

The Swagelok Tube Fitting Advantage

No other global tube fitting manufacturer matches the Proprietary Design Standard, Raw Material Quality and Control, and Manufacturing Excellence delivered within each and every Swagelok Tube Fitting.

Swagelok tube fittings provide unparalleled corrosion cracking resistance and the lowest rate of leakage in the global fluid-handling industry.

- Proven, Proprietary Two-Ferrule Design
- Superior Raw Materials and Metallurgical Chemistry
- Unrivaled Manufacturing Workforce, Processes, and Quality Control

There is NO worldwide fitting design standard!

“The NRC and licensees have noted other problems with the installation of compression fittings, including interchanging hardware from different manufacturers.”

-- United States Nuclear Regulatory Commission

“We do not concur with the interchanging of [fitting] parts as a matter of good order and Engineering practice.”

-- Det Norske Veritas (DNV, Norway)

“It is not permissible to interchange sub-components of different designs or types of fittings.”

-- Health and Safety Executive
(Loss of Containment Manual, United Kingdom)

Swagelok®

*There is a difference:
Not all tube fittings – and tube-fitting companies – are the same.*
