.40)	8.7 (0.60)	11.6 (0.80)	14 (1.0)	29 (2.0)	43 (3.0)	58 (4.0)	72 (5.0)	87 (6.0)
	Air Flow, std ft ³ /min (Nm ³ /h)										
0.07 to 0.14 (2.0 to 4.0, 5 to 10)	2.3 (4.0)	4.7 (8.0)									
0.14 to 0.72 (4.0 to 20, 10 to 50)			9.4 (16)	14.1 (24)	18.8 (32)						
0.29 to 2.9 (8.0 to 80, 20 to 200)	—	—				23.5 (40)	38.2 (65)	50.0 (85)	61.7 (105)	73.5 (125)	85.3 (145)
0.72 to 7.2 (20 to 200, 50 to 500)	—	—	—	—	—						

If inlet pressure is less than 14 psig (1.0 bar), the outlet pressure should not exceed 50 % of inlet pressure in order to reach the stated flow.

TBRS8H Series Regulators with 0.20 in. (5.0 mm) Seat

Outlet Pressure Range psig (in. H ₂ O, mbar)	Inlet Pressure, psig (bar)					
	29 (2.0)	58 (4.0)	87 (6.0)	130 (9.0)	174 (12.0)	232 (16.0)
	Air Flow, std ft ³ /min (Nm ³ /h)					
0.07 to 0.14 (2.0 to 4.0, 5 to 10)						
0.14 to 0.72 (4.0 to 20, 10 to 50)	9.4 (16)	18.8 (32)	28.2 (48)	41.1 (70)	52.9 (90)	70.6 (120)
0.29 to 2.9 (8.0 to 80, 20 to 200)						
0.72 to 7.2 (20 to 200, 50 to 500)						

Inlet pressure determines the maximum flow because the outlet pressure is less than 50 % of inlet pressure, and in this situation, the gas flows through the seat at sonic velocity. This is known as critical or choked flow. Flow will not increase even if outlet pressure decreases to 0.014 psig (0.40 in. H₂O, 1.0 mbar).

Dimensions, in inches (millimeters), are for reference only and are subject to change.

End Connection Size and Type	A in. (mm)
1 in. female ISO/BSP parallel thread	4.84 (123)
1 in. female NPT	4.84 (123)
DN25 PN16 flange	4.61 (117)
1 in. ASME class 150 flange	4.61 (117)
1 in. sanitary clamp (BSOD)	4.84 (123)

Flow Table

Set Pressure	Inlet Pressure, psig (in. H ₂ O, mbar)					
	0.14 (4.0, 10)	0.29 (8.0, 20)	0.58 (16, 40)	1.4 (40, 100)	2.9 (80, 200)	7.2 (200, 500)
	Air Flow, std ft ³ /min (Nm ³ /h)					
25 % overpressure	3.2 (5.5)	7.0 (12.0)	11.1 (19.0)	19.4 (33.0)	31.7 (54.0)	64.7 (110)
50 % overpressure	4.4 (7.5)	8.8 (15.0)	15.8 (27.0)	24.7 (42.0)	40.0 (68.0)	76.5 (130)
75 % overpressure	5.0 (8.5)	10.2 (17.5)	18.4 (31.4)	29.4 (50.0)	49.4 (84.0)	82.3 (140)
100 % overpressure	6.4 (11.0)	11.1 (19.0)	21.7 (37.0)	31.7 (54.0)	54.7 (93.0)	88.2 (150)

Shown with female ISO/BSP parallel thread end connections

Ordering Information

Build a TBVS8 series regulator ordering number by combining the designators in the sequence shown below.

1
2
3
4
5
6
7
8
9
10
11
TBVS FA 8 A 1 - 02 - 3 - T T V - FS

1 Series

TBVS = 87.0 psig (6.0 bar) maximum inlet pressure

2 Inlet /Outlet

B = Female ISO/BSP parallel thread

N = Female NPT

FA = ASME B16.5 flange

FD = DIN flange

TC = Sanitary clamp (BSOD)

3 Size

8 = 1 in. / DN25

4 Pressure Class

Omit designator if flanges are not ordered.

A = ASME class 150

M = DN class PN16

5 Flange Facing

Omit designator if flanges are not ordered.

1 = Raised face smooth

6 Body Material

02 = 316L SS

7 Pressure Control Range

1 = 0.07 to 0.14 psig (2.0 to 4.0 in. H₂O, 5 to 10 mbar)

2 = 0.14 to 0.72 psig (4.0 to 20 in. H₂O, 10 to 50 mbar)

3 = 0.29 to 2.9 psig (8.0 to 80 in. H₂O, 20 to 200 mbar)

4 = 0.72 to 7.2 psig (20 to 200 in. H₂O, 50 to 500 mbar)

8 Seal Material

T = PTFE

9 Diaphragm Material

T = PTFE

10 Seat Seal Material

V = Fluorocarbon FKM

E = EPDM

F = Kalrez 6230

11 Options

FS = Factory set and locked

G93 = ASTM G93 Level C-cleaned

Other Regulators

- For general-use RHPS series regulators, see the Swagelok *Pressure Regulators, RHPS Series* catalog, MS-02-430.

- For additional Swagelok pressure regulators, see the Swagelok *Pressure Regulators* catalog, MS-02-230.

Additional Products.

- For Swagelok tube fitting products, see the Swagelok *Gaugeable Tube Fittings and Adapter Fittings* catalog, MS-01-140.

- For flange adapters, see the Swagelok *Flange Adapters* catalog, MS-02-200.

- For 60 series ball valves, see the Swagelok *Ball Valves, General Purpose and Special Application* catalog, MS-01-146.

- For piping products, see the Swagelok *Process Interface Valves* catalog, MS-02-340.

- For pressure gauges, see the Swagelok *Industrial and Process Pressure Gauges* catalog, MS-02-170.

⚠ RHPS series pressure regulators are not “Safety Accessories” as defined in the Pressure Equipment Directive 2014/68/EU.

⚠ Do not use the regulator as a shutoff device.

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Caution: Do not mix or interchange parts with those of other manufacturers.

Warranty Information

Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative.
