

Delivering premium-quality fluid system products, fully engineered assemblies, and comprehensive application expertise to optimize safety, productivity, efficiency, and profitability in even the most challenging **Chemical** and **Refining** operations.

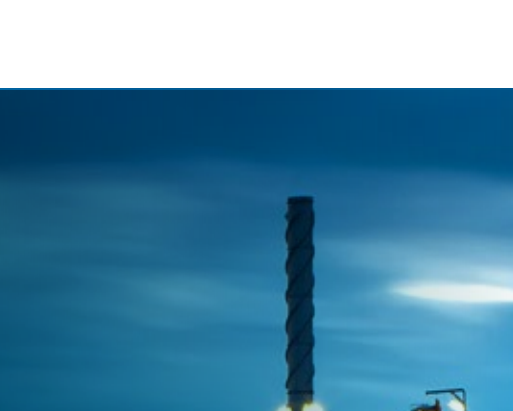

CHEMICAL BALANCE

Across your wide array of application and operational challenges, Swagelok trusted and proven Product and Services Solutions will help keep your fluid systems running safely, reliably, sustainably, and cost-effectively.

You have hazardous, highly volatile media flowing throughout your plant.

Consider Swagelok:

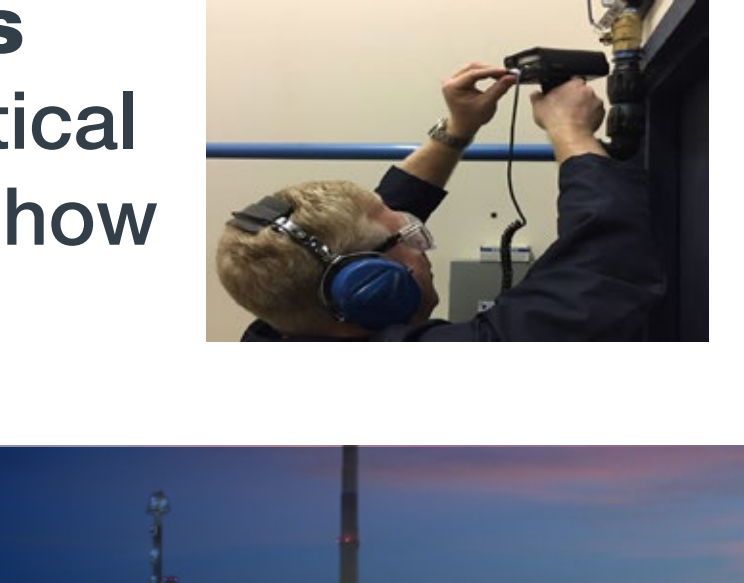

- Premium-quality, leak-tight **components**
- Custom **assemblies** with minimal connection points
- Expert **consultation** on overall optimized system design
- **Safety Essentials training** to know how to install, use, and maintain a fluid system

You need to ensure that your processes and sampling equipment stay profitable.

Consider Swagelok:

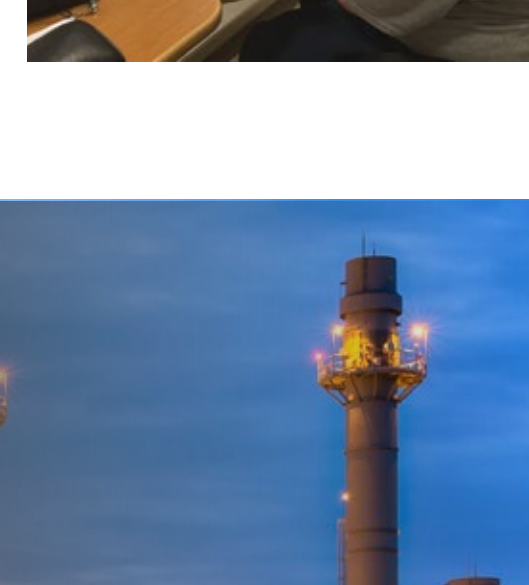

- Renowned **recommendations** on material compatibility
- **Mechanical Seal Support Systems** built according to API plans
- **Small-Bore Tubing Systems** with far fewer connections and maintenance versus piping
- **Media-loss audits** that will identify critical problem areas and how to repair them

You need to reduce harmful emissions to meet environmental, social, governance, or financial goals.

Consider Swagelok:

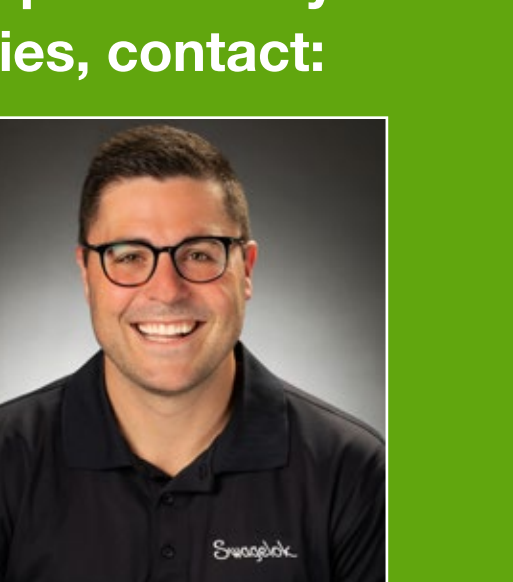

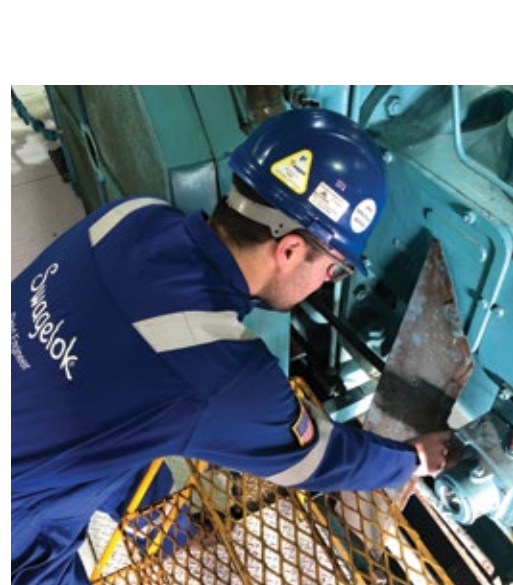

- **Field Engineering** know-how for spot-on product selection per application
- Locally built **Closed-Loop Grab Sample Panels** that minimize fluid-escape risks
- Premium-quality, leak-tight **valves, tube fittings, gauges, hoses, tubing**, and more
- **Fitting Installation & Tube Bending Safety Essentials training** so your fluid systems are safely and properly constructed each time, every time

You simply need to do more with less resources and budget.

Consider Swagelok:

- Local **Custom Fabrication Services**, with all such work fully warrantied by Swagelok Company
- Local **Fluid System Advisors** who can work closely with you during your design phase and help monitor system performance once installed
- Local **Sampling System Specialists** who can conduct an in-depth analysis of your current systems, tap to analyzer
- Local **Gas Distribution Advisors** who can ensure that your gases are being efficiently handled throughout your facilities

For more information on Swagelok Products and Services for substantially improved safety and productivity in the Chemical and Refining industries, contact:
