

Swagelok®

Swagelok Nederland

Custom Solutions

Whatever your ideas are, we can help

Design & Assembly services

If you're short on manpower, Swagelok Nederland can provide an extra set of hands by fabricating your fluid system assemblies for you. We produce a professional, repeatable solution, with testing, inspection, and packaging included—all covered by Swagelok's Limited Lifetime Warranty.

We call these assemblies Swagelok® Custom Solutions. Custom Solutions can be small or large assemblies, consisting of a few components, a complete panel or enclosure.

They are built with Swagelok's own high-quality fluid system components, but we can also incorporate wiring, automation, transmitters, relays, pumps, and more.

Why choose Custom Solutions?

- Cut down design and engineering time
- Increase safety and reliability
- Full factory support
- Optional special cleaning and leak testing
- Documentation and certification
- Less Installation time
- Increase labor efficiency
- Reduce leakage and costly re-work
- Improve start-up and production time
- Factory certified assembly training
- Save time sourcing parts
- Decrease receiving time and inventory costs
- Reduce purchase orders
- Just in time delivery through stocking programs

What ever your ideas are, we can help....

Capabilities

- Global Technical Support
- Tube Bending
- Orbital Welding
- Relief Valves Setting
- Pre-swaging
- Hose Assembly
- Material Traceability
- Multiple Cleanliness Levels
- Thread Taper
- Electronical Wiring

Custom Solutions

We build custom assemblies to meet specifications for many industries. You will find no higher quality or expertise anywhere.

All assemblies:

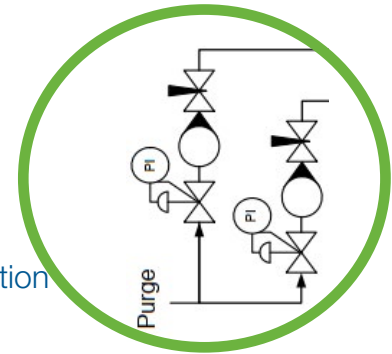

- Use only high-quality components
- Are built by Swagelok-certified assemblers
- Are backed by the Swagelok Limited Lifetime Warranty
- Are pressure- and/or leak-tested

From quote to delivery, we can also provide the detailed support you need, including CAD drawings, piping and instrumentation diagrams (P&ID) and a bill of materials.

From your idea.... to your solutions

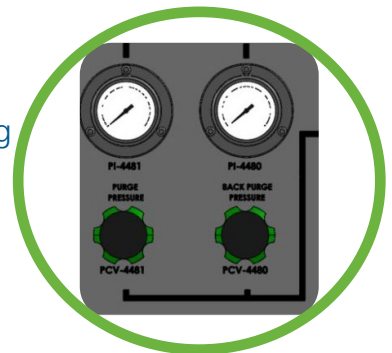

1. Idea

- Design review
- Drawing & Part number identification
- Set expectations

2. Design

- 3D CAD modeling (Solid works)
- Concept drawing
- Quote

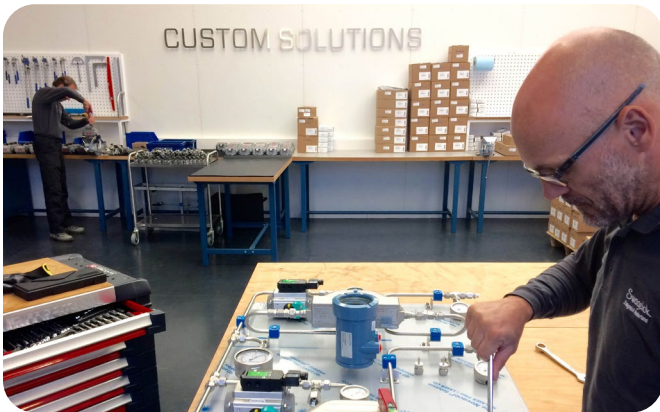

3. Solution

- Build assembly
- Testing
- Packaging and shipping
