High-Pressure, Pneumatically Actuated Bellows-Sealed Valves

HB Series
- Packless valves with all-metal seal to atmosphere
- Working pressures up to 3500 psig (241 bar)
- Temperatures up to 400°F (204°C)
- VCR® face seal fitting, Swagelok® tube fitting, and weld end connections
Features

Valve

- Flow coefficient \( C_v \) of 0.30
- Full pressure rating in either flow direction for system versatility
- Easily purged to maintain clean operation

Pneumatic Actuator

- Normally closed and normally open models
- Actuation pressure as low as 30 psig (2.1 bar)

</tbody>
</table>

Pneumatic Actuator Performance

For optimum valve performance, the normally open pneumatic actuator should be limited to 30 psi (2.1 bar) above the pressures shown in the graph.

Performance Specifications
See the HB Series Diaphragm Valve Technical Report, MS-06-04, for more information on surface finish specifications, particle counting, moisture analysis, hydrocarbon analysis, ionic cleanliness, and lab cycle testing data.

Ordering Information and Dimensions
Dimensions, in inches (millimeters), are for reference only and are subject to change.

For a complete ordering number, add C for a normally closed pneumatic actuator or O for a normally open pneumatic actuator to the basic ordering number.

Example: SS-HBS4-C

Polyimide Stem Tip
To order a valve with a polyimide stem tip, insert V into the valve ordering number.

Example: SS-HBV51-C

Dimensions shown with Swagelok tube fitting nuts finger-tight.
Safe Product Selection
When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Caution: Do not mix or interchange parts with those of other manufacturers.

Cleaning Process Availability
See Process Specifications, page 3, for more information about Swagelok cleaning and packaging processes.

Standard (SC-11)
Swagelok HB series valves are processed in accordance with Swagelok Special Cleaning and Packaging (SC-11), MS-06-63, to ensure compliance with product cleanliness requirements as stated in ASTM G93 Level C.

Photovoltaic (SC-06)
Swagelok HB series valves with VCR or weld end connections are available cleaned and packaged in accordance with Swagelok Photovoltaic Process Specification (SC-06), MS-06-64, to meet the process requirements of solar cell production. To order, insert -SC06 into the ordering number.
Example: SS-HBBW4-SC06-C
SC-06-cleansed HB series valves with VCR or weld end connections are available with controlled wetted surface finishes and electropolishing. To order, insert -P6 into the ordering number.
Example: SS-HBVCR4-P6-O

Ultrahigh-Purity (SC-01)
Swagelok HB series valves with VCR or weld end connections are available with wetted surface finishing, cleaning, and packaging in accordance with Swagelok Ultrahigh-Purity Process Specification (SC-01), MS-06-61. To order, insert -P into the ordering number.
Example: SS-HBBW4-P-C

Options and Accessories

Indicator Switch
- Transmits a signal to an electrical device indicating either the open or closed position of a normally closed pneumatically actuated valve.
- Features a single-pole, single-throw switch rated at:
  - 1/2 A for 115 V (ac) for normally open switch;
  - 1/4 A for 115 V (ac) for a normally closed switch;
  - –40 to 185°F (–40 to 85°C) temperature.
- Includes a 24 in. (61 cm) wire lead with an inline clip.
- Is available assembled on any normally closed pneumatically actuated HB series valve or for field assembly.

Factory-Assembled Indicator Switches
To order a valve with an indicator switch, add:
- M for a normally open switch
- M-2 for a normally closed switch or
- M2 for a switch that indicates open and closed to the valve ordering number.
Examples: SS-HBS4-CM
          SS-HBS4-CM-2
          SS-HBS4-CM2

Actuator with Indicator Switch Kits for Field Assembly
To order a kit for an existing normally closed HB series valve, select an ordering number from the table below.

<table>
<thead>
<tr>
<th>Actuator Position Indicated</th>
<th>Actuator/Switch Retrofit Kit Ordering Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Open</td>
<td>MS-ISK-HB-CM</td>
</tr>
<tr>
<td>Closed</td>
<td>MS-ISK-HB-CM-2</td>
</tr>
<tr>
<td>Open and closed</td>
<td>MS-ISK-HB-CM2</td>
</tr>
</tbody>
</table>

Oxygen Service Hazards
For more information about hazards and risks of oxygen-enriched systems, see the Swagelok Oxygen System Safety technical report, MS-06-13.

Maintenance Kits
Bellows, stem tip/adapter, and gasket kits are available. See the Swagelok Bellows-Sealed Valve Maintenance Kits catalog, MS-02-66.

Multiport and Elbow Valves and Monoblock Manifolds
HB series valves are available in multiport and elbow configurations and monoblock manifolds; see the Swagelok Bellows- and Diaphragm-Sealed Multiport and Elbow Valves and Monoblock Manifolds catalog, MS-02-442.

Cleaning Process Availability
See Process Specifications, page 3, for more information about Swagelok cleaning and packaging processes.

Warranty Information
Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative.
