custom-designed-
and-built assemblies**=** proven and perfect complements to help
you achieve your **Net Zero** Greenhouse Gas
emissions reduction/removal goals.

GRAB SAMPLING PANELS

Swagelok Grab Sampling Systems

enable ultra-safe, highly
efficient/effective capture of
liquid or gas samples from
a pipeline, tank, or system
process for transportation
to a laboratory for analysis.
Chemical composition is
pristinely maintained.

Standard Liquid Sampler without Purge

- Provides a sample that's fresh and extracted and held under the same process conditions that existed at the sample time (except temperature)
- Sampling vessel is docked in place, process fluid circulates continuously through it
- Employs a pressure-containing metal cylinder
- No waiting for lines to flush or bottles to fill

Swagelok's unique Geared Valve Assembly...

- ...features an **error-proof design** that simultaneously actuates your 2-way or 3-way valves to prevent accidental emissions or unwanted purge gas into your process
- ...incorporates Swagelok 40-Series, third-party **certified Low-E valves**
- ...means **safe and simple operation**: just one valve handle to actuate to perform a full sampling cycle

Standard Liquid Tank Sampler

- Eliminates the risk of spillage or evaporation during sample draw and transport
- Inspector gets immediate visual feedback around sample stream quality
- Employs a cost-effective, non-pressure-containing glass or polyethylene bottle with a self-sealing septum cap
- A switching valve facilitates flow direction
