

Swagelok Pittsburgh | Tri-State Area

Your Local Swagelok® Fluid-System Solutions Experts

(More of) What “They’re” Saying

No matter what your application or operational challenge, Swagelok premier Products and unparalleled Strategic Support Services deliver optimum safety, performance, and profitability.

Your Challenge

A major Petrochemical customer battled a significantly leaking seal support system, resulting in highly unprofitable ethylene production. The site’s Operations Manager and his team decided a comprehensive current-state analysis was the best first step toward a potential fix. Poor workmanship around the piping was determined as the leakage culprit – with clean flush from an external source deemed the eventual long-term remedy.

Your Solution

Swagelok Field Engineers visited and quickly converted all plant piping to tubing, thus creating a standardized seal support process that was far more efficient and enabled easier upgrades to the overall system as well. In addition, the Swagelok experts helped dramatically lower operational costs by installing a main export pipeline panel from a single point of origin.

Your Healthier Bottom Line

The switch to tubing enabled our customer to improve worker and asset safety, eliminate rework, improve uptime, and realize greatly diminished business costs and capital expenditures.

Swagelok seal support systems are better by design. Our easy-to-configure, locally built, and reliable solutions help you reduce costs, save time, and improve safety.

Less Leakage

Quick Delivery

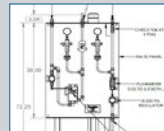

System Updates

Local Resources

Standard Panels

Shorter Lead Times

Less Seal Failure

Fewer Leak Points
