

# THE BEND OF THE WORLD

At Swagelok Pittsburgh | Tri-State Area, **COLLABORATION** is truly a guiding principle for how we effectively and successfully conduct our business – whether discussing a complex fluid-system application challenge onsite with you or determining even better ways to improve your productivity via in-depth conversations with Swagelok Company Engineers and Product Managers or amongst our own Pittsburgh-based associates.

But, recently, Mike Gagel, our Technical Trainer and Strategic Services Specialist, expanded our support borders well beyond western/central Pennsylvania and the counties we routinely serve in Ohio, West Virginia, and Maryland:

“Rasman Edwin, Swagelok Malaysia’s Head of Services, asked me to visit for a week to help train his Trainer and Fabrication associates on the finer points of tube bending. His call came in February, so I, of course, jumped at the chance to escape our cold weather, but, more importantly, I viewed this as a wonderful opportunity to share my expertise and experiences – and to work hand-in-hand – with Swagelok peers so very eager to grow,” says Gagel.

Mike’s Asian course agenda focused on teaching his class of 15 the traditional Measure-Bend method and the proven Swagelok method. The Malaysia Fabrication Shop participants also learned how to significantly improve the quality of the pre-bent tubing they deliver. All students spent considerable time understanding how to safely and properly use Swagelok’s benchtop and electric benders, too.

“In all, I think everyone walked away from the event feeling far more comfortable and confident making just about any type of bend – custom and rolling offsets, segmented, and even parallel tubing runs. And we had an absolutely great time as well,” concludes Gagel.

Mike Gagel

## REMINDER

Mike is always ready and available to show you Swagelok’s Advanced Bending techniques!

Call **412.439.1706**

today to book your class **OR** to register for our next event in Pittsburgh, **September 17-19.**

We’ll work collaboratively with you to optimally customize our class content to address your specific facility or project requirements or issues.

## Our Promise:

In each and every customer engagement and interaction, no matter how challenging your application or operating conditions, we will deliver premier-quality Swagelok Fluid-System Product Solutions and value-added Strategic Services that will make you safer, more productive, more efficient, and more profitable.

WE CAN HELP YOU SAVE TIME, MONEY, AND WORRY:
