

Swagelok Pittsburgh | Tri-State Area

Your Local Swagelok® Fluid-System Solutions Provider

Less downtime. Less cost. Less risk.

Introducing the Swagelok® Seal Pot Safe Fill Solution...

...for Between Seal Plan 52 Pumps

- Typical refill time: 4 hours
- Equipment must be shut down and cooled prior to maintenance
- Workers require a ladder or climb on equipment to refill seal pot
- Workers are exposed to hot/hazardous vapors

- Refills occur while pumps are online, reducing downtime
- Operators work from ground level – no climbing on equipment or ladders
- Operator exposure greatly minimized by block valve/check valve/pressure gauge design
- Standard filling method minimizes operator error

Fill safe and feel safe with the Swagelok Seal Pot solution!
