LESSONS...

Our one-day Swagelok® Tube Fitting Installation & Tube Bending Safety Essentials class is your ideal, proven, and affordable choice to ensure that your maintenance technicians, newly hired or experienced, safely and properly pull up fittings and bend tubing of various materials.

We supply all necessary items – fittings, tube benders, tube cutters, tube sticks, wrenches, manuals – students simply need to show up at our leading-edge Training Center in Pittsburgh (where we've taken every required Covid precaution) OR at your facility or project site. Plus, all Swagelok sessions, which are also eligible for Continuing Education credits, come with a complete money-back guarantee and a Swagelok Certificate of Completion for graduates.

...LEARNED.

After your employees have completed their Swagelok Installation and Bending training – and to determine just how well they're applying their newly acquired knowledge – request a **half-day Swagelok Energy-Loss Evaluation**. We'll come to your site to identify and tag your major areas of system leakage that put your workers, valuable equipment, end product, and overall profitability at high risk. You'll even receive a free comprehensive report that details not only your most troubling connection areas, but provides our expert recommendations for significantly improved productivity as well.

Also: If your industrial Hose applications are a concern, our certified Swagelok Hose Advisors can visit to thoroughly audit your hose selection, sizing, and storage practices. An effective first step, though, would be to **enroll your techs in our four-hour Swagelok Hose Essentials class**, our place or yours.

For more information on all of our Swagelok class titles: **Fitting Inspection Essentials, Advanced Tube Bending, Valve Essentials, Hose Essentials, Sampling System Maintenance, Process Analyzer Sampling Systems, Steam Essentials, and Evaluations and Advisories** email rudy.frank@swagelok.com
