

Swagelok Tube Fitter Kit

Be prepared for any tube fitting installation or tube bending job with the Swagelok Installation Tool Kit. Available in 1/4", 3/8" and 1/2" tubing sets or a complete set of all three.

Kit Components:

Tube Cutter

Cuts stainless steel, soft copper, and aluminum tubing.

Pre-swaging Tools

A convenient tool for tube sizes 1" (25mm) and under.

Hand Tube Benders

Easy-to-use benders reduces chances of damaging the tubing and reduces installation time

Ratchet Wrenches

Ideal for working in close quarters with limited room for movement

Tube Deburring Tool

Removes burrs from tube cutting, reducing the chances of leakage or damage to components

Gap Inspection Gauges

Ensures fitting's initial installation is sufficiently tightened

Tee Wrenches

Supports Swagelok union and tee crosses installation

Swagelok Tube Fitter's Manual

Provides detailed instructions for successful tubing selection and installation of Swagelok fittings

Tube Cutter

Cuts stainless steel, soft copper and aluminum tubing from 3/16" to 1" (4 to 25mm) outside diameter

- Reduced flare out and work hardening of tube end
- Knobs Spaced in 1/8"-turn increments for easy reference

Tube Deburring Tool

Removes burrs post-cutting from stainless steel, steel and hard alloy tube ends

- For inside and outside diameters 3/16" to 1 1/2" (4 to 38 mm) tubing
- Steel blades and durable die-cast housing for long life

Pre-swaging Tools

Convenience accessory for Swagelok tube fitting installations in close quarters

- Preswages the ferrule onto the tube, enabling installer to work in a open and safe environment
- Aids in successful installation and retightening

Gap Inspection Gauges

Used by installers and inspectors to verify proper installation

- Used upon installation to ensure proper fitting tightening

Hand Tube Benders

Provides consistent, high quality bends for tubing that is Swagelok tube fitting compatible

- Available in 1/4", 5/16", 3/8" and 1/2" as well as 6, 8, 10, 12 mm tube sizes
- Handle design enhances leverage for bends up to 180°
- Roll dies reduce bending force and tube ovality, compared to conventional slide block design

Tee Wrenches

Provides support for Swagelok union tees and crosses installation

- Available in variety of sizes in order to hold fitting body firmly and precisely in various orientations
- Head and handle made of stainless steel with a cushioned vinyl grip

Ratchet Wrenches

Designed for fitting installation on Swagelok nuts

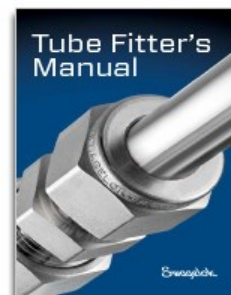

- 11 fractional and metric sizes available
- 1/12 turn ratchet for use in close quarters
- Heavy duty construction including: black oxide plated steel handle and jaws and stainless steel spring and fasteners

Swagelok Tube Fitter's Manual

Delivers comprehensive instructions to assist during Swagelok tube fitting installations, including pictures, diagrams and reference charts.
