

A Fitting Conclusion

Swagelok Tube Fittings – easy to safely assemble, install, and maintain – are unparalleled for ultra-reliable, leak-tight performance and exceptional corrosion/vibration resistance, even in the most challenging applications and operating conditions.

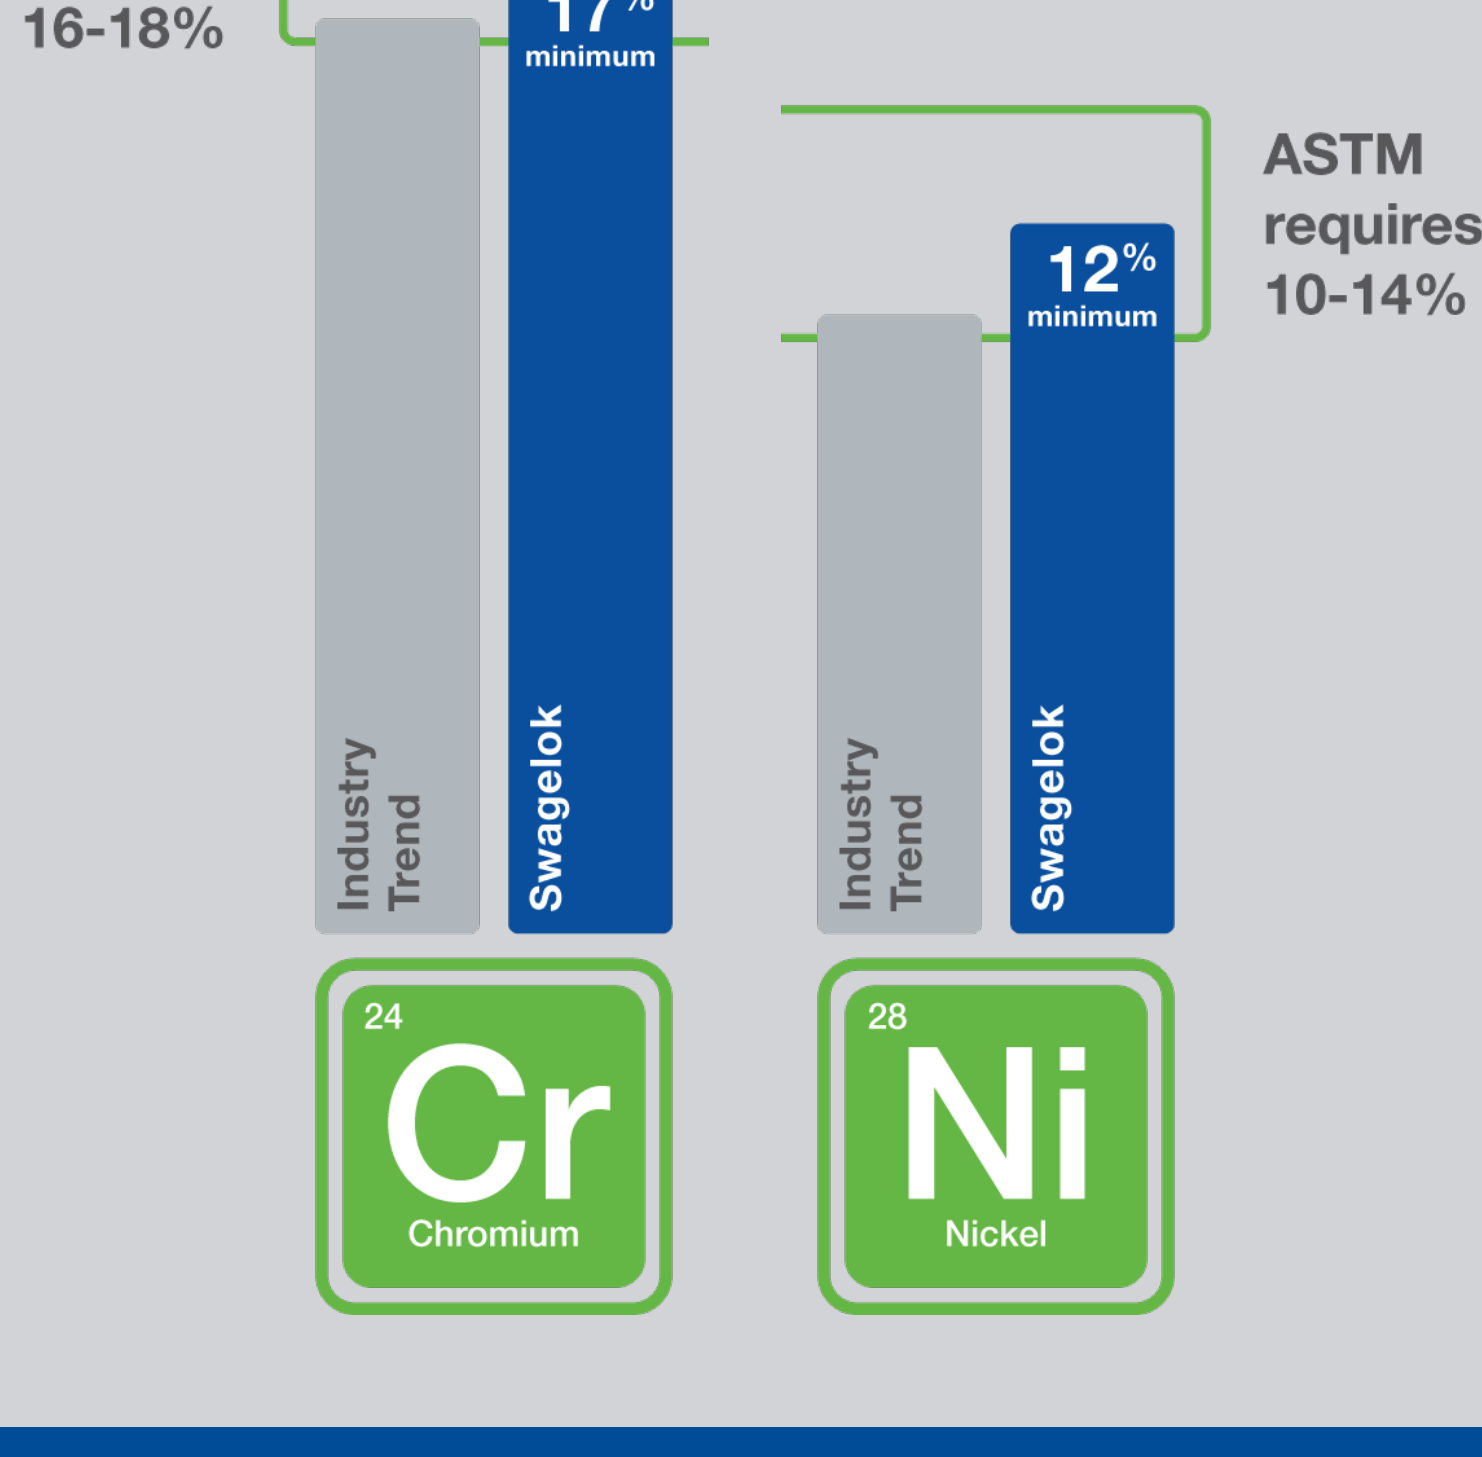

BETTER BY DESIGN

First, our unique, **advanced geometry design**:

A recess feature in the back ferrule enables the ferrule to hinge as it advances, creating exceptionally strong grip and support on the tubing.

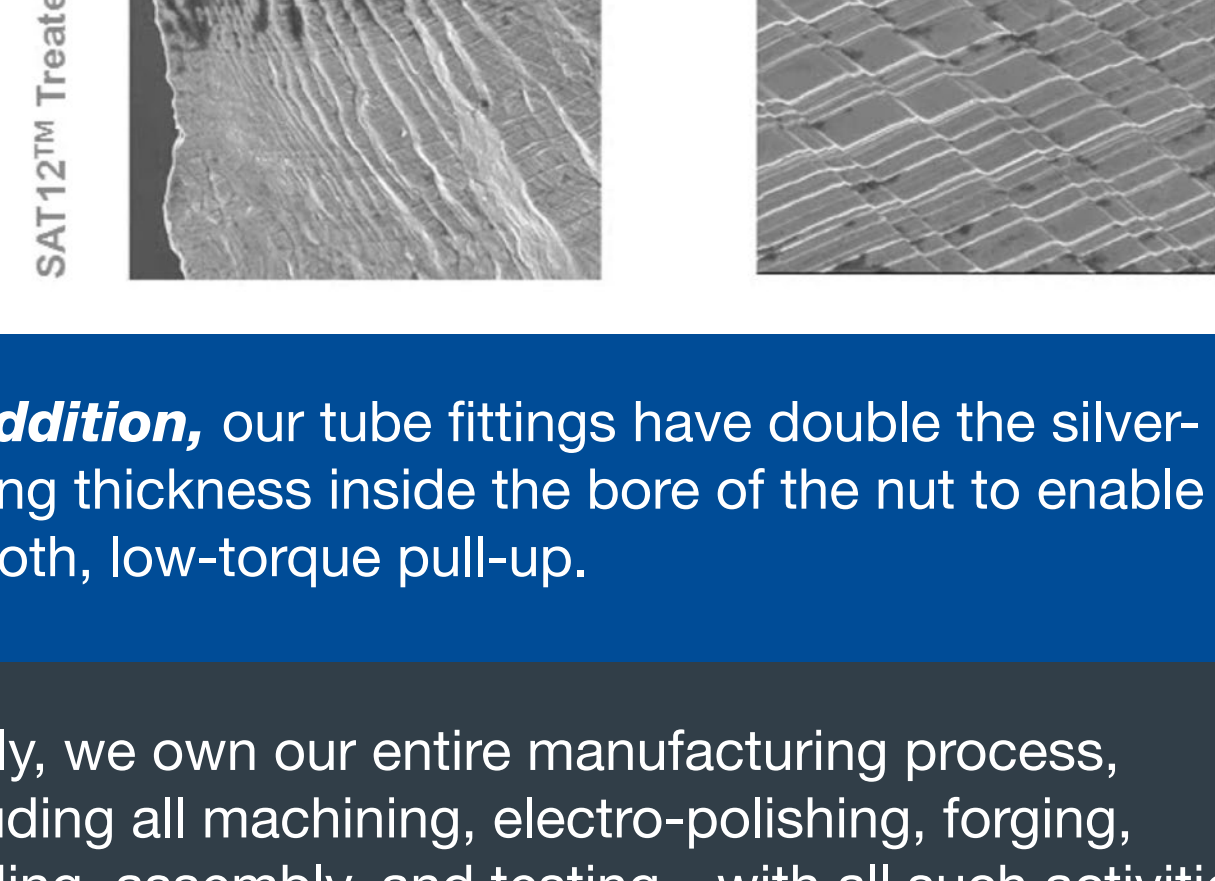

Secondly, we only use the **highest quality materials of construction** – with far more nickel and chromium content versus industry standards – for supreme overall resistance to oxidation, chemicals, acids, and chloride.

Plus, we employ a proprietary SAT-12 low-carbonization case-hardening heat treatment process that hardens the back ferrule's exterior surface to enhance strength, durability, and defense against corrosion.

Other benefits: Remakeability and the capability to work on all ASTM standard levels of tubing hardness.

SAT12 carburized stainless steel maintains ductility

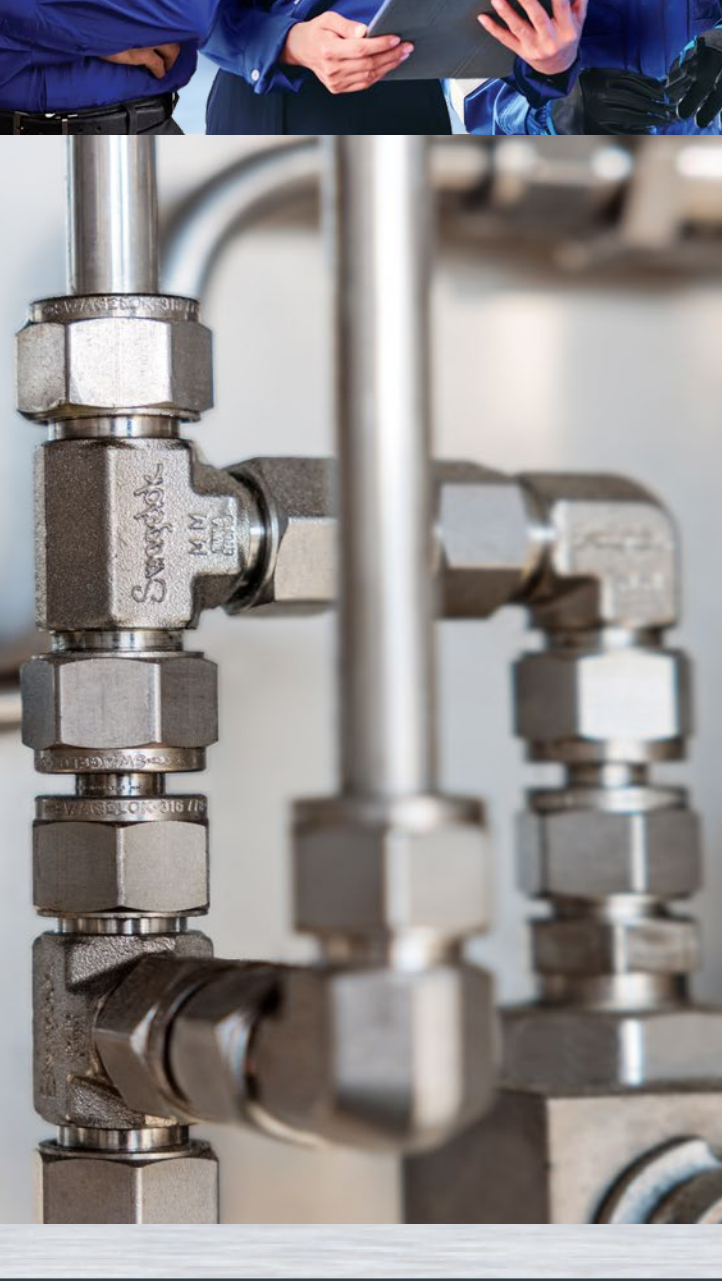

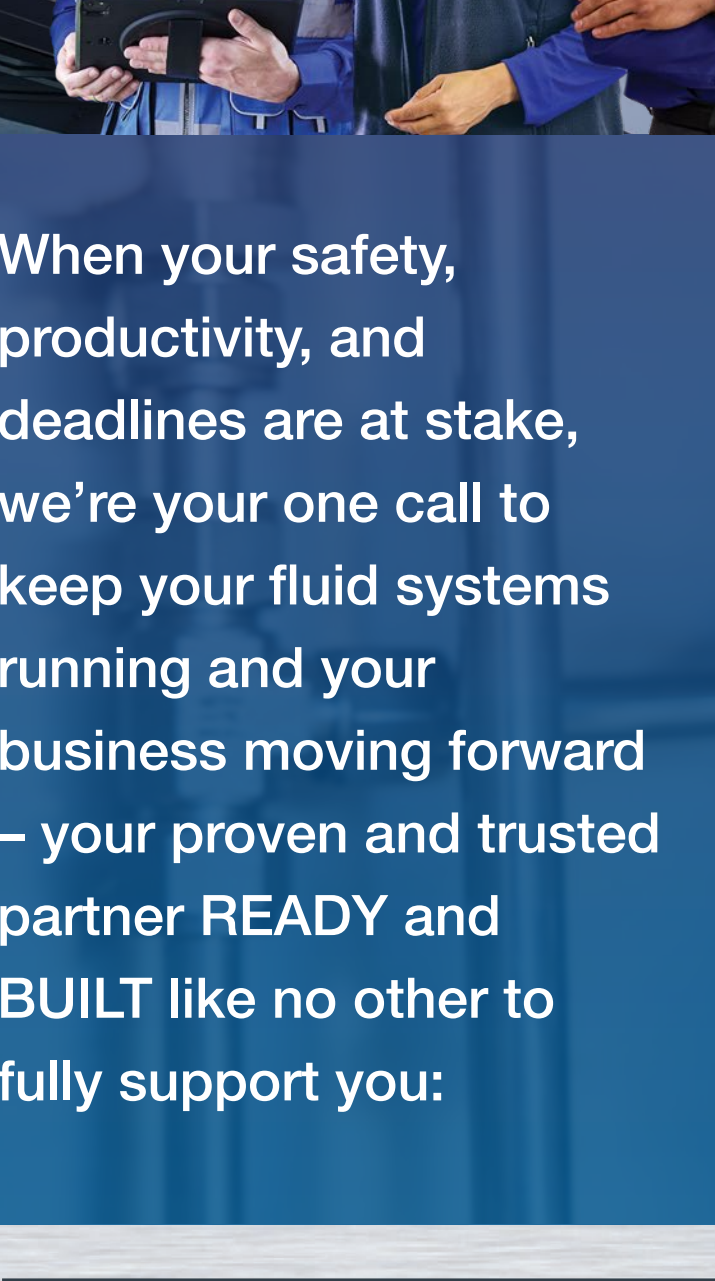

In addition, our tube fittings have double the silver-plating thickness inside the bore of the nut to enable a smooth, low-torque pull-up.

Lastly, we own our entire manufacturing process, including all machining, electro-polishing, forging, welding, assembly, and testing...with all such activities done only by us, in our facilities.

We also routinely select and test thousands of random samples each year – subjecting them to rigorous burn, rotary flex and impulse, and shock impact conditions – to ensure that you receive the safest, most dependable tube fittings, each time every time.

No other Tube Fitting manufacturer can match our combination of premium-quality componentry, massive availability, proven global/local support, and trusted technical expertise.

THAT'S THE SWAGELOK ADVANTAGE

END OF STORY.

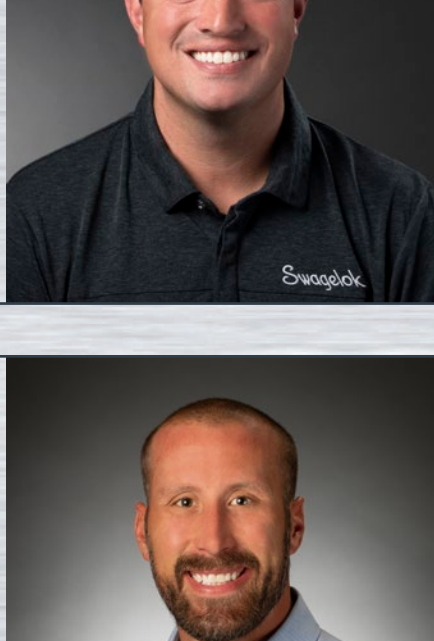

When your safety, productivity, and deadlines are at stake, we're your one call to keep your fluid systems running and your business moving forward – your proven and trusted partner **READY** and **BUILT** like no other to fully support you:
