

Swagelok Pittsburgh | Tri-State Area

Your Local Swagelok® Fluid-System Solutions Experts

Extreme Performance

Your Challenge

A leading manufacturer of automation, flow metering, and gas quality equipment for extremely low-temperature applications – located in one of the world's harshest climates – needed to find and rely on a components supplier who could consistently deliver products of utmost/unparalleled quality and dependability. **Bottom Line:** Our products had to work within this customer's products to yield superior, leak-tight performance at conditions down to -80° F.

Your Solution

First, Swagelok tube fittings, valves, gauges, hoses, and tubing virtually eliminated leaks, hissing, cracking, and other issues that had formerly troubled the plant. Our products enabled the customer to operate effectively and efficiently, especially in the toughest challenges.

Secondly, Swagelok Field Engineering Services worked closely with the account to develop system designs and best maintenance practices to maximize uptime and profitability across the entirety of the customer's business.

In addition, we provided our renowned Swagelok Process Analyzer Sampling System training to the site's engineers, giving them the necessary skills and know-how to better build analyzers that will prevent costly sampling errors for secure, ultra-accurate, and timely results. Our week-long training content taught the participants how a typical sampling system functions from the process line and tap through the transport lines and stream switching, sample conditioning, analyzer, and disposal processes.

Your Healthier Bottom Line

Per the site's Director:

"Swagelok components, services, and training have meant that our equipment runs exceptionally well for the long term. And even as transmission requirements have become far stricter globally for the oil and gas industry, we have maintained a reputation of premium quality, unquestionable reliability – with no compromises."

Added the Swagelok Distributor for the region:

"We once again proved how well we listen to and understand customer needs; we're not just about products – we're truly a trusted business partner and solutions provider."
