

## Know Our **Whole** HOSE STORY

- Vast Selection and Inventory
- Unparalleled Application Expertise and Support
- Comprehensive Training

### Swagelok Pittsburgh | Tri-State Area is your local, proven, and trusted resource for genuine Swagelok Industrial Hose.

So, when you want premium leak-tight performance in applications involving connections between stationary and moving equipment, connections that are temporary or require frequent disconnects, or to simply isolate from high-vibration machinery,

**CALL 412.761.3212**

## We offer **FIVE** Core Hose types

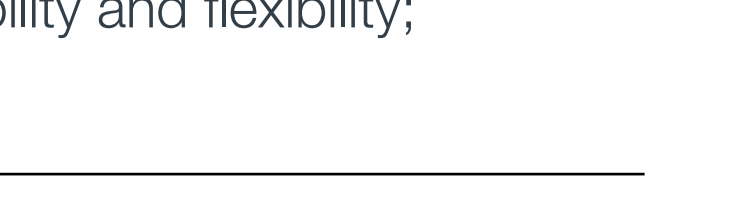

### All-Metal

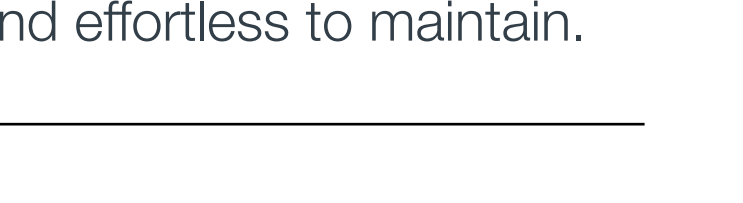

Exceptional permeation and absorption resistance, in the industry's widest temperature range.

### Fluoropolymer

Outstanding chemical compatibility and flexibility; easy to clean.

### Silicone

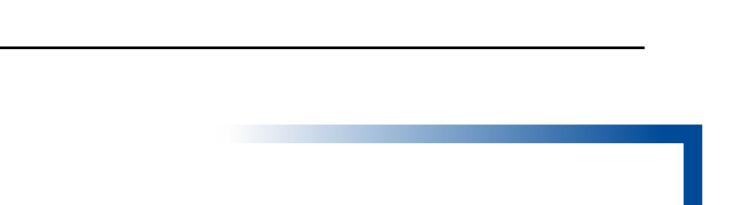

Extremely absorptive, flexible, and effortless to maintain.

### Thermoplastic/Nylon

Perfectly suited for hydraulic fluids.

### Rubber

Not only economical, but highly durable as well.

All these styles come with your choice of 11 End Connections, including Swagelok Tube Stub Adapters that enable you to adapt the same hose for multiple applications, while solving tricky alignment issues, too. In addition, we provide 6 Cover options – for ultimate protection in the most challenging operating conditions – and 4 Tag electives – to clearly identify part number, manufacture date, trace ID number, system media, operating pressure, and temperature.

## We offer Swagelok-certified Hose Advisories:

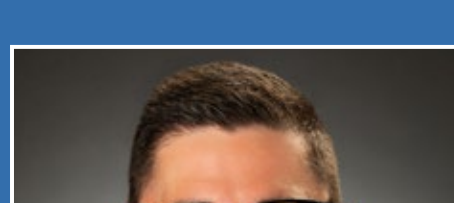

Our two Swagelok Hose Advisors will walk the floor with you to thoroughly analyze your current Hose applications and sizing/storage/cleaning/routing procedures and processes. They'll next issue you an extensive report that will not only detail your issues, but will contain recommended actions to rapidly and efficiently improve your overall Hose-related safety and health. They'll even help you set up a routine maintenance schedule, so you can avoid costly downtime, waste, and repairs.

**Mike Gagel**  
Strategic Services Specialist

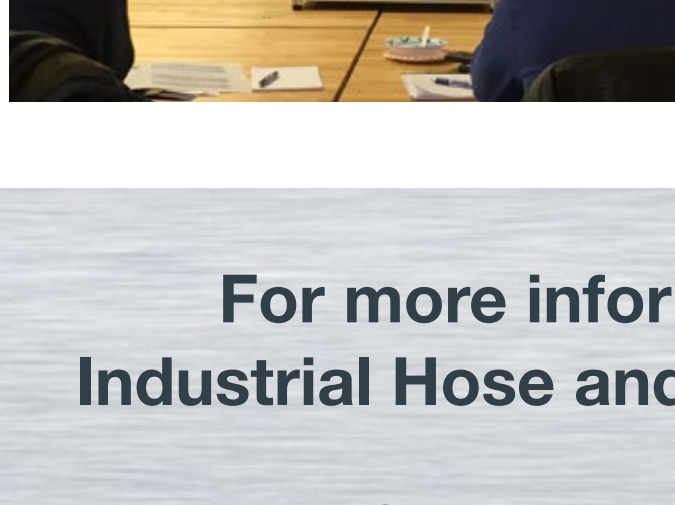

### During their survey, Mike and Gary will look for, evaluate, and document:

- Broken Wires
- Abrasion
- Corrosion
- Ovality
- Motion
- Color Changes
- Cover Blisters
- Kinks/Flat Spots
- Leakage
- Improper Sizing
- Damaged Reinforcements
- Correct Type for Application
- Operating Conditions: Flow, Pressure, Temperature...
- Environmental Factors: Temperature, Humidity...
- Stiffness/Hardness
- Cleaning & Storage Practices
- ...and so much more!
