

Hose 101: The What, the Why, the When – and the Where

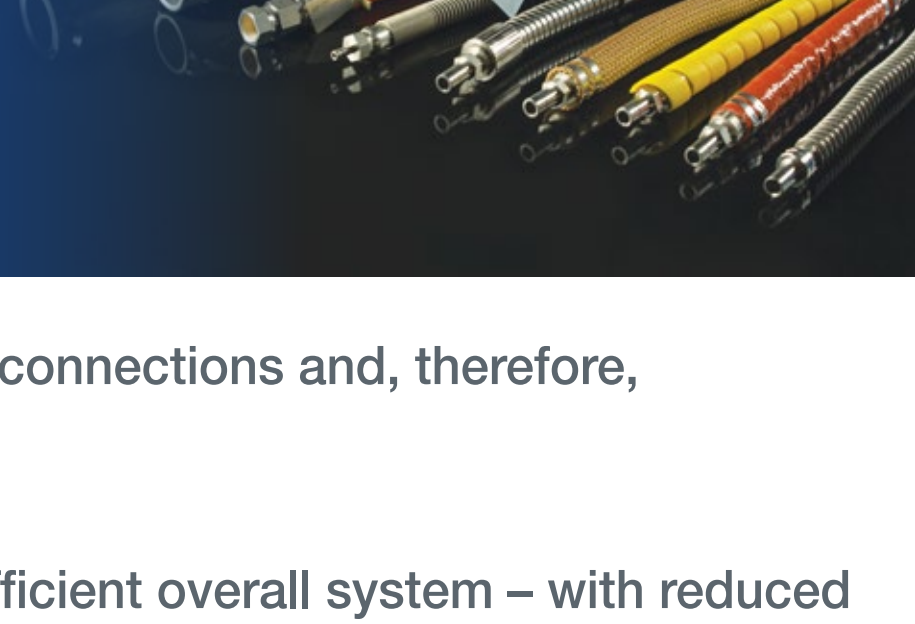

No matter what your industry or application challenges, Swagelok premium-quality Industrial Hoses and End Connections will deliver the ultra-reliable, leak-tight performance you've come to expect from the world leader in trusted fluid-system componentry.

The What

Swagelok Pittsburgh | Tri-State Area, your local and proven Swagelok product and supplemental services supplier since 1965, stocks a vast array of Swagelok hoses, in 1/8" to 2" diameters, with working pressures up to 6000 psig, and in temperatures ranges from -325° to 1000° – with All-Metal, Fluoropolymer, PFA, Vinyl, Nylon, Polyethylene, and Rubber cores.

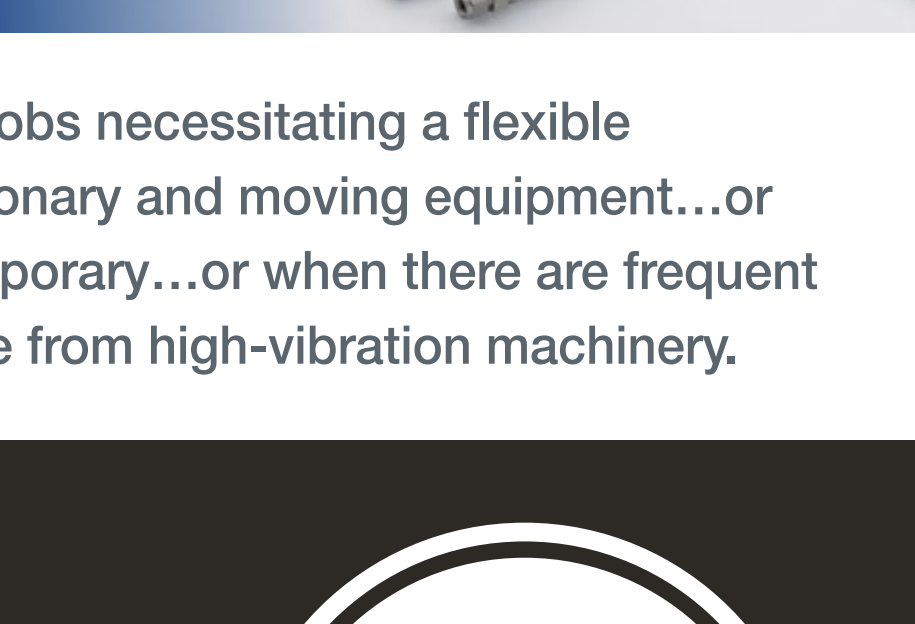

Plus, our Swagelok-trained-and-certified fabrication technicians will build your hose to exact specifications the first time and every time – with all such work fully warranted by Swagelok Company.

The Why

Flexible Hose means few connections and, therefore, less potential for leakage.

Result: a far safer and efficient overall system – with reduced inventory and labor costs, virtually no media entrapment or pressure drop, and easy cleaning, when required.

The When

Flexible Hose is ideal on jobs necessitating a flexible connection between stationary and moving equipment...or when a connection is temporary...or when there are frequent disconnects...or to isolate from high-vibration machinery.

Swagelok hose can boost your productivity in these critical market applications:

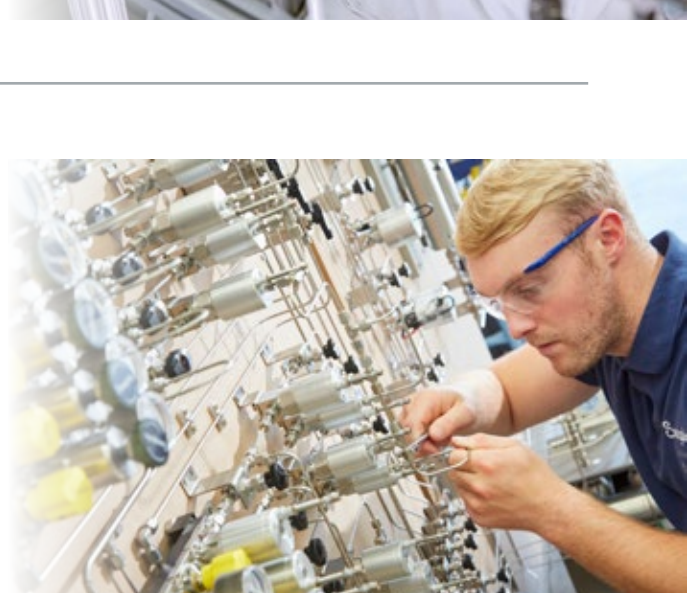

CHEMICAL/PETROCHEMICAL

- Instrumentation lines for labs and testing
- Transfer lines for chemicals; corrosives and dyes
- Water and polymer lines for cleaning heat-exchanger piping

GENERAL INDUSTRIAL

- High-pressure hydraulic lines
- Solvent recovery
- Water cooling lines inside a vacuum chamber

RESEARCH & DEVELOPMENT

- Labs
- University research

INSTRUMENTATION

- High-pressure analytical sampling
- High-pressure bottle gas
- General instrumentation

OIL & GAS

- Engine lines for portable generators, pumps, and compressors
- Fuel or gas lines
- Instrument air
- Gas transfer lines
- Hydraulic lines

POWER

- Boilers; boiler feed water lube oil systems
- Compressed air
- Exhaust lines

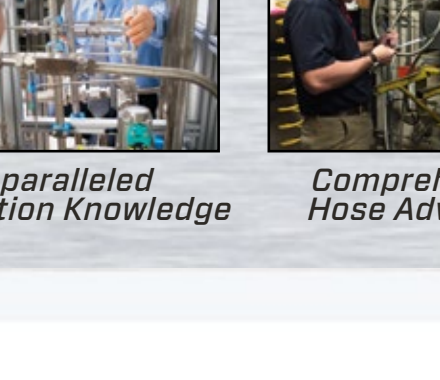

POWER PLANTS

- Burner injection
- Engine lines
- Fuel oil, air, water, and coolant lines
- Scrubber lines
