LEARN THE SAFEST WAY.

(And in the Safest Way.)

Our renowned **Swagelok® Tube Fitting Installation & Tube Bending Safety Essentials** all-day class will teach maintenance technicians, mechanics, and engineers the absolute best and proven practices to properly pull up tube fittings; select, handle, and prepare tubing; and bend tubing of various materials at multiple angles leading into and within the confines of an electrical box.

No other fittings manufacturer offers such learning depth and practical hands-on instruction.

And we conduct our training sessions following the strictest COVID-19 protocols -

whether at your facility or at our 14-seat, leading-edge Training Center in Pittsburgh.

"The hands-on tube-bending practice, plus the instructor's willingness to answer our real-world application questions, was worth the price alone."

Graduates are awarded two official Swagelok Certificates of Completion for a single day of training; receive a handy Tube Fitter's Guide, a gap-inspection gauge, and other valuable take-home items; and even earn Continuing education credits.

Plus, we supply all class materials: tube benders, tubing sticks, fittings, wrenches...

Each participant simply needs to show up at the assigned time and place!

Our Technical Trainer,
Mike Gagel,

is a 20-year Swagelok Factory veteran who helped author most of the Swagelok Training content used globally. He's thus ideally suited to customize a class plan to exceed your learning expectations and objectives.

Best of all, our training comes with a full money-back guarantee.

You will not make a better investment in the productivity, efficiency, and safety of your Maintenance crew – that's our promise.
