

MAINTAINING YOUR HEALTHY BOTTOM LINE

Swagelok Pittsburgh | Tri-State Area is your local Swagelok Fluid-System Solutions Provider.

Here's how two recent customer application challenges once again prove that's not simply a Marketing claim...but our promise to deliver the products and support services to make you safer, more efficient, more productive, – and more profitable:

Our Chemical customer was plagued by multiple hose-kinking issues that were causing exceptionally loud pump noise in the facility's main Reactor Room.

HOW WE HELPED:

1 Conducted a multi-faceted Swagelok Hose Advisory that dispensed easy-to-follow, expert recommendations and instructions on how to fix – and avoid – such kinking problems, thus dramatically reducing pump noise levels, and overall hose stress, throughout the site.

2 Shared Best Practices for Hose safety, selection, sizing, routing, and storage, per application.

3 Assisted Chemical Lab personnel on how to set up a routine Hose Maintenance schedule.

Our Power customer's seal support system for its boiler feed water pumps leaked excessively due to extreme pump vibration, thus causing frequent operational failures and costly downtime.

HOW WE HELPED:

1 Reverse-Engineered new cooling and flushing In/Out lines to eliminate leak-prone threaded and welded connections... thus drastically reducing pump vibration.

2 Presented a pre-fabricated Installation Work Package that incorporated a Swagelok small-bore bundle of premium tube fittings, bent tubing runs, pre-assembled subsystems, and metal-core hoses – saving substantial on-site labor time, money, and risk.

3 Advised facility's maintenance technicians during actual implementation and subsequent pump conversions.
