

Protect your Project Schedule

Eliminate Turnaround or Project Delays with our On-site Inventory Swagelok On-Location Solutions Container

Bringing Inventory, Engineering, and Application Expertise directly to your site.

When projects are under pressure, delays usually come from one place — materials, access, or support not being available when you need them. Swagelok On-Location Solutions Container is designed to solve exactly that. It's a project-dedicated on-site warehouse and support hub, placed directly at your site to keep work moving, teams productive, and timelines on track.

On-Location Solutions Container supports your project team during construction, commissioning, shutdowns, turnarounds, and helps reduce costs associated with daily or emergency deliveries, urgent purchases, and plant downtime.

What You Get On-Site:

- 40ft container outfitted with pre-selected inventory, tubing racks, counter space, climate control (AC units), lighting, electrical hookups, and fire alarm system
- Critical fluid system components stocked for your short or long-term project — organized for quick access
- Workspace for kitting, inspection, and staging — ideal area to perform fit-up of sub-assemblies
- Direct access to Swagelok application, engineering, and training support

Swagelok On-Location Container gives you critical fluid system products exactly when & where you need them, reducing inventory costs, and ensuring uninterrupted operations.

Implementation of your Project Container

Our local Swagelok Fulfillment & Logistics team will collaborate with you and your stakeholders to determine the most beneficial approach to meeting your short-term or long-term project requirements. Container will remain on-site for the duration of your project or can be relocated as work phases shift.

We will evaluate your current inventory practices, forecasts, project data, and operational needs to develop a customized implementation plan, including replenishment schedules and transactional processes.

Collaborative Planning

Swagelok reviews your usage patterns, project demands, and determines inventory stocking program and replenishment schedule.

Budgeting

Billing process will be pre-determined to ensure we align with your project budget and goals.

On-Location Coordination

A Swagelok project coordinator will be dedicated to your site to ensure you have as much on-site support as you need, including technical and application expertise.

Swagelok fittings, tubing, valves, hoses, gauges, regulators, tools, and accessories stored near your physical work area and pulled when needed.

Keep your Project On Schedule with Swagelok

Have the right Swagelok components, tools, and technical support available on-site, everyday — without waiting for deliveries or urgent purchases.

No Delays

Critical materials and spare parts are already on-site when your team needs them.

Higher Productivity

Your crews spend less time waiting and more time installing.

Safer, Proper Installations

Correct fluid system products & solutions, proper storage, easy access, and Swagelok fluid system expert guidance to ensure product selection and reduced rework.

Application Expertise

Gain access to your local team of fluid system engineers and certified-Swagelok trainers who provide application knowledge, technical support, and hands-on training for your workforce.

Reserve your Container Ahead of your Next Project
