

On Second Thought

First, you know us for our industry-changing, premium-quality, leak-tight Tube Fittings and Componentry. **But we offer so much more** in our ongoing quest to be your truly Valued Strategic Partner – helping you conquer your most demanding application and operational challenges.

Swagelok DESIGN AND BUILD SERVICES

SAVE TIME.

SAVE MONEY.

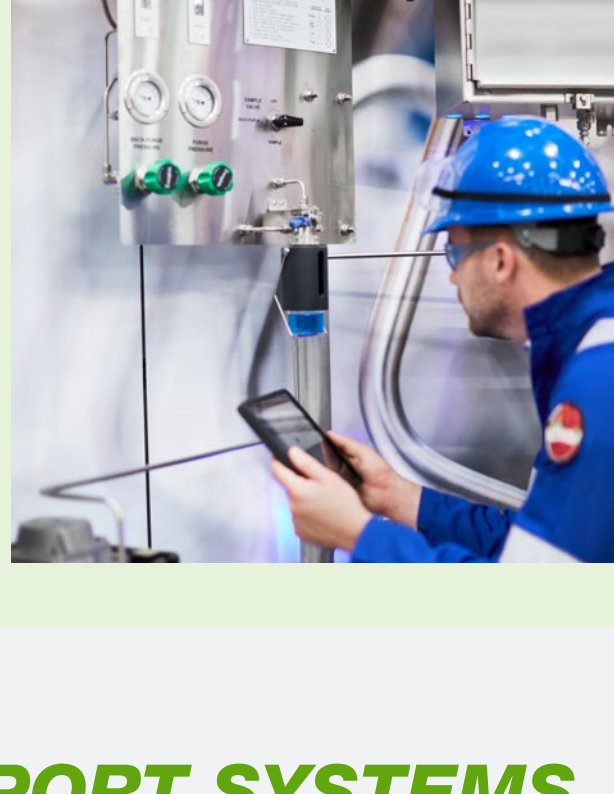

SAVE WORRY.

When you're running behind on available or skilled labor, our local Swagelok-trained-and-certified Master Technicians can professionally design and expertly fabricate reliable, repeatable, and leak-tight assemblies for you – including large, complex assemblies constructed with Swagelok components and options such as wiring, automation, transmitters, and more. Everything done to your specific parameters and needs. All such easily configurable solutions come tested, inspected, and packaged...and fully backed by the renowned Swagelok Limited Lifetime Warranty.

SWAGELOK GRAB SAMPLING SYSTEMS

Safely, efficiently, and effectively capture gas and liquid samples for transportation to a lab for analysis. Whether you require closed-loop sampling into pressure-rated cylinders OR want to collect liquids and non-volatile process fluid into glass bottles, our options are safe, intuitive, easy to maintain, and available as a single part number.

SWAGELOK MECHANICAL SEAL SUPPORT SYSTEMS

Ensure that your rotating equipment stays online and performs optimally – at less cost. We offer systems in various API plan configurations that are assembled according to exacting API Standard 682: *Pumps – Shaft Sealing Systems for Centrifugal and Rotary Pumps*.

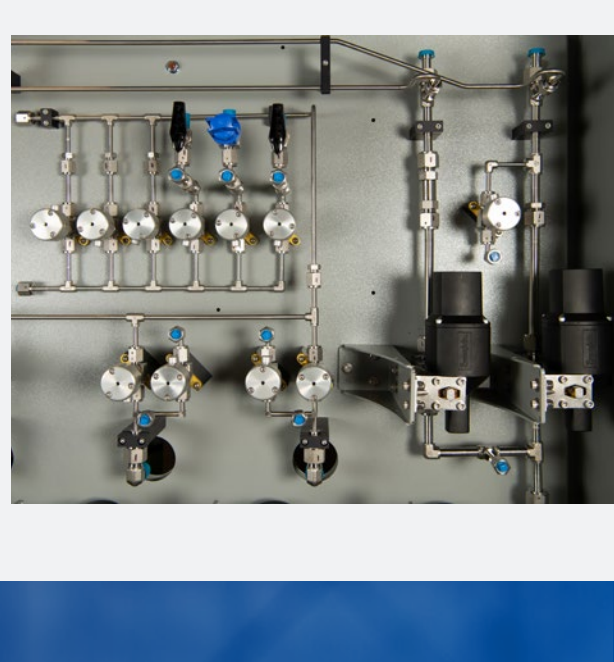

SWAGELOK GAS DISTRIBUTION SYSTEMS

Make certain that gases get to where they're supposed to go. Our standardized and customized solutions protect operators, increase uptime, and substantially improve overall process accuracy and repeatability. Swagelok modular panels are intuitively labeled and feature minimal threaded connections, drastically lessening leakage potential.

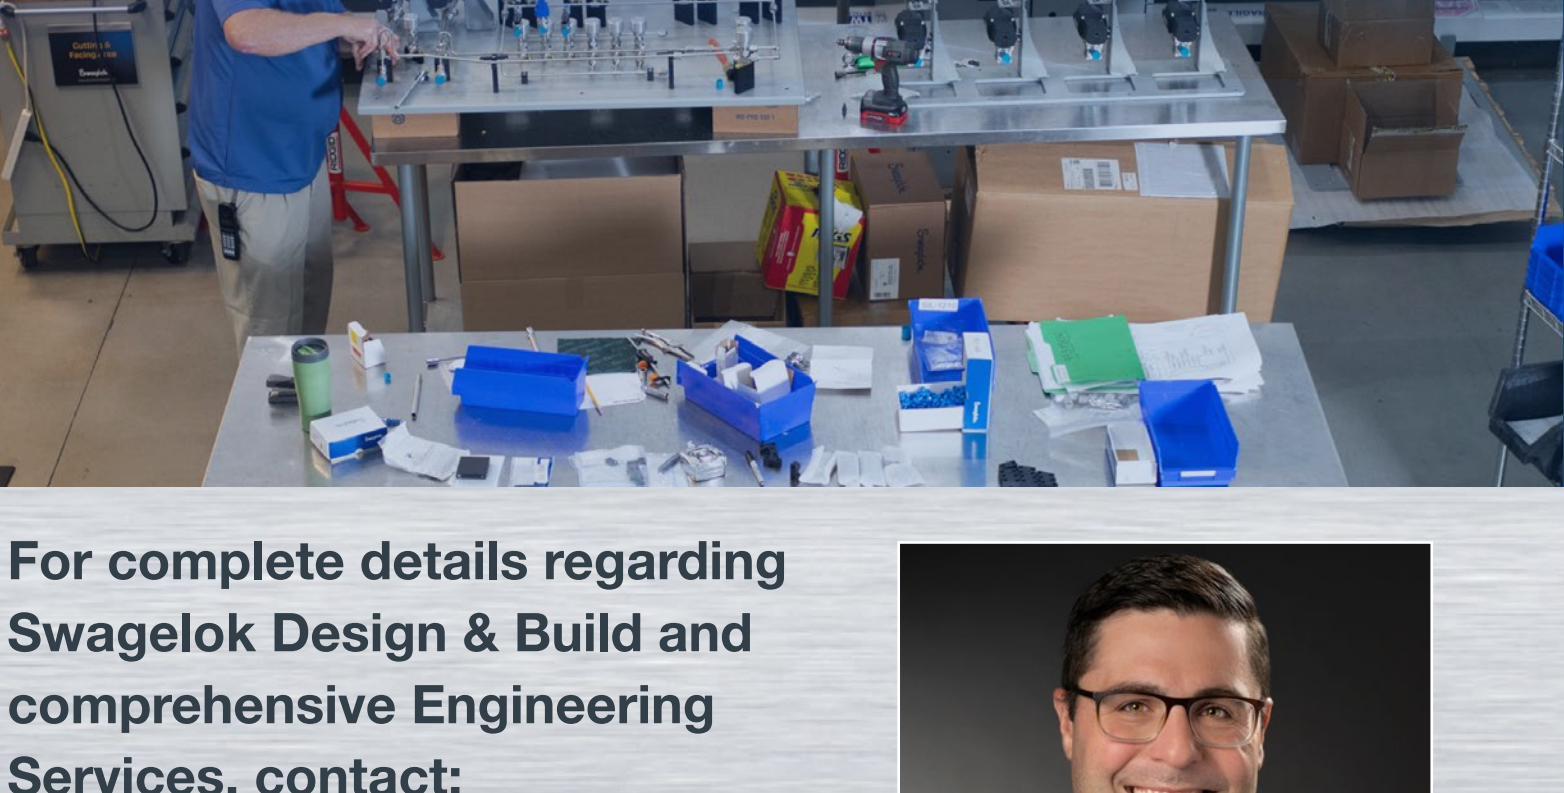

SWAGELOK ANALYTICAL SUBSYSTEMS

Compact, highly accurate, and convenient to use, our offerings minimize system footprints and promote representative samples and results. Deploy them without worrying about acquiring or assembling multiple parts.

THIS FEBRUARY...

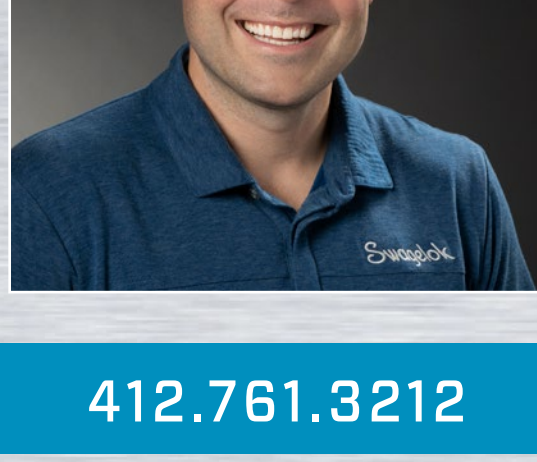

we'll share additional Swagelok capabilities that demonstrate how we not only supply you the most dependable and field-proven tooling, but can support your total fluid-handling performance and profitability objectives as well.
