

# Swagelok Pittsburgh | Tri-State Area

## ***Your Local Swagelok® Fluid-System Solutions Experts***

### ***Finest in the Field***

*...eighth in a series of on-the-job success stories that demonstrate how Swagelok Componentry and Strategic Support Services consistently save you substantial time, money, and worry in even your most challenging applications and operating environments*

### ***Your Challenge***

A major maker of pumps and compressors for the global mining, chemical, and power generation industries needed to find new Check Valves and more that would ensure stable and reliable compressor operations in harsh industrial environments. Overall, our customer was determined to find and deploy multiple products – manifolds, instrumentation valves, tube fittings... for significantly improved pressure control on its panels.

### ***Your Solution***

Local Swagelok Design & Build Services was contracted to help develop compressor control panels, each with five manifolds and 20 connections. All have maintained a virtually leak-free record. In addition, our account signed up for several Swagelok Tube Fitting Installation & Tube Bending Safety Essentials classes to assure that all maintenance technicians knew the latest and most proper ways to build safe/ultra-reliable fluid systems.

### ***Your Healthier Bottom Line***

In all, after installing our single-flange componentry and completing Swagelok's renowned training courses, our customer saved more than 200 hours of assembly time each year, while helping its end users to realize a 90% reduction in their maintenance costs – quite a competitive edge against other OEMs in the marketplace.
