Swagelok® Custom Solutions

Save time and money on custom assemblies built locally

The newest member of your team

With Swagelok® Custom Solutions, you'll be able to take advantage of our resources and expertise to build the custom assemblies you need. When you work with us, you'll get benefits such as:

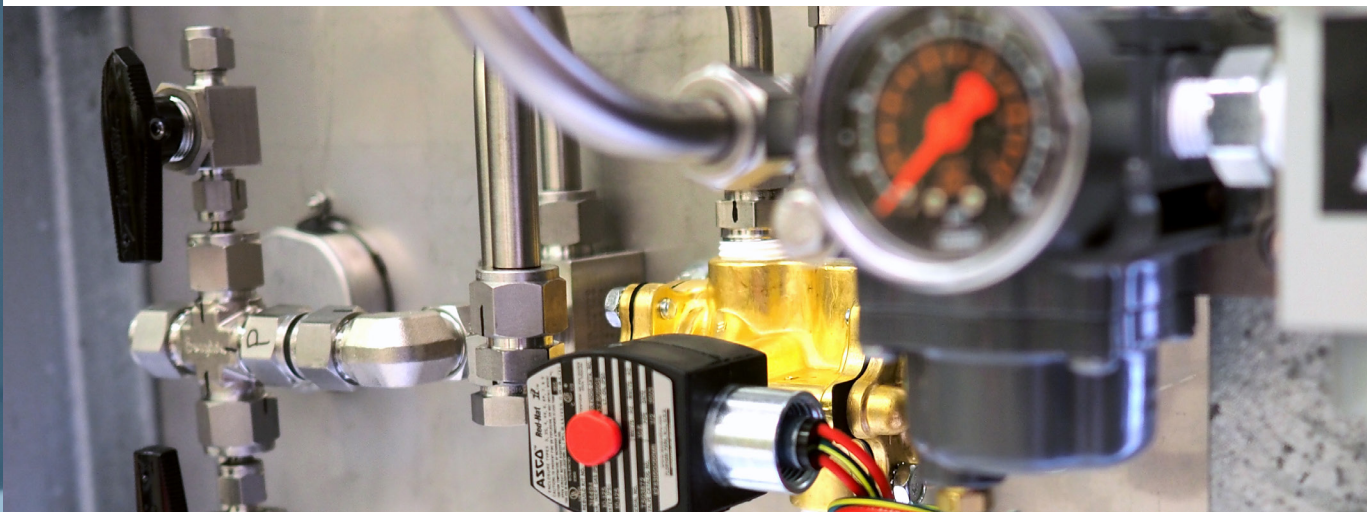

- Reduced Labor Costs
- Extensive Product Knowledge
- Swagelok Field Engineer
- Fully Customized Assemblies
- Swagelok's Global Support

Custom Assembly Services

Swagelok® Custom Solutions can work with you to create custom assemblies that meet the unique needs of your application - from concept to completion. Throughout the process, we will provide the detailed support you need.

- 3D Modeling
- Bill of Materials
- Limited lifetime warranty
- Professional packaging and delivery
- Leak testing prior to delivery

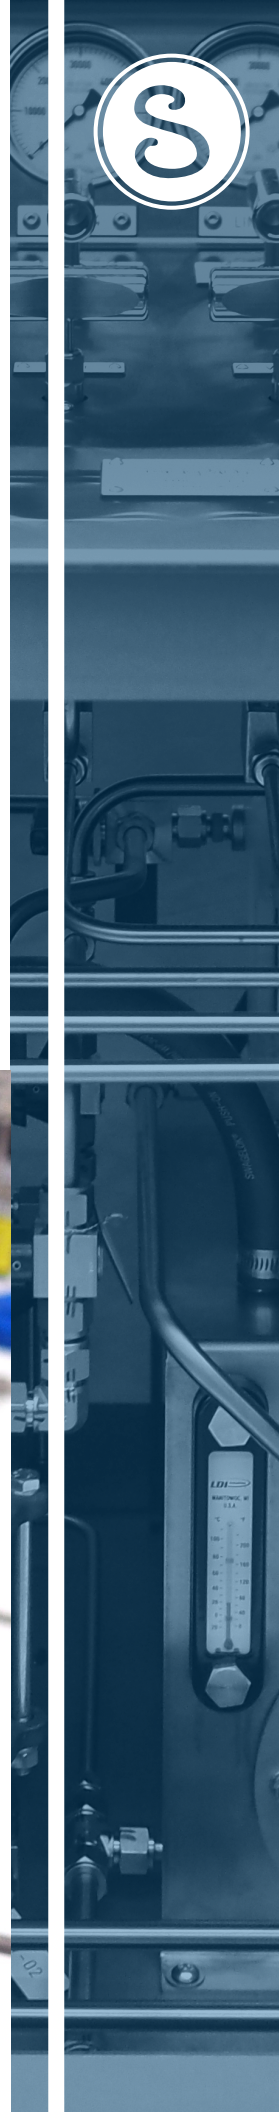

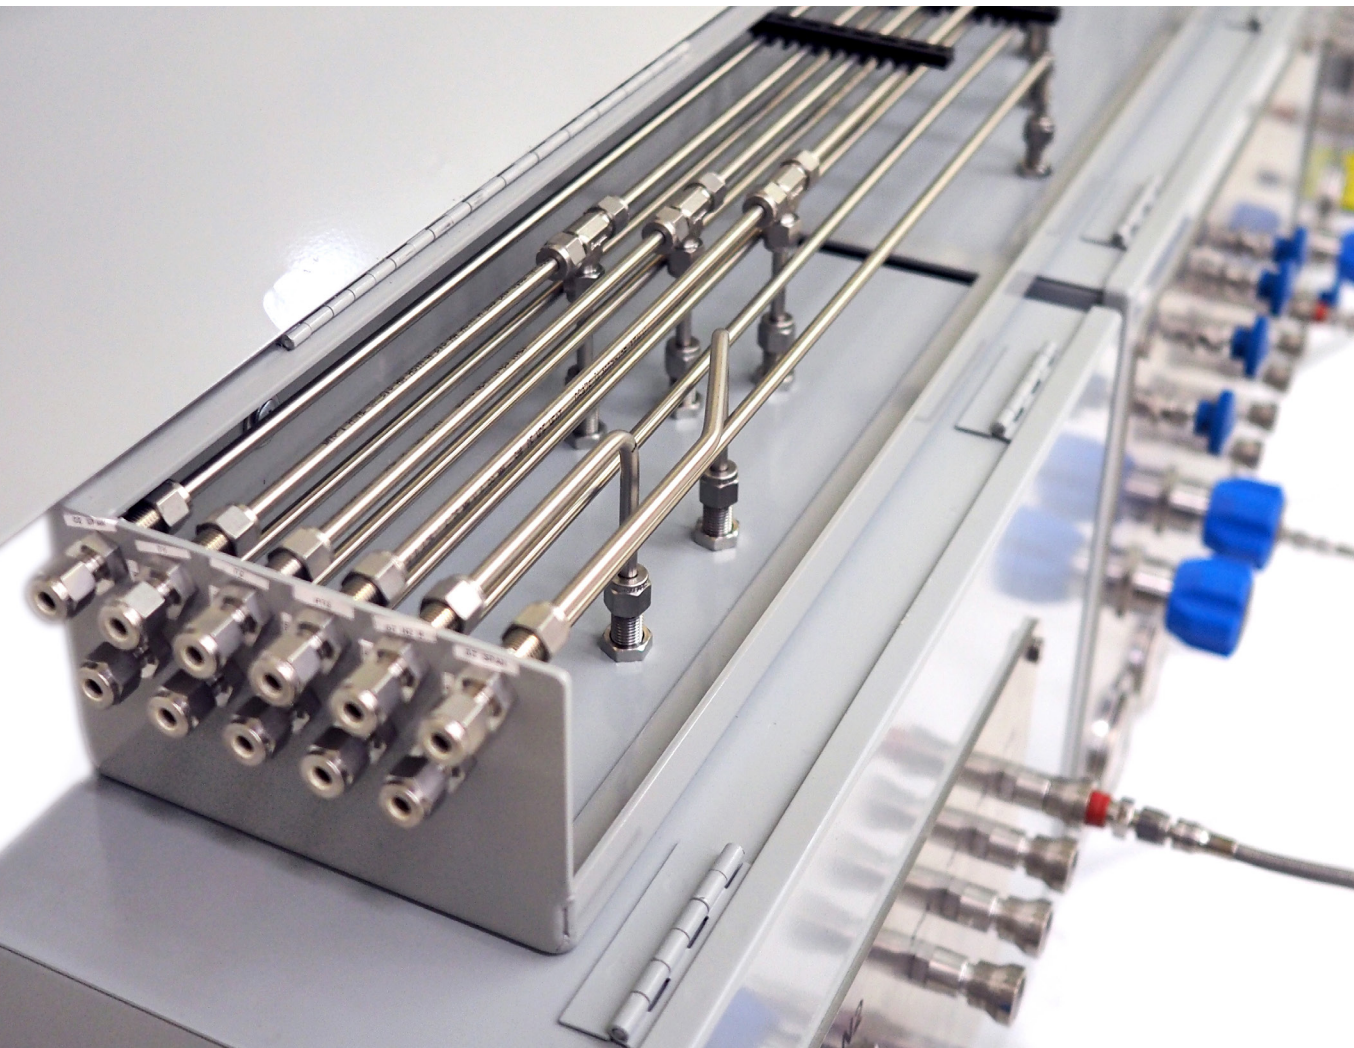

Complex Assemblies

Intricately unique assemblies made to meet your needs

We have the capabilities to complete your next project with less stress and labor from your staff. Whether you're building something out of your ordinary scope, or your staff is at its maximum capacity, let us shoulder the weight. From your initial inquiry, you will begin working closely with our local engineers on your system requirements. If you happen to have an application outside of our local expertise, we have the entire Swagelok Company to call on for support.

Some of the benefits you will receive when building a complex assembly with our Custom Solutions team include:

- Swagelok Engineering
- Local Support
- Onsite Visits to Your Facility
- Swagelok Certified Technicians
- Local Inspection | F.A.T.
- Full Assembly Drawings with BOM
- Swagelok Limited Lifetime Warranty

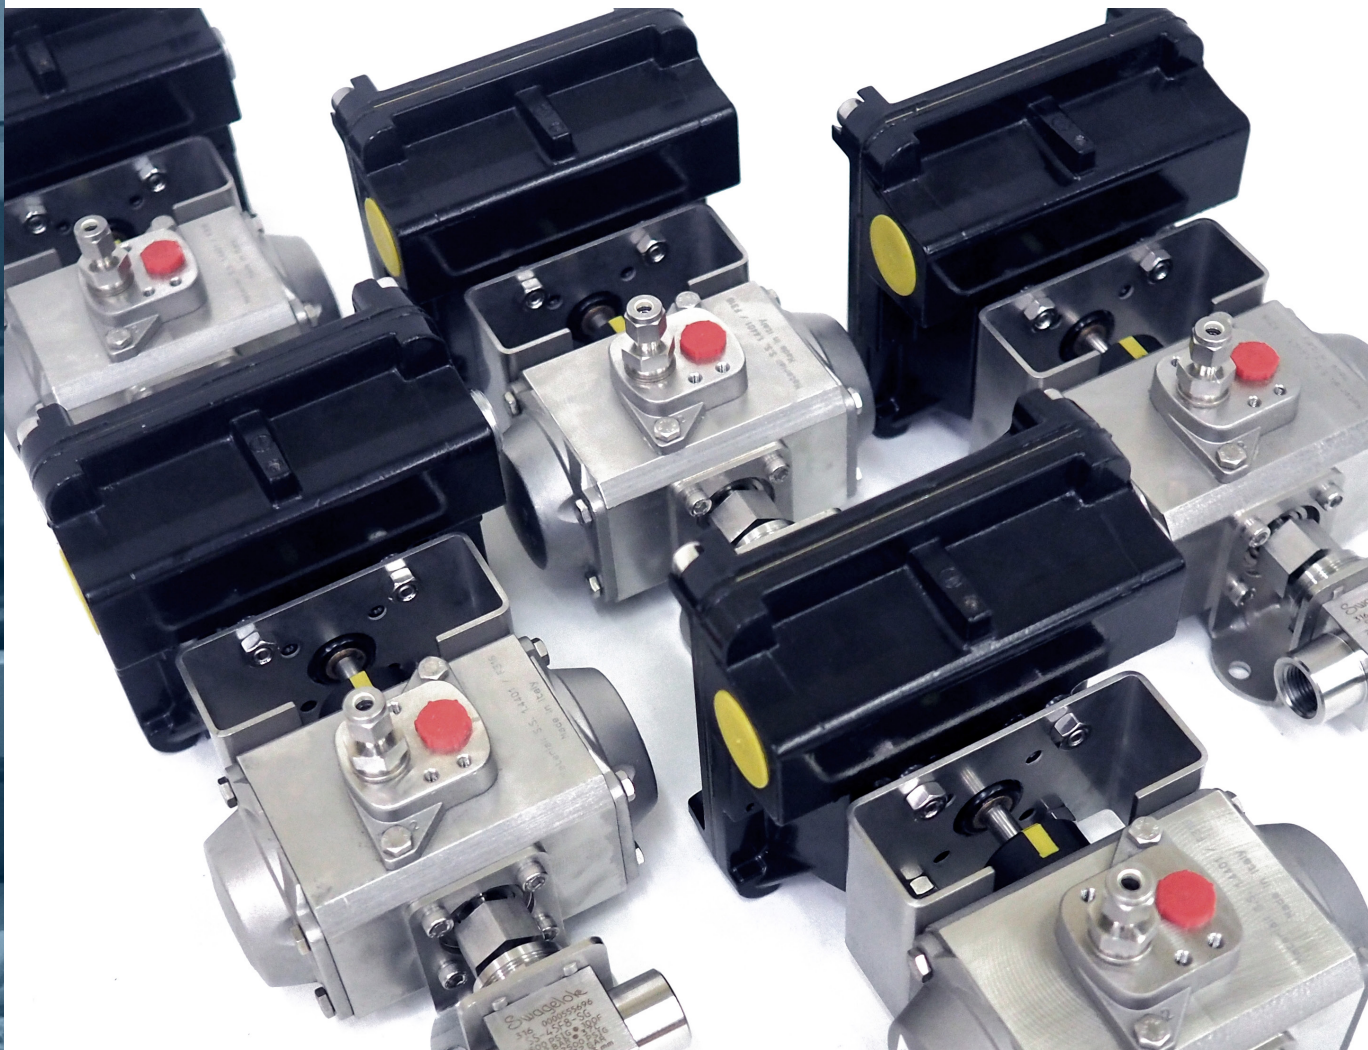

Basic Solutions

Simplify and enhance your operation with a basic assembly

Our Custom Solutions team can help you get your work done faster by shipping subassemblies ready to install.

- Pre-bent tubing runs
- Automated ball valve assemblies
- Sub-assembly fabrication
- Hose assemblies
- Preset proportional relief valves
- Custom identification tags
- Custom length cone & thread nipples
- Gauge block and bleed valve assemblies

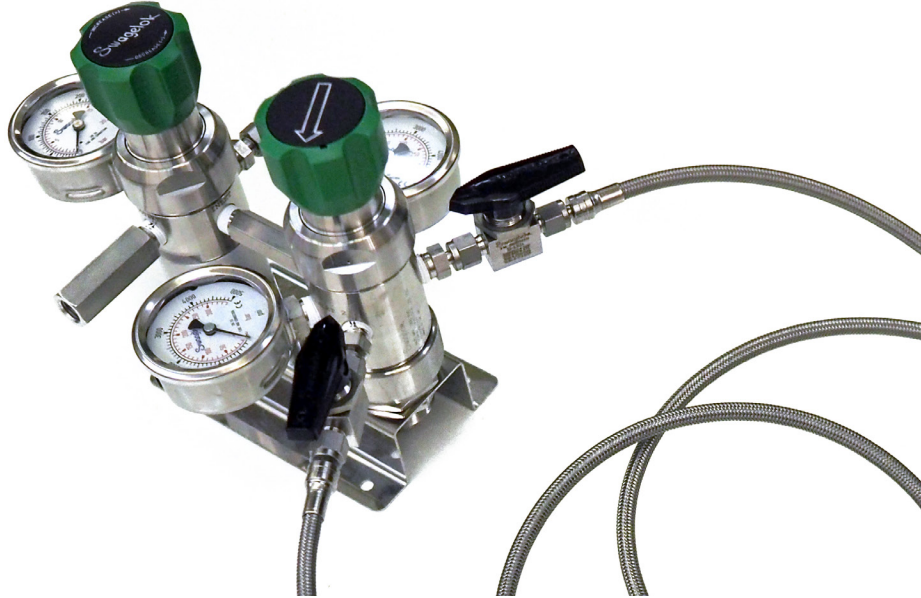

Regulator Assemblies

Ready to install regulator assemblies, made easy

We provide a large product offering in both pressure reducing and back pressure type regulators. We also have all of the accessories and additional components you might need, which include:

- Gauges
- Relief Valves
- CGA Fittings
- Hoses
- Isolation Valves
- Excess Flow Valves
- Mounting Brackets
- Tube Fittings

All components will be installed by our Swagelok certified technicians to create the exact package that you need for your application. The assembly will be leak tested prior to shipping, ensuring that when it is received, it is ready to install and perform.

This assembly will have one individual part number, rather than several for each part. This will make it easy to enter into your systems and standardize across your facility.

Sampling Assemblies

Reliable sampling is key to your production. We can help.

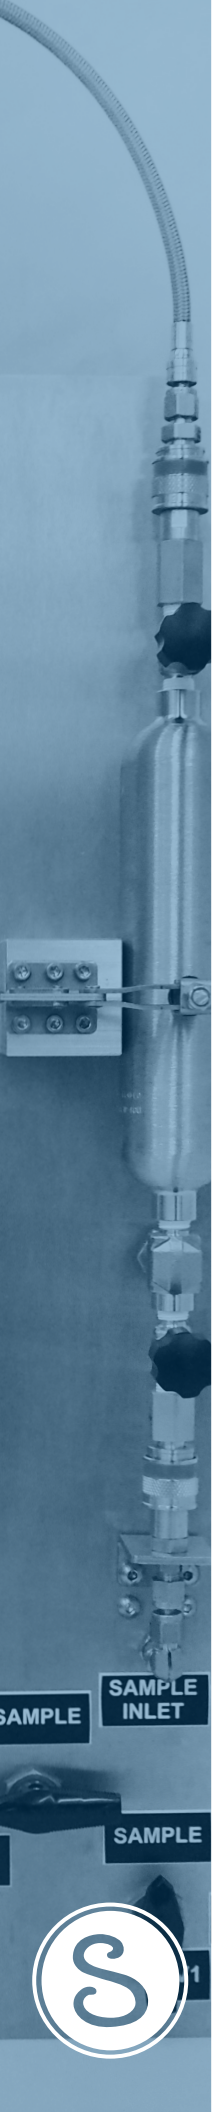

We have the solution to your sampling needs. Whether we can accomplish that with one of our standard designs or build a completely customized assembly to fit your application, we have the components and flexibility to accommodate your request. We have offerings in:

- LPG Sample Systems
- Fixed Volume Samplers
- Liquid, Needle Type Samplers
- Dry Gas Sample Stations
- Sample Cylinders

We offer sample cylinders in a wide variety of sizes, coatings and alloys. Whether your chemical is highly corrosive, or your sample is highly sensitive, we offer an option to maintain the accuracy and integrity of your sample. Some options we have include:

- Sulfinert Coated Cylinders, Valves and Outage Tubes
- Electro-polished Sample Cylinders
- Monel Sample Cylinders, Valve and Outage Tubes
- PTFE Lined Sample Cylinders

The Custom Solutions Process

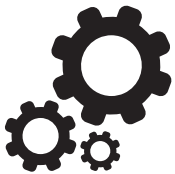

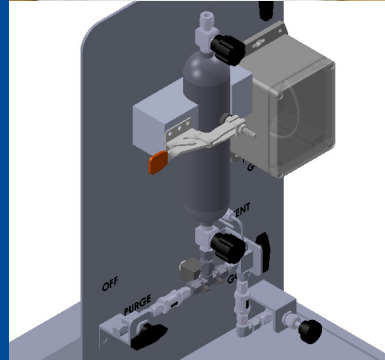

Your unique idea

Whether you have a preliminary drawing or a general idea, consult with our engineers to bring it to life.

Modeled precisely

Our engineers will use CAD software to create a precise model of your assembly, all according to your needs and specifications.

Built by professionals

Your custom assembly will be built in our state-of-the-art facilities by Swagelok Certified professionals.

Warrantied and delivered

Your custom assembly will be covered by the Swagelok Limited Lifetime Warranty and delivered to you leak-free and ready to be installed.

Engineered to work for you - from concept, to completion.

Our custom solutions department was created to provide assemblies built to your individual specifications. Our knowledgeable sales force and capable engineers, working closely with you, can turn your ideas into reality.

Whatever your problem may be, we can provide the solution. From grab sample panels to regulators, the only limit is your imagination. We will work with you to determine what assembly is most appropriate for your needs, then design it to your exact specifications - from concept, to completion.

"I couldn't ask for a better group to work with than the Custom Solutions team. Everyone there knows the product lines and is professional, yet very personable. I continually come to them with unorthodox projects at the eleventh hour, and they have helped me reach my project goals every time!"
