SS-XT8TA8TA8-100CM		
SS-XT8TA8TA8-150CM		
SS-XT8TA8TA8-200CM		

X Series Hoses are widely compatible with system media with a fiber braid bonded to the core with a patent-pending processing, supporting the core to resist kinking.

304 stainless steel braid protects the core from abrasion and enhances the hose pressure rating, achieving the highest rating possible with a 1/4" Swagelok hose.

Highly flexible and supplied with integral Swagelok Tube Adapter end connections, aiding fast, easy installation with Swagelok Tube Fittings, with easy disassembly and remake.

All hoses are pressure tested, certificate ready, bagged and stocked in every Swagelok store location for fast transportation to you. Custom lengths are available on request.
