Our Overall Capabilities

Details the full range of capabilities we provide – in addition to our vast portfolio of industry-best, leak-tight componentry. Our Strategic Support Services include: Comprehensive Safety Training, Masterful Custom Design & Build, Extensive Energy-Loss Evaluations and Industrial Hose Advisories, and Genuine Swagelok Rental Tools. We're so much more than a Swagelok products resource; we're your local Swagelok fluid-system experts!

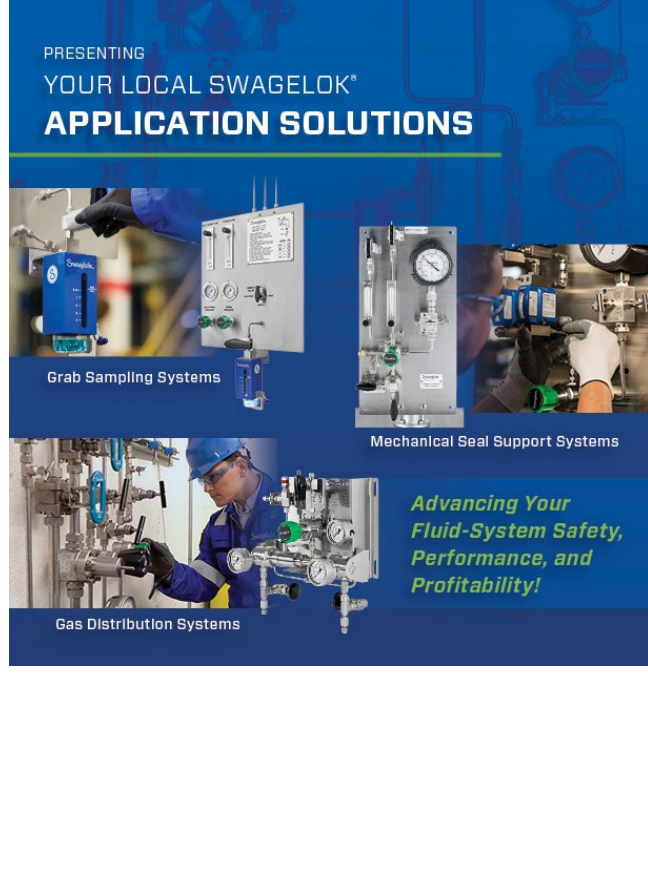

Design & Build Fabrication

Showcases our trusted and proven expertise in sub-assembly/assembly design and fabrication. We have a leading-edge working/staging shop, outfitted with a 5-ton overhead crane (with 18' clearance), and dedicated coiling, swaging, bending, orbital welding, cutting, kitting, packaging, inspection, testing, and cleaning stations. If you lack the necessary manpower or skills to complete your expanding workload, call us to help significantly reduce your time, money, and risk worries!

Training Brochure

Learn the “right” and safest ways – at your place or our 14-seat Training Center – to install and inspect tube fittings, bend tubing of various materials and diameters, use a benchtop tube bender, and understand valve and hose types, selection-per-application, and maintenance. In addition, we can facilitate your participation in Swagelok's unparalleled suite of advanced-level courses: Process Analyzer Sampling Systems, Sampling System Maintenance, Orbital Welding, Materials Science, and more!

Application Solutions

See how we can advance your overall system safety, performance, and profitability with our Grab Sample Module (with a switching valve arrangement) or Grab Sample Liquid (with sample-enhancing valve) systems, four standard Gas Distribution system panel designs that get gases where they need to go, and easy-to-install Mechanical Seal Support seal plan kits and easily configurable assemblies with no pipe threads and an absolute minimum number of connections for substantially reduced leakage. We also offer five sizes of Grab Sampling Cylinders – with or without purge bypass tubes.

Industrial Hose Brochure

Swagelok knows hose and flexible tubing: manufacture, assembly, selection-per-application (including end connections, core types, attachment methods, tagging, and covers), routing, technical consultation, installation, sizing, storage, and cleaning/maintenance. We have certified Swagelok Hose Advisors who will walk your floor with you to observe first-hand your hose-related practices and processes – before issuing you a thorough report on not just your current challenges, but how to avoid future lengthy downtime, excess waste, and high repair or replacement costs.
