

POWER INDUSTRIES

PROVIDED BY SWAGELOK COLUMBUS|CHARLESTON

CONNECT, CONVEY, CONTROL, CUSTOMIZE—SWAGELOK HAS YOU COVERED

I NEED TO KEEP MY PLANT RUNNING:

Keeping a power plant running is a 24-hour job. Something's always moving—and you can't stop either. It's on you to keep systems up and the lights on. So many moving parts to the equation. Corrective maintenance, lengthy shutdowns— any of these can shift the balance of power away from production and into lost revenue. The last thing you want to worry about is a leaking or failed component. What if you knew there was a solution built on proven quality and industry standards for excellence? You know Swagelok tube fitting quality. Expect the same quality in our other products, and in building and testing your custom solution.

I NEED TO DESIGN A RELIABLE SYSTEM:

When you're the Engineer specifying a system, you're on the line to perform, too. Cost overruns and unreliability don't factor into getting the job done. Count on Swagelok to supply the quality and reliability you need to deliver solutions under the most demanding conditions.

CUSTOM SOLUTIONS:

From project start to completion, sometimes you need to work with a supplier that provides a full range of products and solutions. Swagelok Custom Solutions refers to our expert capability to supply assemblies and fabrications using Swagelok products and other customer-specified components. Swagelok guides you every step of the way, from the design to the execution phase. And our expertise goes beyond our own components. We also deliver solutions that can include custom wiring, automation, and even third-party components. Swagelok Custom Solutions range from small form-factor to highly complex. Options include high-quality Swagelok components and the ease of implementation of such solutions as heated enclosures used in natural gas combined cycle power plants with heat recovery steam generators (HRSGs), and other applications. Heated enclosures help to protect your cost investment from temperature extremes and optimize performance.
