## WE'RE DEDICATED TO HELPING YOU...

...save time, money, risk, and worry, especially in your most challenging Oil and Gas, Power, Chemical, Research, Clean Energy, and Steel applications.

**Our powerful portfolio of  
timely, cost-effective, warrantied  
BOTTOM LINE DIFFERENCE-MAKERS:**

## PREMIUM-QUALITY, LEAK-TIGHT COMPONENTRY

- Tube Fittings
- Packless Valves
- Measurement Devices
- Tubing, Valves, and Accessories
- Process Valves & Manifolds
- Instrumentation Valves
- Hose and Flexible Tubing
- Medium and High-Pressure Fittings

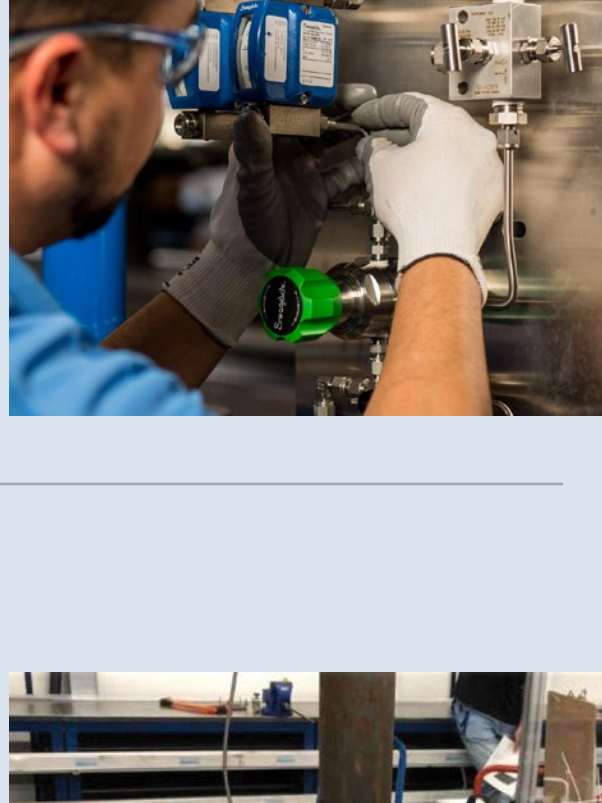

## MASTERFUL CUSTOM DESIGN AND FABRICATION

When you're running behind on available or skilled labor, our local Swagelok-trained-and-certified Master Technicians can professionally design and expertly fabricate reliable, repeatable, and leak-tight assemblies for you – including large, complex assemblies constructed with Swagelok components and options such as wiring, automation, transmitters, and more. Everything done to your specific parameters and needs. All such easily configurable solutions come tested, inspected, and packaged...and fully backed by the renowned Swagelok Limited Lifetime Warranty.

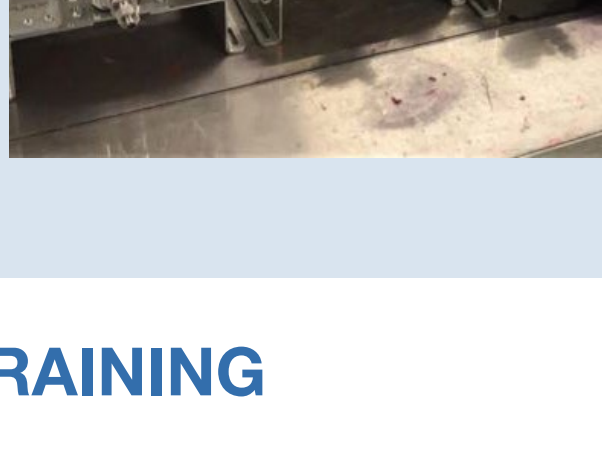

## GRAB SAMPLING SYSTEMS

Safely, efficiently, and effectively capture gas and liquid samples for transportation to a lab for analysis. Whether you require closed-loop sampling into pressure-rated cylinders OR want to collect liquids and non-volatile process fluid into glass bottles, our options are safe, intuitive, easy to maintain, and available as a single part number.

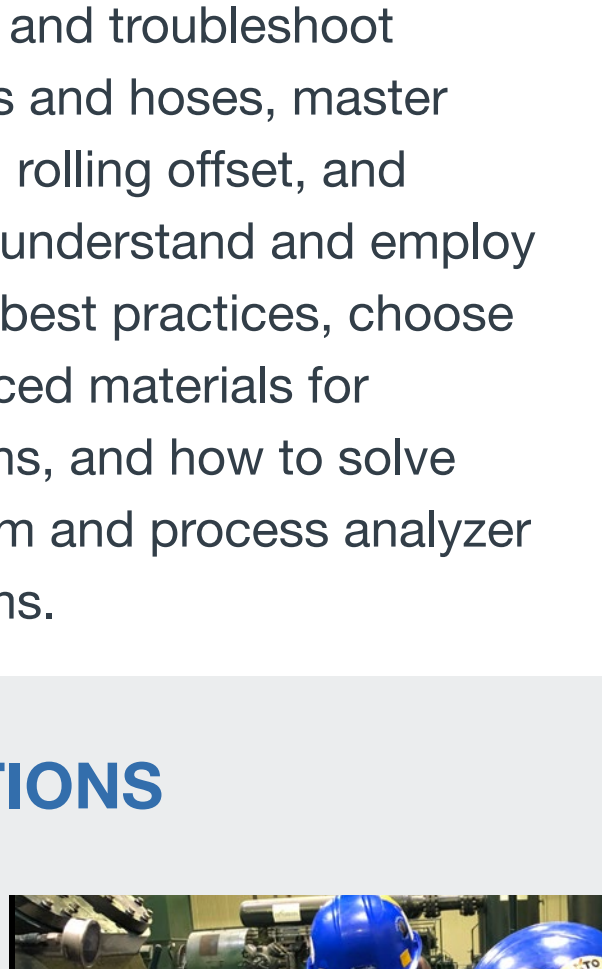

## MECHANICAL SEAL SUPPORT SYSTEMS

Ensure that your rotating equipment stays online and performs optimally – at less cost. We offer systems in various API plan configurations that are assembled according to exacting API Standard 682: *Pumps – Shaft Sealing Systems for Centrifugal and Rotary Pumps.*

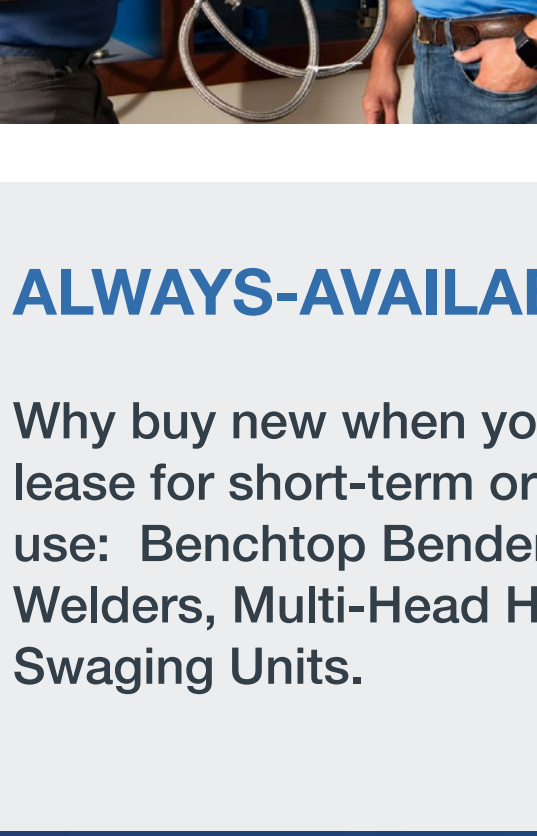

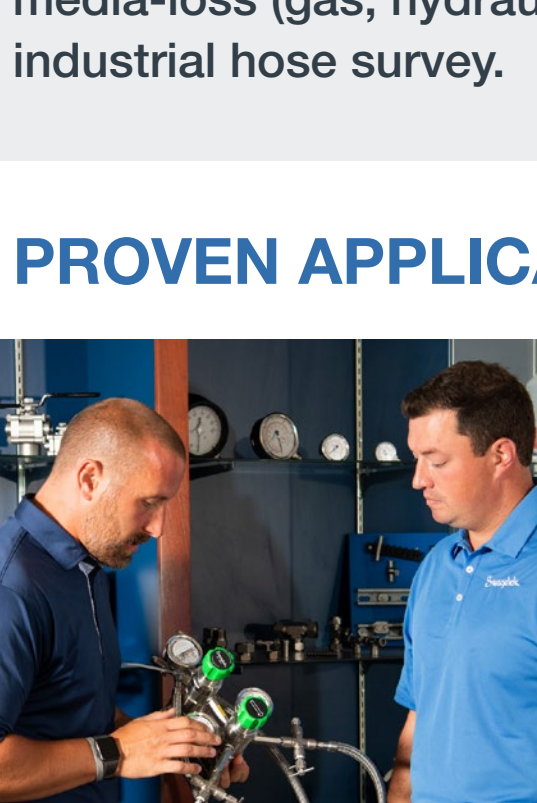

## GAS DISTRIBUTION SYSTEMS

Make certain that gases get to where they're supposed to go. Our standardized and customized solutions protect operators, increase uptime, and substantially improve overall process accuracy and repeatability. Swagelok modular panels are intuitively labeled and feature minimal threaded connections, drastically lessening leakage potential.

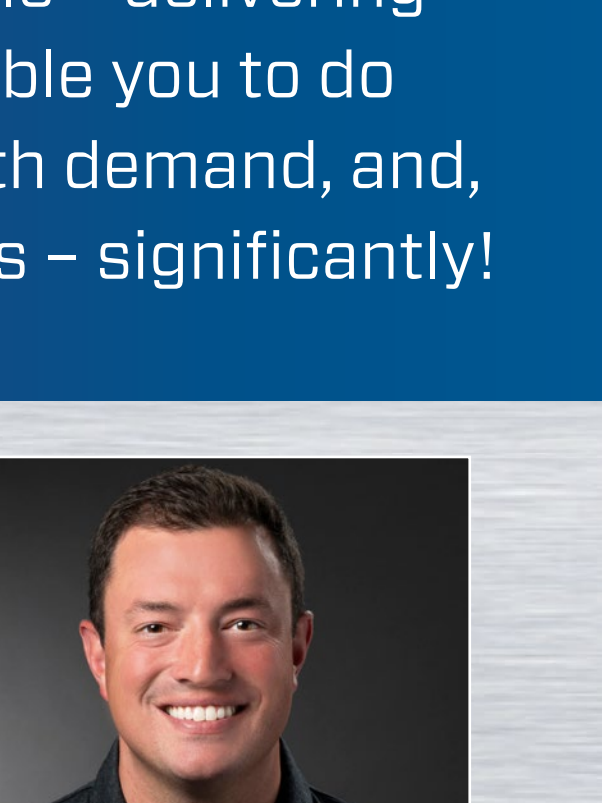

## COMPREHENSIVE SAFETY TRAINING

Learn how to safely and properly assemble a fluid system – from pulling up tube fittings to bending tubing of various diameters and materials. We also offer extensive courses to help you select and troubleshoot industrial valves and hoses, master complex offset, rolling offset, and parallel bends, understand and employ orbital welding best practices, choose the best advanced materials for your applications, and how to solve sampling system and process analyzer system problems.

## EXTENSIVE SYSTEM EVALUATIONS AND ADVISORIES

Our Swagelok-certified auditors will visit your facility to look for and report loose/leaking fitting, pipe, and valve connections, poor hose routing/sizing/cleaning/storage practices, and more. Contact us to schedule your media-loss (gas, hydraulic fluid...) or industrial hose survey.

## PROVEN APPLICATION SUPPORT

We provide first-hand advice on which Swagelok panels/assemblies, tube fittings, valves, gauges, hoses, tubing, and accessories are ideally suited for your most challenging projects. Our trained, certified, and always-friendly Direct Sales representatives will provide reliable recommendations on how you can quickly reduce downtime labor and costs.

## ALWAYS-AVAILABLE TOOL RENTALS

Why buy new when you can lease for short-term or infrequent use: Benchtop Benders, Orbital Welders, Multi-Head Hydraulic Swaging Units.

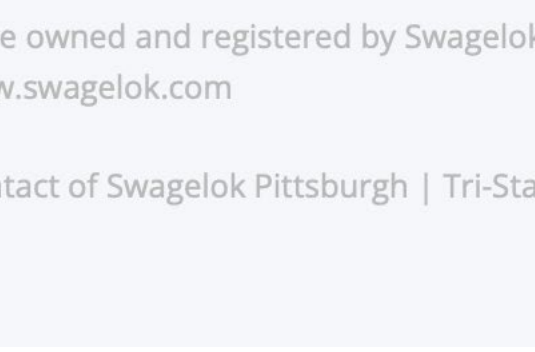

## OUR PROMISE:

We'll make you safer, more productive, more efficient, and more profitable – delivering measurable results to enable you to do more with less, keep pace with demand, and, ultimately, grow your business – significantly!
