

Swagelok Georgia | Jacksonville

We Impact Your Bottom Line

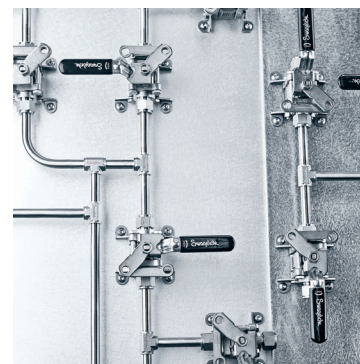

ENGINEERED TO ACCELERATE YOUR PROJECT FROM CONCEPT TO COMPLETION

When many people think of **Swagelok**, they think of tube fittings. Rightfully so. We've been the **industry leader for over 65 years**. However, many customers do not realize that Swagelok has the ability to be much more than a transactional resource.

With our fabrication and assembly service, we are afforded the opportunity to:

- Streamline customer processes
- Remove variable labor costs
- Decrease waste and rework
- Become your strategic partner

We work with every facet of your business to fully understand your objectives and goals. From the shop floor and production, to procurement and finance, even the corner office - Swagelok will examine your strategies and collaborate with you to work smarter, faster, safer, and more efficiently than ever before.

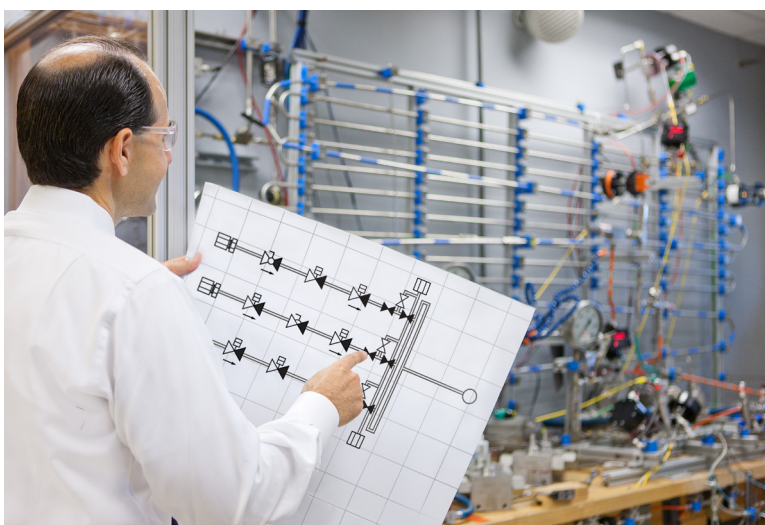

BRINGING IDEAS TO LIFE

At Swagelok Georgia | Jacksonville, we understand the challenge to do more with less. **Our skilled technicians** are certified by Swagelok standards to ensure your assembly is made to the **highest quality**.

Sometimes, you might only need us to build a small piece of your project. Other times, it might make sense to outsource the entire job.

We approach the process with flexibility and precision - from initial concept, through P&ID, to a plug and play solution that will not fail - **Swagelok is with you every step of the way.**

WHAT DOES WORKING WITH CUSTOM SOLUTIONS MEAN TO MY BUSINESS?

ENGINEERS:

- Decreased design and engineering time
- Increased safety and reliability
- Complete application support
- Optional special cleaning and leak testing
- CAD modeling and layout optimization
- Certification and documentation
- Limited Lifetime Warranty (Workmanship & Parts)

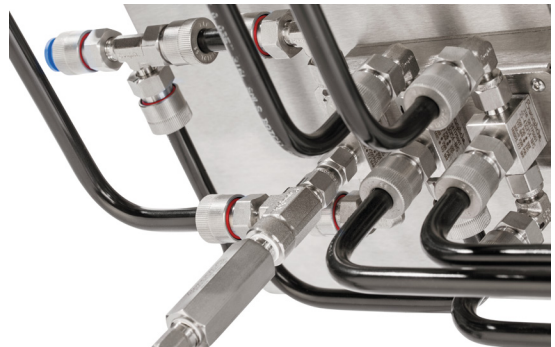

TECHNICIANS:

- Reduce installation and start-up time
- Increased labor efficiency for your team
- Minimize leakage and costly re-work in the field
- Get on and off the job site faster
- Maximize production and output
- Factory certified assembly and testing

BUYERS:

- Save time sourcing parts from multiple vendors
- Decreased receiving time and inventory costs
- Cut fewer purchase orders
- Just-in-time delivery via stocking programs
- 3rd Party components sourcing and management

“...work smarter, faster, safer, and more efficiently than ever before.”

How our Custom Solutions Impacted GAS

REDUCE. GROW. EXTEND. ENHANCE. IMPROVE.

- Annual savings of around \$244k for GAS increased their buying power.
- Decreased procurement cost.
- Eliminated waste and rework on their shop floor.

REDUCE
OVERALL
COSTS

GROW
YOUR
WORKFORCE

- When your team is busy keeping your facility running, it makes it difficult to pull them away from daily tasks and high priority projects. Rely on the expertise of our trained and certified team to design and implement a solution to your business needs.

- Custom Solutions customized and managed designs of pre-assembled products and kits for GAS to ensure that POs and shipments were ready and on-time.
- We do the heavy lifting, so you can focus on running your business and grow sales.

Extend
YOUR
WORKING
CAPITAL

Enhance
YOUR
CAPABILITIES

- Collaborating with Swagelok Custom Solutions reduces time and frustration.
- GAS used to bend their tubing by hand, now GAS uses our CNC Tube Bender to increase production with efficiency.

- Swagelok Certified Technicians:
TRUSTED. RELIABLE. EXPERTS.
- For GAS our technicians built, tested and certified each fuel rail and defueling box in line with DOT specifications to prevent any public transit catastrophies.
