Leak Detectors, Lubricants, and Sealants

Products

- **Snoop®** liquid leak detectors
- **Goop™** thread lubricants
- **SWAK™**, PTFE Tape, and PTFE-Free pipe thread sealants
Liquid Leak Detectors

Snoop and Real Cool Snoop liquid leak detectors detect gas leaks in hard-to-reach areas.

Features
- Sustained bubble action works even on very small leaks and vertical surfaces.
- Flexible snooper tube extends for hard-to-reach areas.
- Noncorrosive, nonflammable formula does not contain chlorine.
- Contains corrosion inhibitor for added protection.
- Formula dries clean, without staining.

**Snoop Liquid Leak Detector**
- Nontoxic formula

Technical Information
- Composition: Deionized water and a surfactant.
- Temperature rating: Can be used over a temperature range of 27 to 200°F (−2 to 93°C).

**Real Cool Snoop Liquid Leak Detector**
- Works at temperatures as low as −65°F (−54°C), even on very small leaks and vertical surfaces.

Technical Information
- Composition: Deionized water, a surfactant, and ethylene glycol to prevent freezing at low temperatures.
- Temperature rating: Can be used over a temperature range of −65 to 200°F (−54 to 93°C).

⚠️ Warning: Use Snoop and Real Cool Snoop liquid leak detectors only on external surfaces.

Material Safety Data Sheets are available from your authorized Swagelok representative or at swagelok.com.
Pipe Thread Sealants
Swagelok pipe thread sealants are compatible with a wide range of chemicals, enabling leak-tight sealing in a variety of applications.

SWAK Anaerobic Pipe Thread Sealant

**Features**
- Cures to a bond that resists vibration or shock
- Lubricates threads, preventing costly thread damage due to galling and seizing during assembly
- Allows low breakaway torque for easy-to-break connections, even after fully cured
- Is compatible with a wide range of chemicals
- Applies quickly and easily
- Clings to threads and will not shred or tear on assembly

**Technical Information**
- **Composition**: Resin (containing methacrylic ester) and PTFE particles
- **Cure time**: At room temperature, allow 24 h minimum before pressurizing.
- **Pressure rating**: To pipe or fitting working pressure up to 10 000 psig (689 bar), based on proper thread engagement
- **Temperature rating**: –65 to 350°F (~–53 to 176°C)
- **Viscosity**: Greater than 100 000 cP, in accordance with ASTM D1824
- **Storage temperature**: 45 to 85°F (7 to 29°C)
- **Shelf life**: Five years at recommended storage temperature

Some fluids and materials are NOT compatible with SWAK. While not intended to be a complete list, they include the following:
- Plastic pipe or valve components other than PTFE
- Halogens
- Freon
- Pure oxygen
- Ozone
- Hydrazine
- Nitrogen dioxide
- High concentrations of strong acids or bases
- Food, cosmetic, drug, or water systems for human consumption
- Vacuum systems where any hydrocarbon outgassing will affect performance

PTFE Tape Pipe Thread Sealant

**Features**
- Material conforms to Commercial Item Description A-A-58092
- Temperatures up to 450°F (232°C)

**Applications**
- Plastics
- Aluminum
- Stainless steel
- Ceramic
- Synthetic rubber
- Carbon steel and special alloys

Pipe Thread Sealants

PTFE-Free Pipe Thread Sealant

Features
- Seals immediately
- Lubricates threads, preventing costly thread damage from galling and seizing during assembly
- Allows low breakaway torque for easy-to-break connections
- Is compatible with a wide range of chemicals
- Clings to threads and will not shred or tear on assembly

⚠️ Use with metal pipe threads only.

Technical Information
- Composition: Particles of polyolefin resin and filler in a polymeric plasticizer. Material has lubricating qualities.
- Pressure rating: Effective with pipe or fitting working pressure up to 10 000 psig (689 bar) at room temperature
- Temperature rating: –65 to 300°F (–53 to 148°C)
- Flash point: 355°F (179°C)
- Storage: Shelf life is up to 5 years when stored at 45 to 85°F (8 to 29°C).

Sealing Considerations
Proper sealing depends on many variables—quality and cleanliness of threads, temperature, component material, installation torque, specific gravity of system media, and system operating pressures.

⚠️ Warning: Do not use Swagelok PTFE-free pipe thread sealant in systems containing a strong oxidizer. A chemical reaction, including spontaneous combustion, can occur.

Thread Lubricants

Swagelok thread lubricants ease assembly of leak-tight connections for a variety of metals and alloys.

**Silver Goop**
Oil-based thread lubricant for use on stainless steel and high-temperature alloys

**Features**
- Prevents galling
- Performs in temperatures up to 1500°F (815°C)
- Contains a nonmelting antiseize agent
- Lowers torque on threaded parts
- Stays in place between mating surfaces regardless of force applied
- Resists moisture

**Pure Goop**
Halocarbon-based thread lubricant for use on titanium, stainless steel, steel, and nickel-based alloys

**Features**
- Resists galling
- Is chemically nonreactive with a wide range of materials
- Performs in temperatures up to 350°F (176°C)
- Is noncorrosive to metals
- Resists moisture

⚠️ Warning: Do not use on aluminum or magnesium threads.

**Blue Goop**
Oil-based thread lubricant for use on stainless steel, steel, titanium, aluminum, and nickel-based alloys

**Features**
- Resists galling
- Performs in temperatures up to 400°F (204°C)
- Resists water washout
- Is a deep blue color that is not affected by water
- Contains PTFE

**Vac Goop**
Fluorosilicone-based thread lubricant for use on threads, O-rings, gaskets, glass seals, and metal parts in vacuum systems

**Features**
- Resists galling
- Has extremely low vapor pressure
- Minimizes outgassing problems
- Is chemically nonreactive with a wide range of materials
- Performs in temperatures up to 300°F (148°C)
- Resists moisture

About this document

Thank you for downloading this electronic catalog, which is part of General Product catalog Swagelok published in print. This type of electronic catalog is updated as new information arises or revisions, which may be more current than the printed version.

Swagelok Company is a major developer and provider of fluid system solutions, including products, integration solutions and services for industry research, instrumentation, pharmaceutical, oil and gas, power, petrochemical, alternative fuels, and semiconductor. Our manufacturing facilities, research, service and distribution facilities support a global network of more than 200 authorized sales and service centers in 57 countries.

Visit www.swagelok.com to locate your Swagelok representative and obtain any information on features, technical information and product references, or to learn about the variety of services available only through authorized sales centers and service Swagelok.

Safe Product Selection
When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Warranty Information
Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit your Swagelok Web site or contact your authorized Swagelok representative.
