

Swagelok® Hose Advisory Services

Engineered to take the pressure off of you.

Unplanned downtime.

Repeated hose
replacement

Wasted product.

Safety incidents.

Failed hose assemblies require time and resources you just don't have. It's better to be prepared by taking a preventative approach. Let Swagelok Hose Advisory Services help.

Our highly experienced advisor walks the floor with you to fully understand your operation and then provides an expert assessment of problem areas. From here, we make recommendations on best maintenance practices and schedules, along with unlocking other areas for improvement that can make an impact on your facility's profitability.

From reduced maintenance costs and extended hose life cycles to improved safety, we're here to take the pressure off of you.

Swagelok®

The Swagelok Hose Advisory Services program can help you:

Drive Facility Efficiencies

Save time and resources while being able to focus on more pressing priorities.

Reduce Plant Maintenance Costs

Prevent costs associated with continuously replacing the same problem hoses, unplanned downtime and wasted product.

Extend Hose Life

Save money with a carefully considered, warranted hose assembly, because an optimally routed hose and end connection combination will have a longer life cycle.

Master Hose Maintenance

Better predict when systems will need attention and understand what steps are necessary to keep everything running smoothly with a customized preventative maintenance schedule.

Increase Safety

Keep your plant and processes safe, predictable and dependable with leak-tight products and best practices to reduce the risk of injuries and environmental damage.

End Connection Damage

Excessive Cover Damage

Kinked

What to expect from Hose Advisory Services:

- A thorough discussion of your facility's goals
- A visual analysis of all hose systems
- A Swagelok-reviewed and approved report that details:
 - Overall findings
 - Prioritized improvement recommendations and suggestions with replacement options
 - Preventative maintenance schedules and hose inspection recommendations for your specific facility
- A hose register update with our survey findings or creation of a new database, depending on your facility's needs.
