

OUR PROOF IS IN OUR PANELS

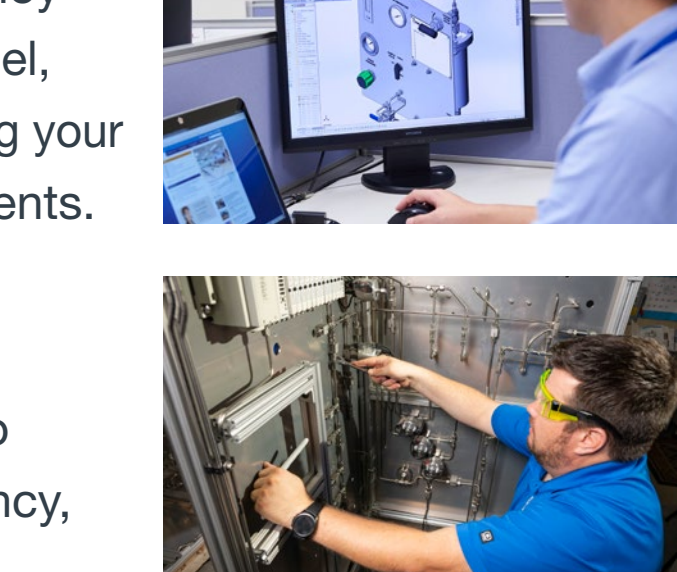

If your assemblies are taking too long, costing too much, and, perhaps, placing you at unnecessary risk, **we can help.**

Swagelok Pittsburgh | Tri-State Area is your LOCAL proven and trusted resource for leak-tight, ultimate-quality, masterfully designed and built Panels, Skids, Enclosures, and so much more.

From initial consult to final delivery, **our Fabrication process** closely involves **YOU**.

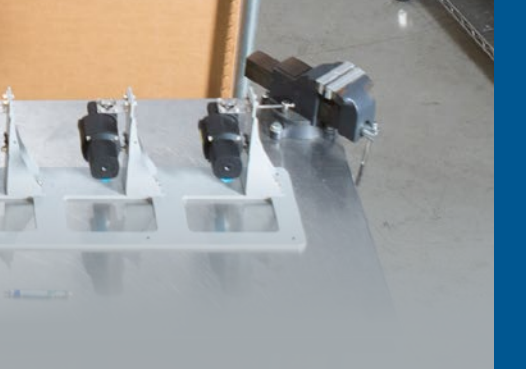

1 Once we understand your objectives and hear your ideas, we then employ our CAD software to create a model, plus a Bill of Materials, incorporating your exact specifications and requirements.

2 We next build your assembly with as few connections as possible, to ensure long-term reliability, efficiency, and performance.

3 Your assembly comes fully inspected, tested, and packaged... and as one part number to simplify reorders and overall administration on your end.

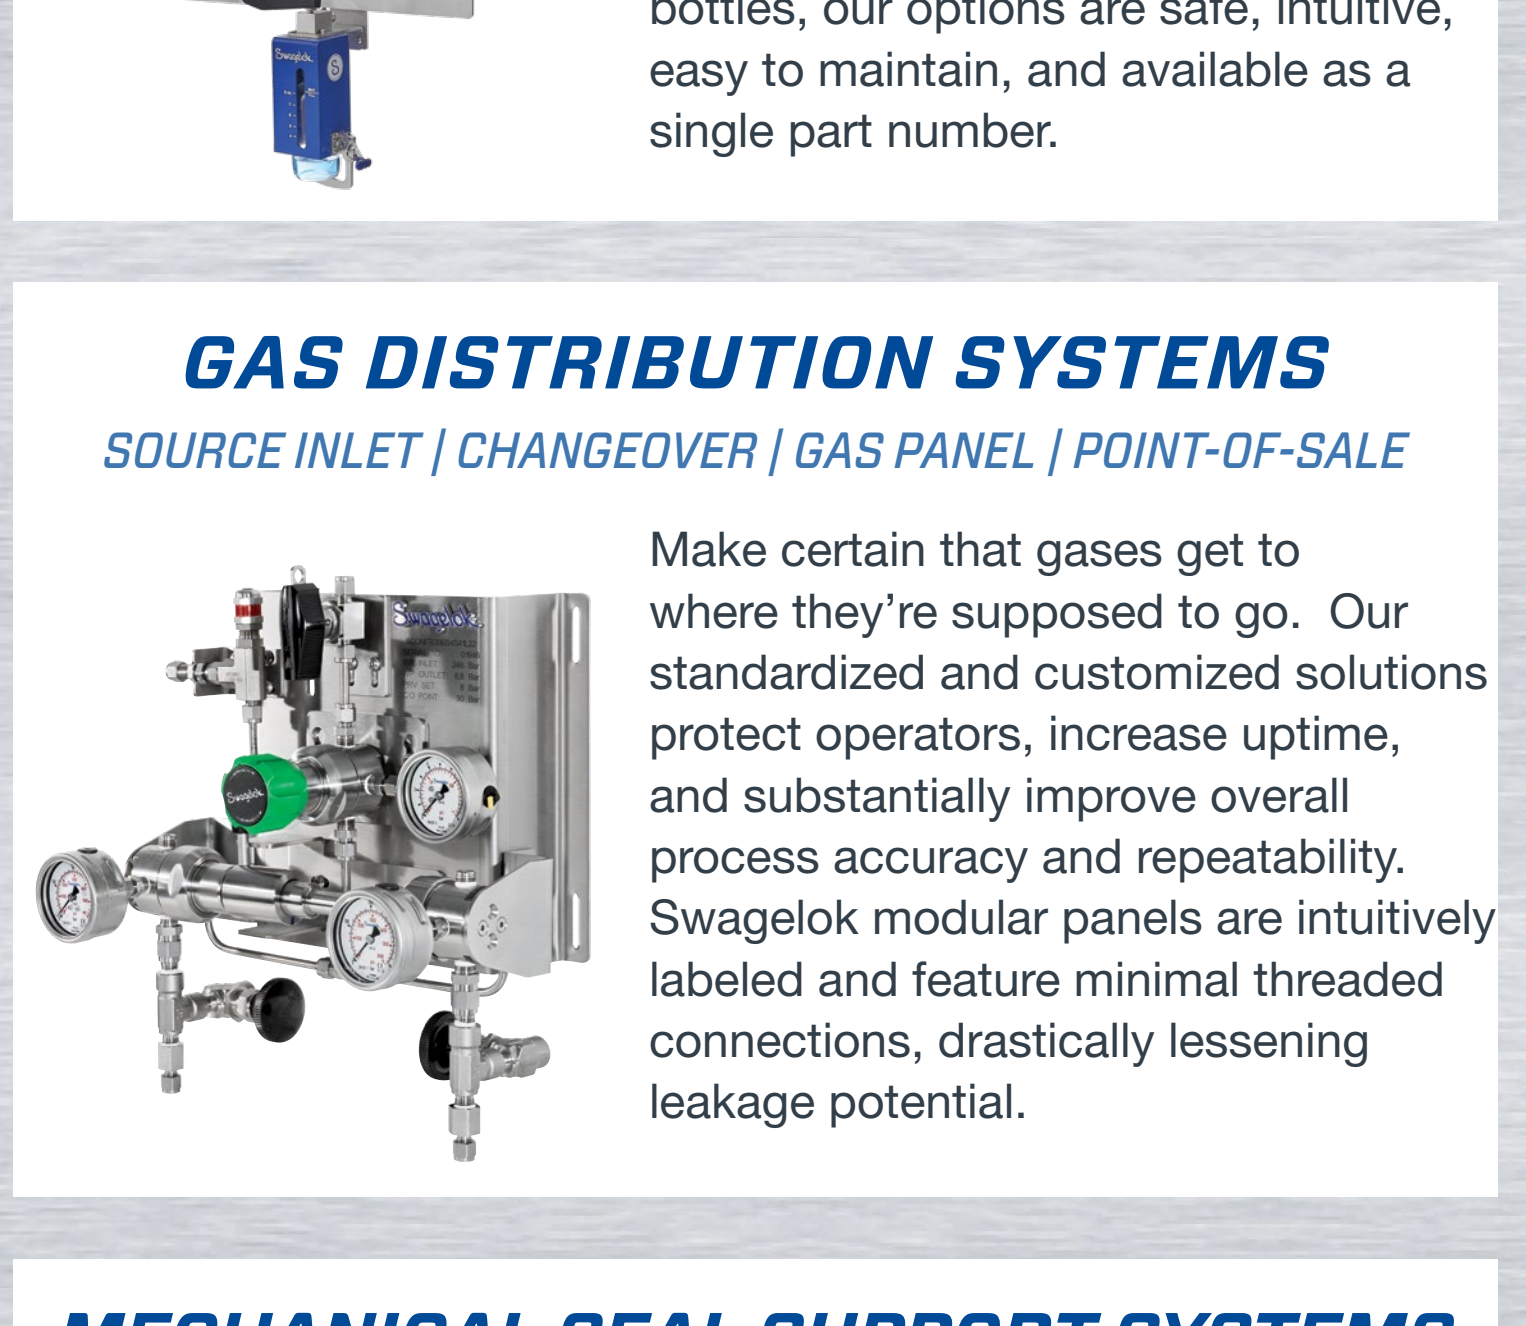

A look at our leading-edge shop:

**State-of-the-Art,
5,000 sq. ft.
Working and Staging Area**

**5-ton
Overhead Crane, with 18-foot Clearance**

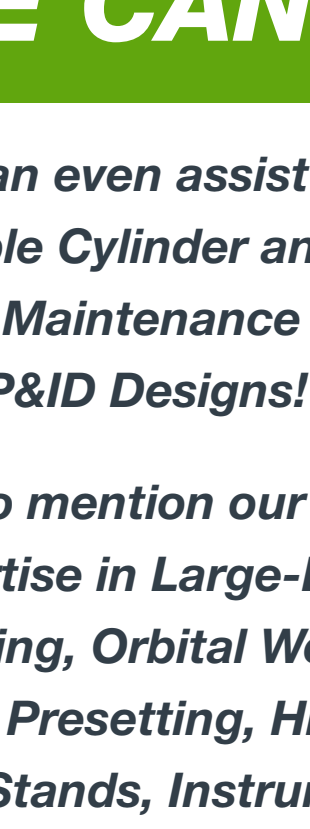

**Climate-Controlled Environment;
Dedicated Swaging, Bending, Coiling, Orbital
Welding, Kitting, Packaging/Wrapping,
Inspection, Testing, and Cleaning Stations**

We also specialize in:

GRAB SAMPLING SYSTEMS

GRAB SAMPLE MODULE | GRAB SAMPLE LIQUID

Safely, efficiently, and effectively capture gas and liquid samples for transportation to a lab for analysis. Whether you require closed-loop sampling into pressure-rated cylinders OR want to collect liquids and non-volatile process fluid into glass bottles, our options are safe, intuitive, easy to maintain, and available as a single part number.

GAS DISTRIBUTION SYSTEMS

SOURCE INLET | CHANGEOVER | GAS PANEL | POINT-OF-SALE

Make certain that gases get to where they're supposed to go. Our standardized and customized solutions protect operators, increase uptime, and substantially improve overall process accuracy and repeatability. Swagelok modular panels are intuitively labeled and feature minimal threaded connections, drastically lessening leakage potential.

MECHANICAL SEAL SUPPORT SYSTEMS

SEAL PLAN KITS | SEAL PLAN ASSEMBLIES

Ensure that your rotating equipment stays online and performs optimally – at less cost. We offer systems in various API plan configurations that are assembled according to exacting API Standard 682: *Pumps – Shaft Sealing Systems for Centrifugal and Rotary Pumps.*

WHEN production schedules get tight...

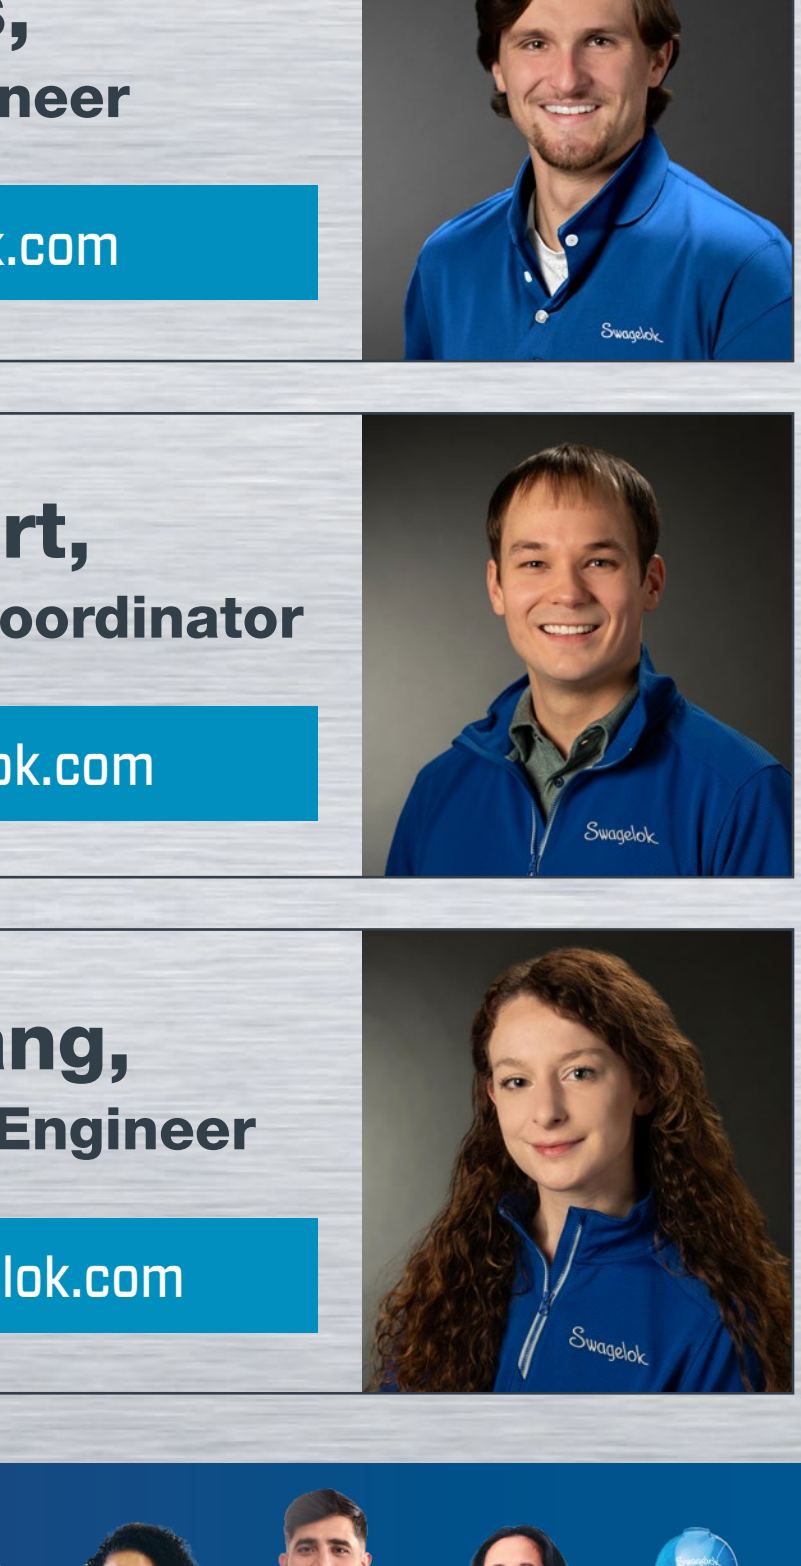

WHEN you need to get more out the door faster...

WHEN you become overwhelmed with excessive engineering, scrap, rework, inventory, and other operating costs...

WE CAN HELP!

We can even assist with Sample Cylinder and Flexible Hose Maintenance Programs, plus P&ID Designs!

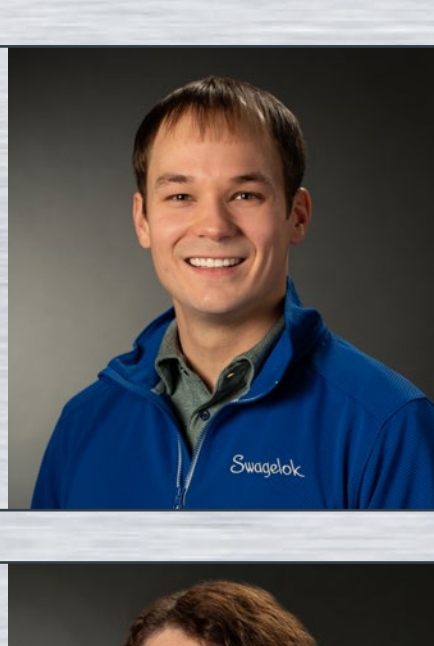

Not to mention our unparalleled expertise in Large-Diameter Tube Bending, Orbital Welding, Relief Valve Presetting, High-Pressure Test Stands, Instrumentation Mounting Kits, and more.

Rely on us to help put you on the path to significantly improved profitability. Contact:
