

Summer SCHOOL

starts soon!

Be safer. Be more productive, efficient, and profitable. **Be proactive and schedule your maintenance technicians** – new hires as well as experienced workers – for our renowned, one-day **Swagelok Tube Fitting Installation & Tube Bending Safety Essentials** class...at your facility or our leading-edge Training Center in Pittsburgh.

All our Swagelok courses deliver an unparalleled depth of timely, trusted, and expert content – supplemented with lengthy hands-on practice – to help you significantly reduce installation errors,

excessive repair downtime and labor, and overall operating expenses, especially in the most challenging fluid-system applications and operating conditions.

In addition to the aforementioned title, WE OFFER:

- ◆ **Advanced Tube Bending: 3.5 days**
- ◆ **Hose Selection/Routing/Sizing/Storage Essentials: ½ day**
- ◆ **Valve Selection/Maintenance Essentials: ½ day**

We supply ALL materials for every class we teach. Your participants simply need to get to the assigned location at the designated time. All graduates receive a genuine Swagelok Certificate of Completion that can be applied toward Continuing Education credits.

And, our training comes with a 100% money-back guarantee!

We can start/stop at your hours of convenience and even return multiple times so that you don't have to pull too many techs off the job at any one time. Plus, we are extremely flexible to help optimize your learning experience. For example, we could conduct the Hose and Valve courses the same day...with you having the option to switch out students for each session.

From our RECENT GRADS:

“Now I have the confidence to do any bending job given to me.”

“The instructor takes safety and tube bending to another level.”

“You held my interest the entire day.”

DON'T DELAY!
