

Swagelok® Compressed Gas Leak Detection Services

Minimize Leaks. Maximize Efficiency.

Look to Local Specialists to Find and Fix Your Fluid System Leaks

Whether you are aware of them or not, fluid system leaks can cost you time and money, and can compromise the safety of your team members. If you experience utility costs rising, safety alarms activating, production or lab processes becoming difficult to control, or product batches failing to meet quality standards, system leaks may be to blame. Find them and adopt a plan to fix them by working with Swagelok.

Using proven leak detection methods and Swagelok's proprietary onsite inspection mobile application, Swagelok fluid system specialists will perform a thorough evaluation of your fluid systems in order to identify and quantify the source and cost of each compressed gas leak.

Next, they will provide a list of recommendations prioritized by urgency and ROI so that you can eliminate leakage and risk factors while conserving valuable resources as efficiently as possible.

Recommendations Resulting From Swagelok® Compressed Gas Leak Detection Services Help:

- Mitigate safety risks
- Improve fluid system efficiency
- Increase reliability of outputs
- Reduce energy consumption
- Reduce operating costs associated with gas leaks
- Reduce emissions in everyday plant operations

Find Hidden Opportunities to Increase Profitability

Every day that a leak goes unaddressed, it's hurting your organization's bottom line—and it could hurt your employees. The sooner you make a concerted effort to locate and stop your leaks, the better off you will be.

Quickly Assess the Situation With Our Easy-to-Follow Report.

The report example below is a representation of the type of information you would receive from a Swagelok evaluation. Your actual report would reflect information more specific to the service being performed.

Fluid System Evaluation and Advisory Service
Customer Name: Site Name
Appendix C - Issues by Issue Tag ID

Issue Tag ID : 0001 **Category : 2**

Plant Area: Air Supply Part Material: Stainless Steel
Customer Tag ID: PH-120C Connection Type:
Location: North Side of Plant Connection Size: 1/2 in
GPS Location:
Part Description: 0-100 PSIG Pressure Gauge
Process Fluid: Air Type of Part: Measurement Devices
Pressure: 100 psig Manufacturer: Unknown
Temperature: 73 F Part Number:
Issue: Incorrect Part Equip Swagelok Part: PGM-03C-PG100-LA0X
Description: Gauge is being used near max range which may cause damage and over pressurization.
Other Findings:
Possible Solution: Replace component(s) according to manufacturer's instructions
Ultrasound ID:
Ultrasound ID:

IMPORTANT: Always depressurize the system before working on, disassembling or assembling a fluid system. Product Selection. When selecting a product, the total system design must be considered to ensure safe, trouble free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.
NOTE: Where the Part Number is followed by "XXX", it should be confirmed before placing an order.

Fluid System Evaluation and Advisory Service
Customer Name: Site Name
Appendix A - Issues by Category

Issue Category : 1 **Number of Issues in this Category: 3**

| Issue Tag ID | Part Type | Issue | Plant Area | Issue Tag ID | Description | Fixed |
|--------------|-----------|---------------|------------|--------------|---|--------------------------|
| 0000 | Weld | Small Leak | Air Supply | PH12 | Leakage apparent by strong feeling of wind connection. Make sure to seal and damaged. | <input type="checkbox"/> |
| 0006 | Flange | Under-tighten | Air Supply | PH | Tube fitting measured with gap gauge to be severely under-tightened. Fittings are insulated with an insulation for maintenance. | <input type="checkbox"/> |
| 0008 | Flange | Insulation | Air Supply | PH | Insulation on valve. | <input type="checkbox"/> |

Issue Category : 2

Appendix B - Issues by Plant Area

Plant Area: Air Supply **Number of Issues in this Plant Area: 6**

| Issue Tag ID | Part Type | Issue | Category | Issue Tag ID | Description | Fixed |
|--------------|-----------|------------|----------|--------------|--|--------------------------|
| 0006 | Flange | Small Leak | 2 | PH 0006 | Leak of fitting and connection detected by strong feeling of wind connection. Make sure to seal and damaged. | <input type="checkbox"/> |
| 0008 | Valve | Corrosion | 2 | PH 0008 | Valve displaying corrosion which may impact serviceability. | <input type="checkbox"/> |
| 0007 | Piping | Small Leak | 2 | PH 0007 | Leakage detected at pipe fitting connections using肥皂. | <input type="checkbox"/> |
| 0000 | Weld | Small Leak | 1 | PH12 | Leakage apparent by strong feeling of wind connection. Make sure to seal and damaged. | <input type="checkbox"/> |
| 0005 | Flange | Corrosion | 2 | PH 0005 | Severe corrosion. | <input type="checkbox"/> |
| 0002 | Tubing | Support | | | | <input type="checkbox"/> |
