

Swagelok Pittsburgh | Tri-State Area

Your Local Swagelok® Fluid-System Solutions Experts

Finest in the Field

...seventh in a series of on-the-job success stories that demonstrate how Swagelok Componentry and Strategic Support Services consistently save you substantial time, money, and worry in even your most challenging applications and operating environments

Your Challenge

A major refinery was spending excessive time, money, and effort to control fugitive emissions (Volatile Organic Compounds). Its pumps – with complex seal systems that included numerous pipe attachments with multiple joints – were simply leaking far too much, overextending the site's maintenance budget and labor crews.

Your Solution

Swagelok customized 4" and 6" Extended Male Connectors were substituted for the pipe joints, enabling one-piece linkages between the gland and the tubing run – thus eliminating numerous potential leak points via a single fitting.

Your Healthier Bottom Line

Our Rotary Equipment customer was not only extremely pleased by the substantially lowered emissions, but cited the simplification and “cleanliness” of the overall installations. In addition, here forward, significantly less monitoring of the pump is necessary.
