

OUR PILLARS. YOUR PRODUCTIVITY.

Since the mid-1960s, Swagelok Pittsburgh | Tri-State Area has been your proven and trusted local resource for fluid-system safety and optimization – no matter your industry or how challenging your applications and operating environments.

PEOPLE

Our customer-first team includes six Engineers, led by a certified Swagelok Applications Engineer with extensive experience in Grab Sampling, Mechanical Seal Support, and Gas Distribution. We also have associates highly skilled in CAD to enable us to design and build premium-quality instrumentation panels, enclosures, skids, and subassemblies – with minimal connections to ensure a superior leak-tight performance.

In every interaction, our Internal and Field Sales Representatives will patiently and attentively listen to your pain points and project objectives to help you choose the ideal Swagelok components and accessories to significantly improve your overall productivity.

PROFICIENCIES

Whether you require a custom-built assembly or need precise orbital welds or large bent tubing, we have masterful technicians who expertly perform such tasks to your exact specifications and delivery timeframes. Plus, all our fabrication work is fully warranted by Swagelok Company.

In addition, we provide best-in-class safety training that will show you how to properly assemble a reliable fluid system, from the installation of tube fittings to the bending of tubing of various materials and diameters.

We also conduct comprehensive audits of media lines to check for leakage due to poorly constructed connections. And we don't simply identify and tag your problem areas; we give you an in-depth report of suggested repairs, by severity and urgency, to keep your workers, equipment, and site safe and efficient.

Our Swagelok Hose Advisor can provide a similar service around your industrial hose usage, sizing, routing, storage, and maintenance practices. Again, his goal is to not just locate your trouble spots, but to leave behind a detailed summary of how to quickly enhance your site's hose-involved operations.

PRODUCTS

Fittings

For unparalleled leak-tight connections between fluid-system componentry since 1947

Valves

Reliably control flow across a broad range of working pressures, temperatures, and operating conditions

Regulators

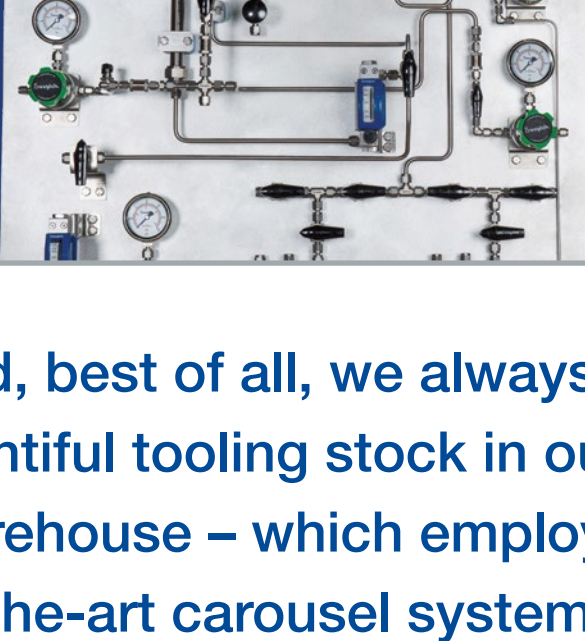

Consistently and accurately maintain pressure levels over extended operating lifespans

Hoses

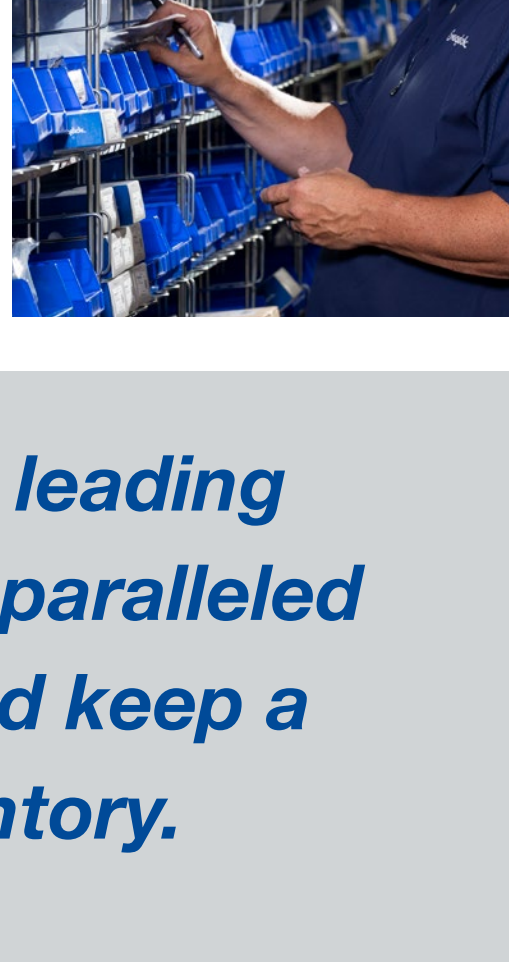

Available in a vast array of materials, pressure ratings, and flexibility degrees

Assemblies

Designed, built, and tested by Swagelok-certified engineers and technicians

And, best of all, we always carry a plentiful tooling stock in our Pittsburgh warehouse – which employs a state-of-the-art carousel system that enables us to maintain shipping accuracy of almost 100%...always getting you just what you need, right when and where you need it.

We supply the world's leading fluid-handling brand, unparalleled technical expertise, and keep a vast, close-by inventory.

Let us help you get more done, more effectively and profitably!

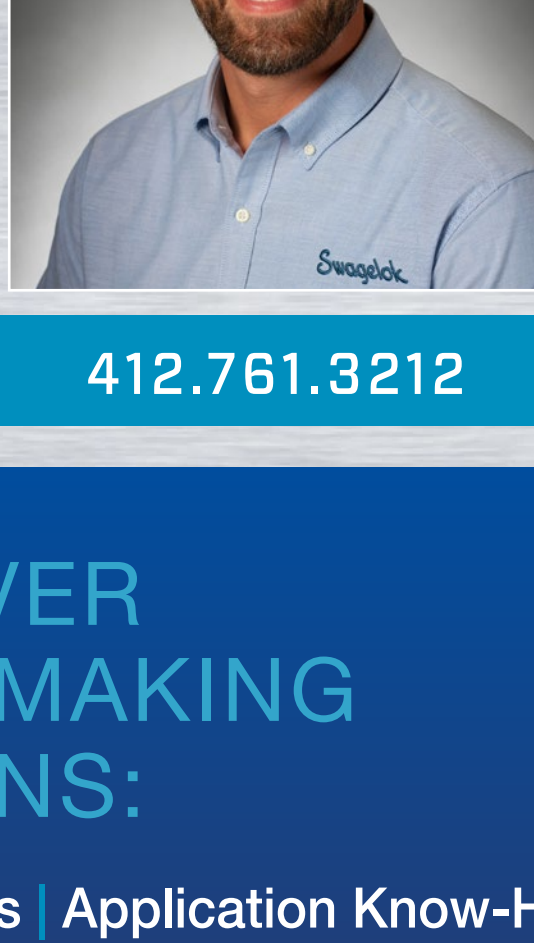

Put our team alongside yours
