

Promise.

Swagelok® Tube Fittings can make your workers and workplace safer, more productive, and more efficient.

Delivered.

For almost 75 years – no matter how challenging your application or operating environment – our uniquely designed, ultra-reliable, leak-tight, and easy-to-install-and-maintain performers have been the global standard for premium fluid-system quality.

Join us on Wednesday, June 16, 10am, to learn more about the Swagelok Tube Fitting Advantage and how we can help you realize a healthier Bottom Line:

Your Presenter:

Andy Wright,
Direct Sales Representative

When: June 16, 2021,
10am – 10:30am

Format: Microsoft Teams event

RSVP to attend our FREE Webinar

Reduce Leakage. Increase Profits.

LOST FLUID

millions of litres are wasted each year
(1 gallon of hydraulic fluid ≈ \$14 USD)

LOST PRODUCTION

especially important in offshore oil where laws already limit production to a specific number of days per month

EQUIPMENT DAMAGE

loss of lubrication can lead to premature wear/machine failure

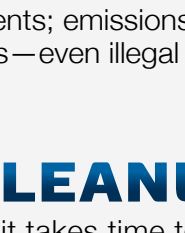

OFF-SPECIFICATION PRODUCT

can be produced inadvertently due to improperly calibrated or operating instruments; material must be reworked, sold at reduced price, or disposed of

DEGRADED WORK ENVIRONMENT

oil drippage can cause accidents; emissions can be expensive, dangerous—even illegal

FINES FOR NONCOMPLIANCE

systems and equipment that violate validated processes can quickly become costly

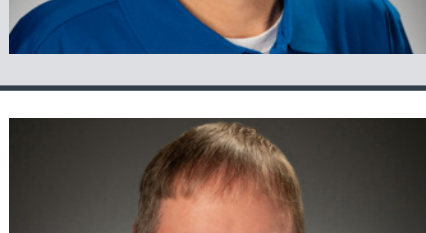

CLEANUP

it takes time to locate and repair leaks; some call for special teams to manage toxic chemicals; there's also the cost of shutting down a system to thoroughly clean it

And stay tuned for our upcoming webinars:

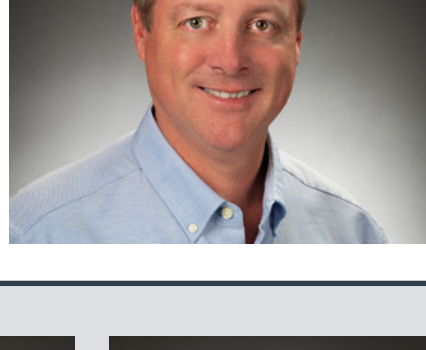

7.15 Gauges and Preventing Failures

Scott Banfield,
Field Sales Representative

8.25 Valve Selection and Safety

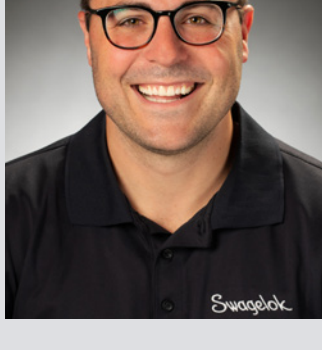

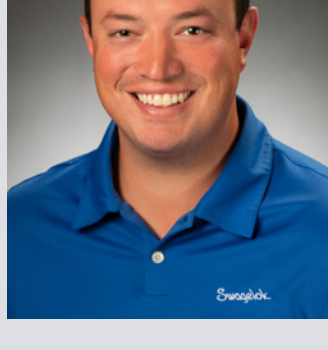

Bob Sarber,
Sales Engineer

9.14 Tube vs Pipe vs Vibration
