

YOUR **PRODUCTION**
IS ON AN
UPTURN...

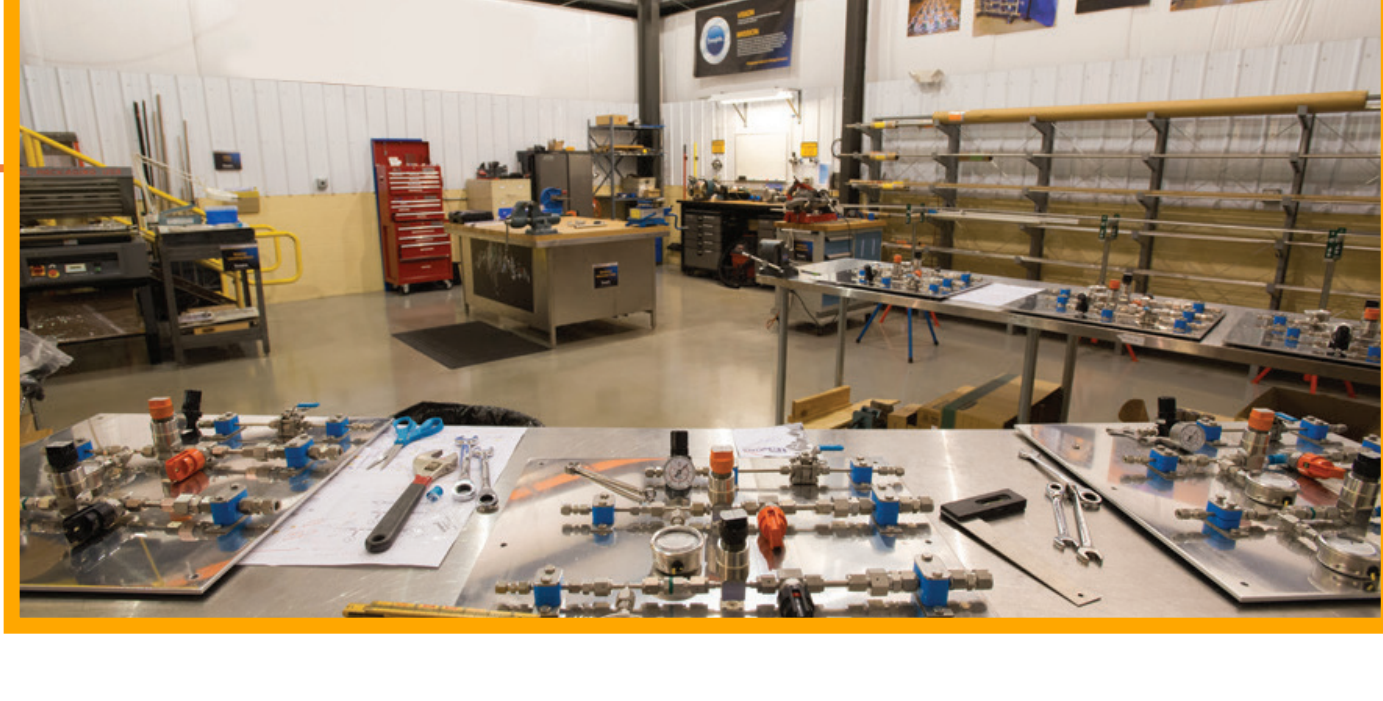

BUT YOUR
RESOURCES ARE SHRINKING.

NOW THAT'S PRESSURE!

Here's how we can assist you
when you're short-handed.

EXPERT CUSTOM FABRICATION

- If your panels, enclosures, skids, or assembly projects are taking too long, costing too much, or putting you at too great a risk...
- If you lack the necessary equipment/machinery, specialized skill sets, or simply have too little available labor for your current workload...
- If scrap, rework, and other operational inefficiencies continually hamper your overall performance and profitability...
- If a warranted, premium-quality, turnkey fabricated solution – delivered as a single part number – makes critical financial and functional sense for you...

...we can help you realize a healthier Bottom Line!

Our state-of-the-art, 5,000-square-foot Fabrication Center is climate-controlled – with dedicated orbital welding, bending, swaging, coiling, kitting, testing, inspection, cleaning, and packaging stations. We can also come to your site to perform masterful tube bending up to 2" in diameter!

SWAGELOK ENERGY-LOSS EVALUATIONS

Let us help you identify and repair costly air or gas leakage within your fluid system. Such inefficiency leads to lost media, lost production, equipment damage, off-spec final product, **an unsafe work environment**, major cleanup, and, sometimes, even non-compliance fines – and that means dramatically and negatively impacted facility and/or project profitability.

Our energy audits are free and yield a comprehensive report that not only cites your problem areas – but also gives our expert recommendations to boost system performance. To schedule your on-site survey, email rudymfrank@swagelok.com.

SWAGELOK HOSE ADVISORIES

Let us map your current industrial hose applications and storage practices. Such an audit will ensure that you're no longer just replacing the same damaged or worn hoses – but actually moving toward an optimized overall fluid system.

Our certified Hose Advisors will visit your site to conduct a complimentary, thorough analysis of your existing hose usage. We'll then provide you a highly detailed report filled with proven advice on how to rapidly improve your **hose safety** and health. Plus, we'll even help you set up a routine hose-maintenance schedule – to enable you to avoid ongoing expensive repair and replacement costs. To reserve your hose advisory, email rudymfrank@swagelok.com.

PROVEN INVENTORY CONTROL

Get complete visibility and accountability around your Swagelok product spend – while ensuring that you don't run out of critical Swagelok componentry. Drastically reduce or eliminate costly purchase orders, too. Our space-saving RoboCrib dispensers, with easily customizable bins and drawers, generate up to 200 different types of usage reports so that you can accurately track just who took what and when...by project.

Our Promise:

In each and every customer engagement and interaction, no matter how challenging your application or operating conditions, we will deliver premier-quality Swagelok Fluid-System Product Solutions and value-added Strategic Services that will make you safer, more productive, more efficient, and more profitable.

WE CAN HELP YOU SAVE TIME, MONEY, AND WORRY:
