

Swagelok Pittsburgh | Tri-State Area offers a uniquely powerful portfolio of value-added

## Strategic Services

that supports and supplements our sales of unparalleled, leak-tight Swagelok componentry...

## LEARN

how to safely and properly pull up tube fittings and bend tubing of various materials.

Our cost-effective, comprehensive one-day Swagelok Tube Fitting Installation and Tube Bending Safety Essentials course, available at your location or at our Pittsburgh Training Center, ensures that your technicians – new hires as well as experienced personnel – graduate knowing how to safely and confidently build and implement a fluid system. We supply all consumables and manuals – students simply need to show up at the designated time and place!

## DISCOVER

where, why, and how leaking system connections are endangering your workers and negatively impacting your overall profitability.

Our certified Energy-Loss and Hose Advisors will walk with you through your facility to identify major areas of inefficiency. Our leave-behind report not only shows your problem connections but also details our expert repair/replace recommendations.

## FORTIFY

your production capacity: When manpower is short and deadlines are tight, our Design and Build experts can help you get more out the door faster to meet customer demand and improve your Bottom Line health.

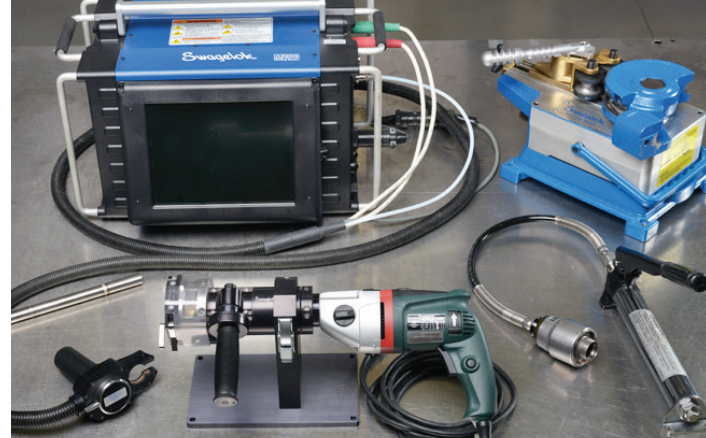

Our Swagelok-trained-and-certified technicians are ready and waiting to provide a helping hand: OEM subassemblies, simple and complex assemblies, enclosures, skids... We can also assist with P&IDs and CAD work, helium leak testing, hose assembly and testing, basic to highly complex tube bending, orbital welding, coiling, and much more.

## SAVE

valuable operating capital by leasing genuine Swagelok Tools for short-term or infrequent project work.

Our always-available inventory of premium rental equipment includes manual and electric benchtop benders, orbital welders (with heads and other accessories), and multi-head hydraulic swaging units (<1" and >1"). We loan by the day, week, month, or entire project length.

## REALIZE

an entirely new level of accountability, visibility, and security around your Swagelok product spend.

Our RoboCrib® industrial vending dispensers give you complete insight into your Swagelok tube fittings, valves, gauges, and hoses investments. Generate reports – hourly, daily, weekly – that tell you exactly who's using which components for which jobs. Eliminate workspace clutter and inventory uncertainties with these access-controlled, space-saving units!

Swagelok Pittsburgh | Tri-State Area: Your local Swagelok Fluid-Systems Solutions Provider – of Swagelok Products, Application Expertise, and Strategic Support Services.
