

Late-Summer School

It's never too early to enroll in an August (or later) **Swagelok Safety Essentials** class –

to ensure that your Maintenance and Engineering personnel stay safe, deliver peak performance, and keep your valuable assets and site free of costly damage and lost productivity/profitability.

“The instructor made sure everyone understood the class – and that we all could properly pull up a fitting and bend tubing”

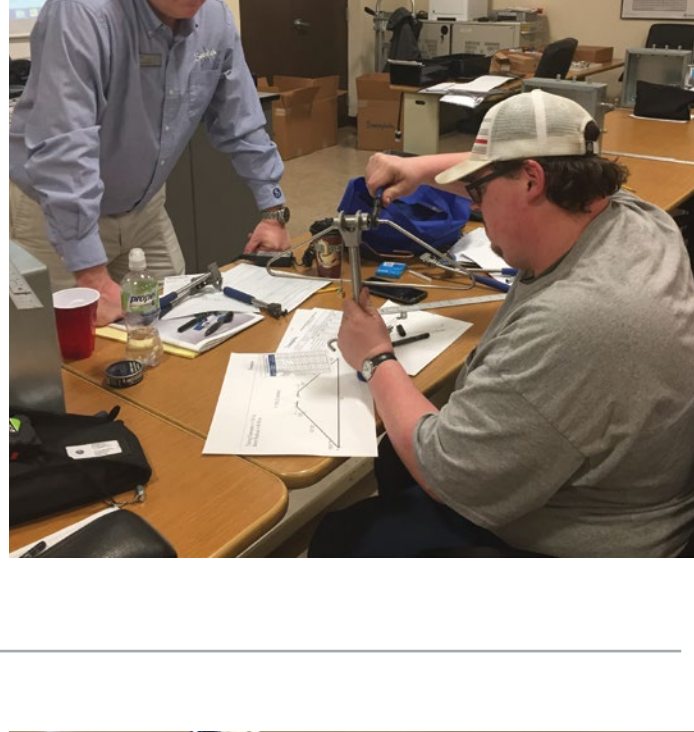

“Great class that was extremely informative but also frustrating and challenging – in a very healthy way”

“From what I learned, I'll now be able to consider many new options for installing a better fluid system”

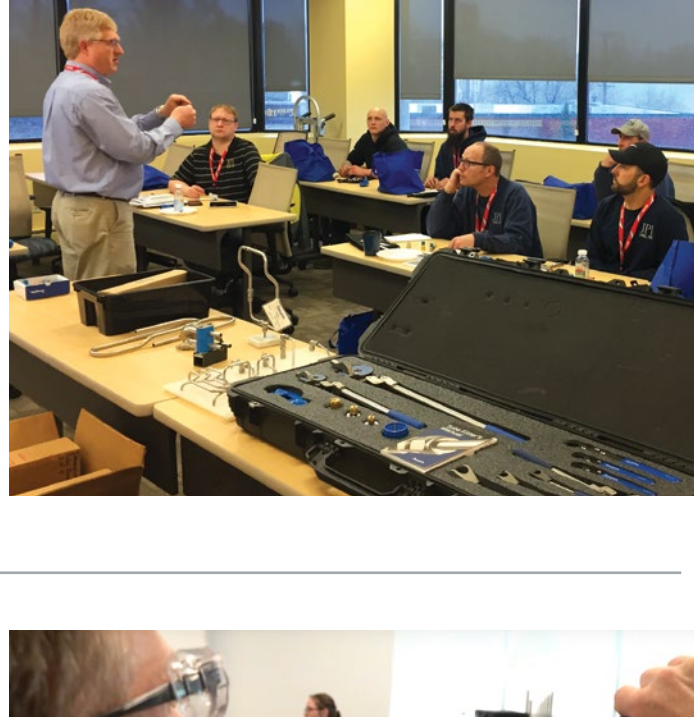

“I now know how to eliminate waste and save time while doing my job”

“No matter your level of experience working with fluid systems, this class will make you better – much better, in fact”

Our all-day, industry-leading **Swagelok Tube Fitting Installation & Tube Bending Safety Essentials** course will provide you, too, with proven and trusted insights from the global leader in premium-quality, leak-tight componentry and accessories.

Our highly hands-on customer training programs, with unparalleled depth of truly relevant content, will help you significantly reduce installation errors, excessive maintenance downtime and labor, and overall operating expenses.

You'll also learn how to select, handle, prepare, cut, and debur tubing of different materials; and make bends of 45°, 90°, 180°, and offsets.

Plus, we:

- ...supply ALL training materials
- ...bring our classes directly to your project site or facility
- ...start/stop at your hours of convenience
- ...return multiple times if your total class size exceeds 12 students
- ...offer a money-back guarantee – and lunch
- ...issue you **TWO** genuine **Swagelok Certificates of Completion** – for just one day of training

Media leakage is dangerous and expensive.

What we teach is precisely what you need to know to work smarter to make your fluid systems safer and more efficient and effective – no matter your application, operating conditions, or market.

To Register for Your Late-Summer Event, call or text 412.439.1706 today.

Hurry...our mobile schedule is filling fast!

And ask about our other renowned course titles:

- Tube Fitting Inspection
- Advanced Tube Bending
- Hose Essentials
- Valve Essentials
- Steam & Condensate Essentials
- Orbital Welding
- Process Analyzer Sampling Systems
- Analyzer Technician Essentials
- Sampling System Problem-Solving & Maintenance
- Materials Science

Put our team alongside yours

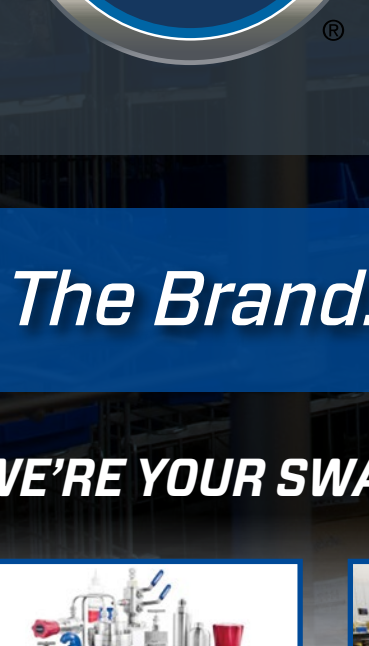

Swagelok
is Synonymous with
Safety

...and Efficiency, Productivity, and Profitability

WE DELIVER DIFFERENCE-MAKING SOLUTIONS:

Products | Strategic Support Services | Application Know-How

The Brand. The Inventory. The Expertise.

WE'RE YOUR SWAGELOK FLUID-SYSTEM SOLUTIONS PROVIDER

Industry-Best Componentry

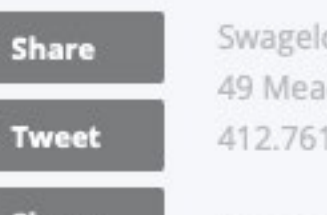

Masterful Custom Fabrication

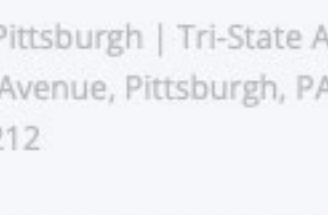

Expert Safety Training

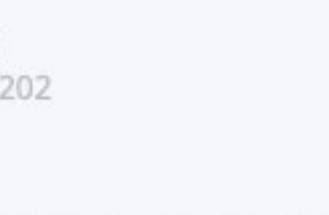

Extensive Energy Evaluations

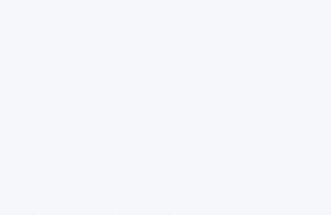

Unparalleled Application Knowledge

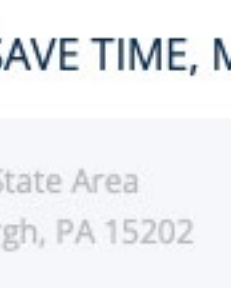

Comprehensive Hose Advisories
