

SMALL BORE

(versus typical Threaded or Welded Piping Systems)

= BIG SAVINGS

(of Time, Money, Risk)

For installations up to 2", a **Swagelok Small-Bore Tubing Fluid System** delivers unparalleled safety, simplicity, and speed – in fact, ***you can assemble it 50% faster, disassemble/reassemble it in 75% less time, and reduce overall installation costs by at least 40%*** — as opposed to threaded or welded piping alternatives.

In addition, our solution employs tube fittings and bent tubing, with far fewer connections – and, thus, far fewer potential leak points – involved. Tubing use also means less turbulence and pressure drop compared to pipe elbows. Plus, heavy pipe puts massive strain on system supports and costs more to transport, store, and handle. Tubing, though significantly lighter, provides superior pressure containment and an exceptional strength-to-weight ratio.

Your Bottom-Line Choice:

Systems that require qualified welders, expensive welding equipment and permits, fireboxes, air tests, tacking, purging, inspections, flame/fumes, oils, tape, metal shavings, gases, and so much more... **OR** an easy-to-install-and-maintain, leak-tight, ultra-reliable, inherently safer, highly adaptable, and ultimately more cost-effective Swagelok Fluid System!

Our Promise:

In each and every customer engagement and interaction, no matter how challenging your application or operating conditions, we will deliver premier-quality Swagelok Fluid-System Product Solutions and value-added Strategic Services that will positively impact your Bottom Line.

WE'RE YOUR SWAGELOK FLUID-SYSTEM SOLUTIONS PROVIDER

Industry-Best Componentry

Masterful Custom Fabrication

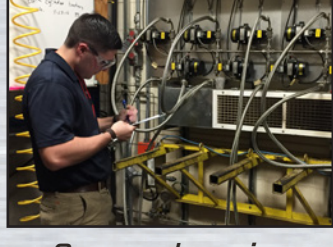

Expert Technical Training

Extensive Energy Evaluations

Unparalleled Application Knowledge

Comprehensive Hose Advisories

Proven Inventory Management Support

Genuine Swagelok Tool Rentals

WE CAN HELP YOU SAVE TIME, MONEY, AND WORRY:
