e-FLASH Swagelok Pittsburgh | Tri-State Area You process fluids. We can help OPTIMIZE your fluid processes.

Swagelok

Fully configurable. Locally built and supported. Ultra-reliable performance. Swagelok Application **Solutions** deliver truly difference-making productivity and efficiency to enable you to save substantial time, money, and worry - no matter how challenging your project or operating environment.

 Offered in 8 standard Grab Swagelok Sample Module (GSM) Panel configurations that employ pressure-containing metal cylinders to provide a sample held under the same process conditions as when extracted.

easy to maintain, and available as a single part number.

without purge bypass tubes. Available in 7 standard **Liquid-Only** Sample (GSL) **Panel configurations that** use non-pressure-containing glass or polyethylene bottles to provide immediate visual quality feedback to inspector - with no spillage risk or

evaporation.

Choose from 5 standard Grab

Sample Cylinder sizes, with/

pressure of the assembly. MECHANICAL SEAL SUPPORT **SYSTEMS**

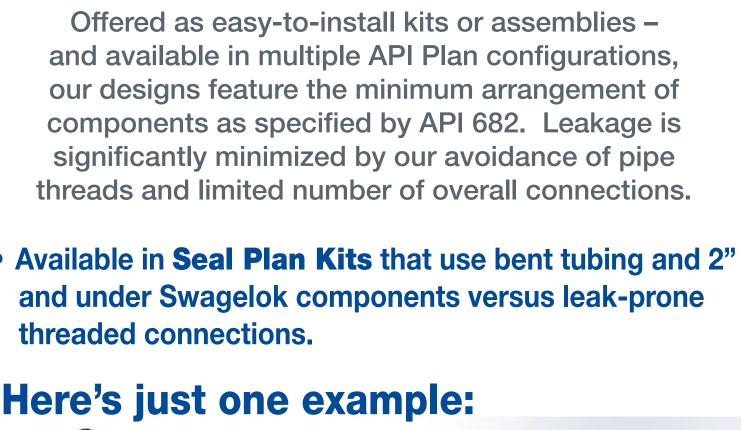

All Swagelok GSM and GSL

based on the selected gauge

panels are leak-tested

components as specified by API 682. Leakage is significantly minimized by our avoidance of pipe threads and limited number of overall connections. Available in Seal Plan Kits that use bent tubing and 2" and under Swagelok components versus leak-prone threaded connections.

Integral **Thermowell Orifice Extended** Orifice Flange Tee Male Union **Adapter** Connector HEC from this...

at the required pressure and flow rate.

For Between Seal Plans
